In accordance with the Prospectus Regulation and the Delegated Regulation (EU) 2019/980 of 14 March 2019 supplementing Regulation (EU) 2017/1129 of the European Parliament and of the Council as regards the format, content, scrutiny and approval of the prospectus to be published when securities are offered to the public or admitted to trading on a regulated market, and repealing Commission Regulation (EC) No 809/2004 by approving this Base Prospectus, the FMA gives no assurances relating to the economic and financial suitability of the transaction and the quality or solvency of the Issuer.

This document constitutes a base prospectus (the **Base Prospectus**) according to Article 2 sub-paragraph (s) in connection with Article 8 (1) of the Prospectus Regulation for the issuance of Fixed Rate Bearer Notes under German law, guaranteed Fixed Rate Bearer Notes under German law, guaranteed Fixed Rate Bearer Notes II under German law, Fixed Rate Bearer Notes, Fixed Rate Registered Notes, guaranteed Fixed Rate Bearer Notes, guaranteed Fixed Rate Bearer Notes II, guaranteed Fixed Rate Registered Notes, guaranteed Fixed Rate Registered Notes II, Contingent Capital Fixed Rate Bearer Notes, Contingent Capital Fixed Rate Registered Notes, Fixed Rate Registered Notes in Dematerialised Form, guaranteed Fixed Rate Registered Notes issued in Dematerialised Form, guaranteed Fixed Rate Registered Notes II issued in Dematerialised Form, guaranteed Fixed Rate Registered Notes III issued in Dematerialised Form and guaranteed Fixed Rate Registered Notes IV issued in Dematerialised Form (together the **Notes**) issued from time to time by E-Stream Energy GmbH & Co KG (the **Issuer**) and, if applicable, to be guaranteed by Timberland Securities Investment plc (the **Guarantor**). In the latter case, payments of amounts up to an amount as specified in the relevant Final Terms

due in respect of Notes issued by the Issuer will be unconditionally and irrevocably guaranteed by the Guarantor.

The purpose of this Base Prospectus is the offer to the public and/or the admission to trading of the Notes described herein. This Base Prospectus is to be read together with the information provided in (a) the supplements to this Base Prospectus, if any (the **Supplements**), (b) all other documents whose information is incorporated herein by reference (see section "*Documents Incorporated by Reference*" below) as well as (c) the respective Final Terms (the **Final Terms**).

The Notes are subject to, and governed by, its relevant terms and conditions (the **Terms and Conditions**) fully described in the section entitled "*Terms and Conditions of the Notes*". Unless redeemed early or purchased and cancelled in accordance with the relevant Terms and Conditions, the Issuer will redeem each Note on the Maturity Date specified in the relevant Terms and Conditions by paying the relevant redemption amount (as provided for in the Terms and Conditions) to the relevant holder of such Note.

The Issuer has also requested the FMA in accordance with Article 25 of the Prospectus Regulation to provide the competent authorities in the Republic of Austria, Hungary, the Republic of Ireland, the Grand Duchy of Luxembourg, the Republic of Malta and the United Kingdom of Great Britain and Northern Ireland (and together with the Principality of Liechtenstein collectively, the **Public Offer Jurisdictions** and each, a **Public Offer Jurisdiction**) with a certificate of approval attesting that the Base Prospectus has been drawn up in accordance with the Prospectus Regulation. The publication of the Base Prospectus will be made at least one working day prior to the commencement of an offer to the public of the Notes in the relevant Public Offer Jurisdiction.

The Issuer has authorised the making of a public offer of the Notes by Timberland Invest Ltd. and Timberland Capital Management GmbH, Timberland Finance International GmbH & Co KG, Timberland Finance International GmbH & Co KG, Branche Hungary, Timberland Finance GmbH & Co KG and Timberland Finance GmbH & Co KG, Branch Hungary, as applicable, (the **Distribution Agents**) in the Public Offer Jurisdictions during the offer period and the Issuer has consented to the use of this Base Prospectus by any other person authorised by the Distribution Agents in connection with any public offer of Notes (under which the offer of the Notes takes place) and the applicable Final Terms in connection with a subsequent resale or final placement of the Notes to the extent and the conditions as set out in the Base Prospectus and the relevant Final Terms during the term of its validity in accordance with Article 12 of the Prospectus Regulation.

Information on the terms and conditions of the offer of Notes by a Distribution Agent is to be provided at the time of the offer by the relevant Distribution Agent.

The Terms and Conditions of the Notes may be complex. An investment in the Notes is suitable only for investors who are in a position to evaluate the risks and who have sufficient resources to be able to bear any losses which may result from such investment. Before subscribing to or otherwise acquiring any Notes, prospective investors should specifically ensure that they understand the structure of, and the risk in an investment in, the Notes and should specifically consider the risk factors set out in section "*Risk Factors*" below.

The Issuer and the Guarantor accept responsibility for the information contained in this Base Prospectus and, to the best of their knowledge (having taken all reasonable care to ensure that such is the case) the information contained in the Base Prospectus is in accordance with the facts and does not omit anything likely to affect the import of such information.

No person is or has been authorised by the Issuer, or the Guarantor, to give any information or to make any representation not contained in or not consistent with this Base Prospectus or any other information supplied in connection with the offering of the Notes and, if given or made, such information or representation must not be relied upon as having been authorised by the Issuer.

