Asset Items Collaterilised

This return records the adjustments made by the reporting institution to the Solvency Ratio Return in respect of Asset items collateralised where the collateral has been used to reduce the risk weight coefficient of the underlying asset (paragraphs 5.1.1 (d),(f),(g) and (h), 5.1.2 (c),(d),(f),(i),(j),(k) and (m). Insert in the "From" column the asset item number with the respective risk weight and insert in the "To" column the item number and the reduced risk weight applied. In the "Amount Collateralised" column insert the amount transferred from the higher to the lower category of risk weight.

	Item Numbers (Solvency Ratio Return)				Type of collateral	Issuer
From	Weight %	То	Weight %	Lm000