If the relevant Final Terms in respect of any Notes may include a legend entitled "*Prohibition of Sales to Retail Investors in the European Economic Area*", the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments and amending Directive 2002/92/EC and Directive 2011/61/EU (**MiFID II**); (ii) a customer within the meaning of Directive 2002/92/EC of the European Parliament and of the Council of 9 December 2002 on insurance mediation, where that customer would not qualify as a professional client as defined in Point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Regulation (EU) 2017/1129 of the European Parliament and of the Council of 14 June 2017 on the prospectus to be published when securities are offered to the public or admitted to trading on a regulated market, and repealing Directive 2003/71/EC. If the relevant Final Terms include the above-mentioned legend, no key information document required by Regulation (EU) No. 1286/2014 of the European Parliament and of the Council of 26 November 2014 on key information documents for packaged retail and insurance-based investment products (the **PRIIPs Regulation**) for offering or selling the Notes or otherwise making them available to retail investors in the European Economic Area has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the European Economic Area may be unlawful under the PRIIPs Regulation.

The Final Terms in respect of any Notes will include a legend entitled "MiFID II Product Governance" which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or recommending the Notes (a **Distributor**) should take into consideration the target market assessment; however, a Distributor subject to MiFID II (as amended) is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels. A determination will be made in relation to each issue about whether, for the purpose of the MiFID Product Governance rules under EU Delegated Directive 2017/593 (the **MiFID Product Governance Rules**), any dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the Issuer nor the dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID Product Governance Rules.

Neither this Base Prospectus or its delivery nor any other information supplied in connection with the offering, sale or delivery of the Notes (a) is intended to provide the basis of any credit or other evaluation, or (b) should be considered as a recommendation by the Issuer (or the Guarantor) that any recipient of this Base Prospectus, or the recipient of any other information supplied in connection with the offering, sale, or delivery of the Notes, should purchase any Notes. Each investor contemplating acquiring any Notes should make its own independent investigation of the financial condition and affairs, and its own appraisal of the creditworthiness of the Issuer. Save for the approval of the Base Prospectus by the FMA and save as described herein, neither this Base Prospectus nor any other information supplied in connection with the offering of the Notes constitutes an offer or invitation by or on behalf of the Issuer to any person to subscribe to, or otherwise acquire, any Notes.

Neither the delivery of the Base Prospectus nor the offering, sale or delivery of the Notes shall in any circumstances imply that the information contained herein concerning the Issuer or the Guarantor is correct at any time subsequent to the date hereof or that any other information supplied in connection with the offering of the Notes is correct as of any time subsequent to the date indicated in the document containing the same.

THE NOTES HAVE NOT BEEN AND WILL NOT BE REGISTERED UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED, AND ARE SUBJECT TO U.S. TAX LAW REQUIREMENTS. SUBJECT TO CERTAIN EXCEPTIONS, THE NOTES MAY NOT BE OFFERED, SOLD OR DELIVERED WITHIN THE UNITED STATES OR TO U.S. PERSONS. FOR A FURTHER DESCRIPTION OF CERTAIN RESTRICTIONS ON THE OFFERING AND SALE OF THE NOTES AND ON DISTRIBUTION OF THIS DOCUMENT, SEE SECTION "*SELLING RESTRICTIONS*".

This Base Prospectus does not constitute an offer to sell, or the solicitation of an offer to buy, the Notes in any jurisdiction to any person to whom it is unlawful to make the offer or solicitation in such jurisdiction. The

distribution of this Base Prospectus and the offer or sale or delivery of Notes may be restricted by law in certain jurisdictions. The Issuer and the Guarantor do not represent that this Base Prospectus may be lawfully distributed, or that the Notes may be lawfully offered or sold, in compliance with any applicable registration or other requirements in any such jurisdiction, or pursuant to an exemption available thereunder, or assume any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by the Issuer (or the Guarantor) which is intended to permit an offering to the public or sale of the Notes or the distribution of this Base Prospectus in any jurisdiction where action for that purpose is required. Accordingly, no Notes may be offered or sold, directly or indirectly, and neither this Base Prospectus nor any advertisement or other offering material may be distributed or published in any jurisdiction, except under circumstances that will result in compliance with any applicable laws and regulations. Persons into whose possession this Base Prospectus or any Notes may come must inform themselves about, and observe, any such restrictions on the distribution of this Base Prospectus and the offering and sale of Notes. In particular, there are restrictions on the distribution of this Base Prospectus and the offer or sale of Notes in the United States of America (**United States**) and the European Economic Area including the Public Offer Jurisdictions (please see section "*Selling Restrictions*").

Supplements (if any) to this Base Prospectus will be approved by the FMA and published in accordance with Article 21 of the Prospectus Regulation.

Any websites included in this Base Prospectus are for information purposes only and do not form part of the Base Prospectus.

Forward-looking statements are based on current estimates and assumptions made by the Issuer to the best of its knowledge, and are subject to risks and uncertainties that could cause the actual financial condition and results of operations of E-Stream Energy GmbH & Co to differ materially (in particular to the negative) from those expressed or implied in the forward-looking statements. VI. IDENTIFICATION OF THE TARGET MARKET

With regard to the product governance requirements under (i) Directive 2014/65/EU of the European Parliament and of the Council of 15 June 2014/65/EU, (ii) Articles 9 and 10 of Commission Delegate Regulation (EU) 2017/593 supplementing MiFID II and (iii) local implementing measures (together the **MiFID II requirements**) and rejecting any liability, whether in tort, contract or otherwise which any "manufacturer" (for the purposes of MiFID II requirements) is subject to in relation to the Notes offered, the Notes have been subject to a product release process. As a result, it was determined that the Notes are directed at retail investors, professional clients and eligible counterparties (each as defined in MiFID II) (the **Target Market Determination**) and the Notes are eligible for distribution under MiFID II using all eligible distribution channels. Irrespective of the target market regulation, the market price of the Notes may fall and investors may lose all or part of their invested capital. The Notes offer no guaranteed income and no capital protection. An investment in the Notes is only acceptable to investors who do not require guaranteed income or capital protection, who are able (alone or in conjunction with a suitable financial or other advisor) to evaluate the merits and risks of such an investment and who have sufficient financial resources to compensate for any losses. The target market will be determined without prejudice to any contractual, statutory or regulatory restrictions on the sale of the Notes offered, see section "*Selling Restrictions*". For the avoidance of doubt, the Target Market Definition does not constitute (i) an assessment of suitability or appropriateness (for the purposes of MiFID II) nor (ii) a recommendation to any investor or group of investors to subscribe for the Notes or take any other action with respect to the Notes.

VII. WARNING NOTICE

If specified in the Final Terms, the Notes will provide for a (qualified) subordination clause (*qualifizierte Rangrücktrittserklärung*) and a pre-insolvency enforcement block (*vorinsolvenzliche Durchsetzungssperre*)¹.

On the basis of the Final Terms, the Noteholder undertakes to assert all claims arising from the Notes, in particular claims for payment of interest and repayment of principal (including any other amounts payable under the Notes), for as long as and to the extent that such claims are not asserted, how the partial or complete fulfilment of these claims would lead to over-indebtedness (*Überschuldung*) of the Issuer within the meaning of § 17 German Insolvency Code (*Insolvenzordnung*) or imminent insolvency (*drohende Zahlungsunfähigkeit*) within the meaning of § 18 German Insolvency Code (*Insolvenzordnung*) or insolvency (*Zahlungsunfähigkeit*) within the meaning of § 19 German Insolvency Code (*Insolvenzordnung*) as amended (pre-insolvency enforcement block).

The pre-insolvency enforcement block expressly applies to the period before the opening of possible insolvency proceedings. Consequently, the Noteholder may already not demand fulfilment of existing claims arising from the Notes if the Issuer is over-indebted or insolvent or threatens to become so at the time of the Noteholder's demand for payment.

¹ In the terminology of the court decision of the Federal Court of Justice (BGH) of 6 December 2018 (Reference: IX ZR 143/27). Respective terms may be used differently in the relevant Final Terms but shall have the same legal meaning.

With reference to the above, the pre-insolvency enforcement block can lead to a permanent, indefinite non-performance of the Noteholder's claims.

In the event of insolvency of the assets of the Issuer or the liquidation of the Issuer, the claims arising from the Notes shall rank behind all non-subordinated claims and all subordinated claims within the meaning of section 39 (1) nos. 1 to 5 German Insolvency Code (*Insolvenzordnung*).

This leads first of all to the fact that the Noteholder's claims are not satisfied until the claims of the non-lower-ranking insolvency creditors (see § 38 German Insolvency Code (*Insolvenzordnung*)) have been satisfied. All creditors who at the time of the opening of the insolvency proceedings have a justified claim to assets (here: a claim for payment) against the debtor (here: the Issuer) qualify as insolvency creditors.

In addition, the Noteholder's claims will only be satisfied after the claims of the subordinate insolvency creditors (see § 39 German Insolvency Code (*Insolvenzordnung*)) have been satisfied, provided that distributable insolvency assets still exist. The subordinated claims within the meaning of § 39 (1) German Insolvency Code (*Insolvenzordnung*) are

- (1) the interest and default surcharges on claims of the creditors of the insolvency proceedings which have been running since the opening of the insolvency proceedings;
- (2) the costs incurred by the individual creditors of the insolvency proceedings by their participation in the proceedings;
- (3) fines, administrative fines and periodic penalty payments as well as such incidental consequences of a criminal offence or administrative offence which make it obligatory to pay money;
- (4) claims for free performance by the debtor; and
- (5) under the conditions laid down in paragraphs 4 and 5, claims for repayment of a shareholder's loan or claims arising out of legal acts economically equivalent to such a loan.

The Noteholder may assert claims arising from the Notes, in particular the claim to payment of interest and repayment of the capital, outside of insolvency proceedings of the Issuer only from any (a) future profits, (b) a liquidation surplus or (c) from other free assets of the Issuer.

However, the terms and conditions of the Notes do not include a waiver agreement or a declaration by the Noteholder of a waiver with regard to claims which exist in connection with the Notes in the Noteholder's favour.

In the event of a payment by the Issuer in breach of a payment prohibition, the Issuer is entitled to demand repayment of the amount received from the payee and to take legal action.

RISK FACTORS

Prospective investors in the Notes should ensure that they fully understand the nature of the Notes, as well as the extent of their exposure to risks associated with an investment in the Notes. They should consider the suitability of an investment in the Notes in light of their own particular financial, fiscal and other circumstances. In particular, prospective investors should be aware that the Notes may decline in value and should be prepared to sustain a substantial or total loss of their investment in the Notes and ensure that their acquisition is fully consistent with their financial needs and investment policies, is lawful under the laws of the jurisdiction of their location or incorporation and/or in which they operate, and is a suitable investment for them to make.

The Issuer believes that the following factors may affect its ability to fulfil its obligations under the Notes. All of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring.

In addition, factors which are material for the purpose of assessing the market risks associated with the Notes are described below. The Issuer believes that the factors described below represent the principal risks inherent in investing in the Notes, but the inability of the Issuer to pay principal or other amounts under or in connection with the Notes may occur for other reasons, which may not be or may not have been considered significant risks by the Issuer based on information currently available to it or which it may not currently be able to anticipate. Prospective investors should also read the detailed information set out elsewhere in this Base Prospectus and reach their own views prior to making any investment decision.

I. SPECIAL AND MATERIAL RISK FACTORS RELATING TO THE ISSUER

1. Risks related to the Issuer's financial situation

Risks in connection with a possible insolvency of the Issuer

The Noteholders assume the credit risk of the Issuer. In the case of an insolvency of the Issuer and/or any existing or future subsidiary, the Noteholders may lose part or all of their claims to repayment of their invested capital.

Risks in connection with refinancings

It cannot be ruled out that the Issuer will be dependent on new refinancing for the repayment of the Notes, if necessary by issuing new Notes. If financing required for repayment is not available – for whatever reason – the Issuer may not be in a position to repay the Notes.

Risks in connection with fundraising to cover future capital requirements

The further growth of the Issuer is dependent on successful ongoing financing and the successful raising of capital to cover future capital requirements.

The further development of battery storage technologies and the financing of battery production through to the manufacture of complete battery storage systems involve considerable investment costs. It cannot be excluded that the production cannot be carried out within the planned budget, within the agreed schedule or in accordance with the agreed specifications or that individual producers of round cells or other components prove to be unsuitable. Should the investment costs turn out to be higher than expected, the Issuer's profitability would deteriorate, which could have a negative impact on the Issuer's net assets, financial position and results of operations.

The Issuer expects capital requirements to increase in the coming financial years as a result of the planned commencement of production and activities in the field of research and development. The Issuer may then be dependent on further capital. It cannot be excluded that the Issuer may not be able

to raise additional funds or may not be able to do so on economically justifiable terms. This may result in the Issuer being unable to develop new products, market them or further develop the battery storage systems, which would prevent the planned expansion of its business activities. There is therefore a risk that the Issuer will not be in a position to cover its capital requirements with equity capital or debt capital made available to it at conditions it deems appropriate.

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

Risks in connection with Credit Risks

Noteholders are subject to the risk of partial or total inability of the Issuer to make distribution and/or redemption payments that the Issuer may, subject to the limitations described in the terms and conditions of this Base Prospectus, be obliged to make under the Notes. The worse the creditworthiness of the Issuer, the higher the risk of loss. Prospective investors should note that a materialisation of credit risk with respect to the Issuer may result in the inability of the Issuer to pay interest and/or principal under the Notes.

Risks in connection with Credit Spread Risks

A credit spread is the margin payable by the Issuer to the holder of an instrument as a premium for the assumed credit risk. Factors influencing the credit spread include, among other things, the creditworthiness and rating, if any, of the Issuer, probability of default, recovery rate, remaining term to maturity of the Notes and obligations under any collateralisation or guarantee and declarations as to any preferred payment or subordination. The liquidity situation of the market, the general level of interest rates, overall economic developments, and the currency, in which the relevant obligation is denominated may also have a negative effect.

Noteholders are exposed to the risk that, as the credit spread of the Issuer widens, this may result in a decrease in the price of the Notes.

Risks in connection with the Issuer's limited operating history

The Issuer was incorporated on 2 December 2004 and therefore has a limited operating history that can be evaluated as a basis for the Issuer's potential performance and the ability to achieve its investment objectives. Consequently, the possibility to assess the Issuer's business plan is limited.

Therefore, any investment in the Notes is subject to the uncertainties associated with the business model and any related operational misjudgement may have a direct effect on the ability of the Issuer to meet its obligations in respect of the repayment of principal and interest under the Notes.

In addition, the Issuer is a start-up company with a high-risk business model, which currently generates no revenues but is exclusively active in research and development. It is entirely dependent on the success of new technologies which have not yet been established and for which it is uncertain whether they can generate revenues. Furthermore, it is uncertain whether the planned expansion of business activities, i.e. the production and/or sale of battery cells, battery systems and applications/products in connection with battery systems, such as, but not limited to, in the field of residential and industrial energy storage, mobile energy storages and automotive applications will show the promised success.

Since several years the Issuer has amended its business activities from IT-services and consulting and asset management of own assets to an operational activity in the field of research and development of battery systems and plans to start production. As a start-up company in this field, the Issuer plans to produce the battery systems and applications/products inter alia in Mönchengladbach (rented industrial property) and to sell these products in various markets in addition to the ongoing further development of the technologies. The Issuer is not yet generating any turnover from this new business area of battery

storage systems. For its economic success, the Issuer relies, among other things, on successful research and development activities and the successful acquisition customers for its battery systems and applications/products. It is therefore entirely dependent on the success of unestablished technologies, for which it is uncertain whether these will be accepted on the market and whether these will generate revenues. The future development of the Issuer is therefore difficult to predict. Due to the uncertainties in this context, the Issuer's business model is a high-risk business model. There can be no guarantee that the Issuer will succeed in establishing its new business activities and achieve the desired economic success.

The planned growth depends in particular on the ability of the Issuer to manufacture marketable products, to successfully launch and sell battery cells, battery systems and applications/products on the market and/or to successfully market other products resulting from further research and development activities. Successful marketing requires a development strategy and a market strategy geared to the target markets. If the Issuer does not succeed or does not succeed to a sufficient extent in marketing, or if the strategies applied turn out to be partially or completely wrong, this may have significant negative effects on the activities of the Issuer.

The Issuer's production site in Mönchengladbach is currently being set up. The Issuer cannot draw on its own experience and practice in the production of battery cells, battery systems and applications/products. There is therefore a risk that the Issuer will not be able to produce the battery systems within the planned time frame and at the planned cost, or that it will not be able to produce a certain number of units within a certain period of time. In addition, the expansion of production capacities requires a time lead both for the procurement of the required machines and for the acquisition of the necessary employees.

In the automotive sector, the OEMs (Original Equipment Manufacturers) or system suppliers (also known as Tier 1 and Tier 2 suppliers) can be considered as buyers. In the area of charging systems, both the manufacturers of charging systems and the operators of charging infrastructures can be considered as purchasers. In the field of energy storage systems, the manufacturers of such systems are eligible as purchasers in sub-areas of house storage systems, industrial storage systems, "island" systems (network-independent systems) and the new market segment of transportable energy storage systems (e.g. network-independent systems on construction sites, etc.), wholesalers and retailers and, where applicable, end customers.

If the Issuer does not succeed in marketing the respective products, or does not succeed in marketing them sufficiently, and/or if the costs of implementing the strategy are higher than those forecast by the Issuer, this may have a material adverse effect on the business activities of the Issuer.

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

Risks in connection with the impact of a downgraded credit rating

The value of the Notes may be affected by investors' general appraisal of the Issuer's creditworthiness. Such perceptions may be influenced by any credit ratings which may, in the future, be assigned to the Issuer or any company which may form part of its group. A rating is, broadly, the opinion of a rating agency on the credit standing of an issuer, i.e., a forecast or an indicator of a possible credit loss due to insolvency, delay in payment or incomplete payment to the investors. It is not a recommendation to buy, sell or hold securities.

A rating agency may, in particular, suspend, downgrade or withdraw a rating. A rating may also be suspended or withdrawn if an issuer of notes were to terminate the agreement with the relevant rating agency or to determine that it would not be in its interest to continue to supply financial data to a rating agency. A downgrading of the rating may lead to a restriction of access to funds and, consequently, to higher refinancing costs. A rating could also be negatively affected by the soundness or perceived

soundness of other institutions operating within the same sector as the Issuer or any company which may form part of its group.

Any downgrade of a credit rating which may, in the future, be assigned to the Issuer and/or any company which may form part of its group could have a material adverse effect on the liquidity and competitive position of the Issuer, undermine confidence therein, increase its borrowing costs, limit its access to funding and capital markets and/or limit the range of counterparties willing to enter into transactions with the Issuer and may, as a consequence, have a material adverse effect on the Issuer's business, financial condition and results of operations.

Risks in connection with the dependency on certain persons

Mr Kraemer is a direct limited shareholder and, via Timberland Securities Investment plc, an indirect limited shareholder and managing director of the general partner. Mr Kraemer is the sole shareholder of the general partner and thus may exert influence on the Issuer.

Hence, the Issuer is heavily dependent on its (direct and indirect) limited partner shareholder and managing director of the general partner, due to the controlling influence of this limited partner shareholder, the financing previously significant by this shareholder and its participation in various Timberland related companies including Timberland Securities Investment plc (inter alia refinancing risks).

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

Risks in connection with the integration of potential future acquisitions

The Issuer may in the future seek to make one or more acquisitions to support its business objectives and complement the development of its business in existing and new geographic markets. Such strategic transaction(s) would, if pursued, demand significant management attention and will require the Issuer to divert financial and other resources that would otherwise be available for its existing business. Furthermore, prospective investors should note that the benefits of potential future acquisitions may take longer to realise than expected and may not be realised fully, or at all, there can be no assurance that the Issuer will be able to successfully pursue and complete the acquisition of any future target(s), and there can be no assurance that the Issuer will be able to identify all actual and potential liabilities to which any target company is exposed prior to the acquisition thereof.

Any of these factors could, in the event that an acquisition is pursued, lead to unexpected losses for the Issuer which may have a material adverse effect on the Issuer's business, financial condition and results of operations.

2. Risks related to the Issuer's business activities and industry

Risks in connection with the fact that the Issuer is exposed to the credit risk of its customers, suppliers and dealers

The Issuer intends to conduct transactions (sales) with customers, suppliers and dealers as part of its business activities. There is a risk that one or more of these counterparties may become insolvent and be unable to meet their obligations to the Issuer. In particular, if one of the Issuer's principal clients becomes insolvent or in financial difficulty, the Issuer may not be able to collect any outstanding debt and may be required to write off the debt. Significant or recurring delays in receiving payments or defaults could have a material adverse effect on the Issuer.

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

Risks in connection with the intended change of the legal structure from a Limited Liability Partnership (GmbH & Co KG) into a partnership limited by shares (Kommanditaktiengesellschaft)

The Issuer intends to change its legal form into a company limited by shares (*Kommanditgesellschaft auf Aktien* (hereinafter also referred to as "**KGaA**")) which is a mixed form of limited partnership and stock corporation. In addition to a personally liable shareholder (general partner), who manages the Issuer's business as a so-called "born" business body, i.e. on a permanent basis and not for a specific period of time, the limited liability shareholders participate in the Issuer in a similar way to the shareholders of a stock corporation. The personally liable partner of the Issuer is E-Stream Management GmbH with its office in Krefeld (hereinafter also referred to as the "**General Partner**"). Mr Kraemer holds 100% of the shares in the General Partner.

This may have an impact on the Issuer in regard to tax due to but not limited to the German conversion tax law ("*Umwandlungssteuerrecht*"), organizational structure, conversion costs, costs and further risks due to the issuing shares and/or mandatory convertible bonds (*Pflichtwandelanleihen*) and compliance costs and risk in connection with the intended legal form.

Risks in connection with the Issuer's business model

The Issuer's business model depends on the competitiveness of its battery storage systems and technologies.

It cannot be excluded that there may be competitors on the market who offer services similar to those of the Issuer and who are able to acquire customers and generate profits faster and more successfully with cheaper and/or better offers than the Issuer. This could lead to the Issuer's failure to plan, which could have an adverse effect on its business, assets, liabilities, financial position and profit or loss.

There is also a risk that the battery storage systems and/or technologies may not be competitive. The battery storage system and technologies are in global competition with similar or comparable products or technologies from other manufacturers. Due to changes in customer requirements, the continuous introduction of new products to the market and/or constantly evolving product standards, the Issuer's battery storage systems and/or technologies may become obsolete, unattractive to customers or otherwise uncompetitive. This intense competition could result in lower profit margins, lower revenues and a lower market share. If the Issuer does not succeed in asserting itself in this environment and in developing sufficient economic projects, this could have a significant negative impact on the success of its business activities.

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

Risks in connection with the Issuer's research and development activities

The Issuer's business success depends on its successful research and development of packaging solutions for battery systems.

The planned establishment and expansion of the Issuer's business activities requires the successful research and development of packaging solutions for battery systems on the basis of lithium-ion cells with the aim of continuously further developing the battery storage systems and the underlying technologies. The Issuer designs and develops energy storage systems (battery systems) as modules and as finished applications for both mobile and stationary applications (home and industrial storage). The Issuer intends to improve and further develop these technologies and produce its own battery packages and products.

The corresponding production of battery systems suitable for everyday use for various fields of application requires the continuous further development of technologies and its adaptation to the

specific requirements of the respective application. There is a risk that the Issuer will not succeed in correctly identifying the respective requirements in the aforementioned business segments and in adapting the respective product to them as part of the development, such as that the Issuer may not be able to market its products appropriately and find buyers for its products.

It is in the nature of research and development projects that approaches pursued may prove impracticable, ineffective or economically uninteresting. In this respect, it cannot be ruled out that individual or several development projects may not be recognized as a result, and that the time and financial expenditure for the research and development project in question may thus be useless.

Furthermore, there is a risk that certification of the Issuers battery packs and the Issuers products containing battery packs in accordance with existing or future standards will not be achieved to the intended extent and/or within the intended timeframe and insofar the distribution of such battery packs and products cannot be achieved to the intended extent and/or within the intended timeframe, which would have an effect in no, limited or time wise later turnover and income/profit of the Issuer.

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

Risks in connection with the dependency on key personnel, internal personnel and recognized structures, in particular through planned growth

The operations of the Issuer are dependent on the abilities of the members of its Board of Directors. If one or more of such persons are unable or unwilling to continue in their present position, the Issuer might not be able to replace them within a short term and this could affect the profitability of the Issuer's operations.

The planned expansion of the Issuer's business activities requires the (further) development of appropriate internal organisational, risk monitoring and management structures in line with growth, which enable undesirable developments and risks to be identified at an early stage. This is particularly true here, as the research and development activities were only started approximately three years before the date of the Base Prospectus and production is not scheduled to start until the second half of 2019 at the earliest. In addition, the Issuer has recently been converted into a partnership limited by shares (*Kommanditgesellschaft auf Aktien*), as follows that the management does not yet have any experience with the legal structures of a German partnership limited by shares. In the past, the internal organisation was not carried out in all areas in the way that would have been necessary in a partnership limited by shares. In addition, the workforce is to be significantly expanded and entire departments or structures below the complementary level are to be established for the first time. In addition to building up the know-how required to expand the business in the Issuer below the general partner level, this also includes hiring various highly qualified employees. The expansion of business operations and of the internal and external organization entail, among other things, financial and personnel expenses. Should gaps or deficiencies in the existing risk monitoring and management system become apparent in ongoing practice, or should management be unable to create appropriate structures and systems in a timely manner in connection with the planned further growth and to implement the pending increases in personnel by recruiting appropriately qualified employees in a timely manner and without unforeseen difficulties, this could lead to restrictions in the ability to identify and control risks, trends and undesirable developments in a timely manner.

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

Risks in connection with the supply industry and the availability of raw materials and intermediate products

The Issuer is dependent on the supply industry and the availability of raw materials and intermediate products; if the Issuer is unable to purchase battery cells and other components in sufficient quantities and at marketable conditions, this could lead to production stoppages and/or price increases.

The further growth of the Issuer also depends on its ability to procure the battery cells and other components of the battery packages required for the production of the battery systems in appropriate quantities and at reasonable prices. In order to ensure the supply of battery cells and other components in sufficient quantities at reasonable prices, the Issuer could also be forced to enter into cooperation or purchasing associations with other (possibly also competing) battery and battery package manufacturers.

Due to a possible excess demand for battery cells or other raw materials, the Issuer may also be unable to procure materials of the desired quality from other suppliers or only to procure them to the required extent at inappropriate conditions.

If one of the suppliers fails to meet its delivery obligations (e.g. due to insolvency or for other reasons) or fails to do so on time, and if the Issuer is unable to procure replacements elsewhere in good time, delays may occur in production and sale of battery systems, which may lead to production losses and thus to loss of earnings as well as possible contractual penalties or claims for damages, and in individual cases also to rights of withdrawal on the part of the Issuer's customers.

In addition, the prices to be paid for raw materials and intermediate products are subject to strong fluctuations in some cases, which may lead to an increase in the Issuer's purchase costs. Such price increases may have a negative impact on the Issuer's profitability.

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

Risks in connection with sales problems relating to e-vehicles and e-mobility applications as well as stationary energy storage systems in the market

It is currently impossible to assess whether and how quickly the energy revolution and the resulting phase-out of energy generation from fossil fuels and nuclear power can be realized, and whether and how quickly e-mobility will develop further or even gain acceptance, and whether manufacturers will possibly switch to other drives or optimize existing drives. As a result, the Issuer's future business plans may prove unrealistic in whole or in part and not only may the planned turnover and earnings not be achieved, but investments may prove to be erroneous and loss-making.

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

Risks in connection with technical developments in the sector and industry the Issuer is active

The Issuer is subject to technology risks that new technologies devalue the development work performed by the Issuer and that the battery storage systems will no longer correspond to the current state of the art in the future.

The market for battery storage systems is subject to constant and dynamic changes. There is a risk that new technologies will devalue the development work carried out by the Issuer and that the battery storage systems will no longer be state-of-the-art in the future. As a result, the use of battery storage systems may become uneconomical for the user/customer and marketing may no longer be possible or not possible to the intended extent. Adaptations to technological developments can be very cost-intensive or even impossible. Nor can it be ruled out that future technical problems may arise with the battery storage systems and/or the technologies of the associated companies, which are not foreseeable at the time this Base Prospectus is drawn up, so that the performance of the battery storage systems

will be reduced in comparison with the market and competitors, if necessary significantly or even to zero.

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

The Issuer is exposed to the risk of violating its business and trade secrets as well as its technologies and know-how

In addition to any as applicable rights applied for and thus protected or to be protected (such as but not limited to intellectual property rights), the Issuer also relies on certain technologies, know-how and trade secrets that cannot be protected by intellectual property rights. Therefore, there is a risk that third parties, in particular competitors, may copy or independently develop these technologies and know-how and later question their use by the Issuer. In addition, employees regularly have access to relevant proprietary information that may or may not be protected by intellectual property rights. These employees could leave the Issuer to work for competitors. Although the Issuer implements and trusts confidentiality agreements and technical precautions to protect its technologies, know-how and other sensitive information, there can be no assurance that such agreements and precautions will provide adequate protection against unauthorized access or use by third parties or against misappropriation or disclosure of such information. Protection against unauthorized use or access, misappropriation or disclosure of technologies, know-how and other proprietary information, including but not limited to the Issuer's trade secrets and trade secrets, may result in protracted and costly litigation or administrative proceedings and may cause substantial disruption to business operations and tie up resources otherwise required.

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

Risks in connection with third parties involved

The Issuer is party to contracts with a number of third parties who have agreed to perform several services in relation to the Notes. If any such third party fails to perform its obligations under any relevant agreement, Noteholders may be adversely affected.

Risks in connection with the fact that the business success of the Issuer depends on the acceptance of the markets for e-mobility and for transportable and stationary energy storage systems

The Issuer's business activities focus on the market for e-mobility and the market for transportable and stationary energy storage systems. The market segments are increasingly attracting public attention and are referred to as future technologies, which is also the subject of critical observation by users and consumers. The market acceptance and hence the commercial success of the Issuer's battery storage systems depends on the demonstration of the effectiveness of the technologies, its safety and cost-effectiveness, the complexity of the production and successful certification aimed at the core markets. In addition, market acceptance depends on public opinion on the market for e-mobility and battery storage systems in general and on the battery storage systems of the Issuer in particular. In this respect, it cannot be excluded that the Issuer and/or competitors may launch products on the market that cause damage to other legal interests and that the reputation of the entire market segment and thus also that of the Issuer may suffer as a result. If the Issuer's technologies and/or battery storage systems are not sufficiently accepted by the market, this may have a material adverse effect on the business activities and their success.

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

Risks in connection with the fact that the Issuer's business success depends on the future development of electro mobility (especially in the automotive sector) and/or portable and stationary energy storage systems

The battery storage system of the Issuer is designed for all applications where high power and energy density and/or simple assembly and disassembly are required. These are primarily the area of e-mobility within the automotive sector and the market for transportable and stationary energy storage systems.

If the automotive sector does not develop as planned in the area of e-mobility and/or the area of transportable and/or stationary energy storage systems and/or if car manufacturers and/or other manufacturers in the area of e-mobility and/or buyers in the area of transportable and/or stationary energy storage systems may switch to other drive types or technologies or optimise existing drive types or technologies, this may result in the Issuer's plans turning out to be unrealistic. This in turn may have material adverse effects on the Issuer's business. The Issuer's success depends on the economic development of battery storage systems and technologies. An unfavourable development can have a negative effect on the business activities and/or the net assets, financial position and results of operations of the Issuer.

If, in particular, the issue of electro mobility does not remain an essential part of the mobility policy of industry and the public sector in the future, the awarding of contracts by industry and the public sector could suffer considerably. Furthermore, if the energy turnaround currently being driven by the German Federal Government and the resulting expected increase in demand for decentralised or local energy storage systems and/or corresponding developments in other countries (above all in Europe, the U.S.A., China, etc.) and/or on an international level should not materialise in the manner expected, this would lead to a reduction in sales and earnings, which in turn could have a material adverse effect on the Issuer's business activities and/or its net assets, financial position and results of operations.

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

3. Legal and regulatory risks

Risks in connection with copyright and patent procedures and possible copyright infringements by third-parties

The Issuer may not be able to register patents or utility models of the battery storage systems and technologies on which the Issuer's business is or may be inter alia based in the future, or to protect

The Issuer may not be able to register patents or utility models of systems/applications and technologies on which the Issuer's business is or may be inter alia based in the future, or to protect other intellectual property rights of the Issuer.

It cannot be excluded that the systems/applications will not be in conflict with rights of third parties.

Furthermore, it cannot be excluded that the systems/applications can be copied despite existing protection rights. Competitors could infringe patents and/or industrial property rights. In addition, they could use technologies that function essentially like the systems/applications of the Issuer without infringing patent and industrial property rights. If licensors are not able to effectively prevent the imitation of its products, this could endanger the competitiveness of the systems/applications and technologies.

If the systems/applications and technologies cannot be registered as patents or utility models and other intellectual property rights cannot be adequately protected, this could have a material adverse effect

on the business because competitors could copy and use the Issuer's systems/applications and/or technologies without the Issuer being able to take legal action against them.

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

Risks in connection with potential patent and property infringements and corresponding assertion of claims as well as patent litigation proceedings

Patent and property right infringements could lead to the assertion of claims by third parties and endanger the legal status of property rights.

It cannot be ruled out that patents and industrial property rights of third parties which have not been recognized as such by the Issuer may lead to claims against the Issuer as patent and utility model owner and/or against licensors to the Issuer or the Issuer as patent and utility model user. The assertion of patent and property right infringements as well as the assertion of claims for damages can endanger the legal existence of property rights, if any in connection with systems/applications and/or technologies.

The mere allegation that infringe the intellectual property rights of third parties could cause economic damage to the Issuer due to the important role that intellectual property rights play in technology sectors. All these risks can have a lasting negative impact on the Issuer's net assets, financial position and results of operations.

Litigation to confirm or enforce patent rights or patent usage rights to enforce payment claims against third parties based on patent infringements or to defend against alleged patent infringements can result in considerable costs and tie up personnel resources in addition to financial burdens.

Should licensors to the Issuer and/or the Issuer lose a legal dispute regarding industrial property rights, it cannot be ruled out that the Issuer and/or Licensors to the Issuer will not lose the relevant patent protection. It may then no longer be able to prevent the use of one or more systems/applications or the technology/technologies, in whole or in part, which may result in significant competitive disadvantages for the Issuer, whose business may be based inter alia on the technologies and patents. In addition, the negative outcome of such proceedings may result in third parties being able to use the systems/applications and/or the technology without payment to the respective patent and utility model users.

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

Risks in connection with laws and regulations, especially due to potential future business and/or subsidiaries and/or joint ventures and/or other form of cooperations

The Issuer and/or a future subsidiary and/or joint venture and/or other form of cooperation may engage in the financing, leasing and or rental sales (*Mietkauf*) of battery cells, battery packs, battery systems, electric cars and other products and services.

Such activities may have an impact on the regulatory treatment of the Issuer and/or a future subsidiary, joint venture or other form of cooperation, for instance in case the Issuer would set up a subsidiary, joint venture or other form of cooperation with the aim to increase distribution of its product and service – for instance via a financing, leasing and or rental sales company. Such a financing and/or leasing and/or rental sales company might be regulated under EU-laws or national laws for financial services.

In response to the global financial crisis, a number of regulatory initiatives have been (and are currently being) implemented, adopted, or developed, which could, if deemed applicable to the Issuer and/or a future subsidiary and/or joint venture and/or other form of cooperation, have a negative impact on the Issuer and its operations.

The Issuer may itself or by way of subsidiary enter into financing, leasing, rental sales agreements (*Mietkauf*) and/or other forms in connection with the financing of customers in connection with its products, which may incur that the Issuer itself, its subsidiary and/or as a group might get subject to before mentioned laws and regulations.

Risks in connection with new governmental or regulatory requirements

New governmental or regulatory requirements and changes in perceived levels of adequate capitalisation and leverage could potentially subject the Issuer to increased capital requirements or standards and require it to obtain additional capital or liquidity in the future.

Changes in Recognition of Own Funds

Due to regulatory changes, certain existing capital instruments which may be issued by the Issuer in the future may be subject to (gradual) exclusion from own funds or reclassification as a lower category form of own funds.

Changes in CET 1 Criteria

In the course of the global financial crisis, the rules on own funds have come under scrutiny by legislators, regulators and advisory bodies (e.g. the BCBS). In the event that the Issuer were deemed to fall within the remit of the CRD IV/CRR regime, legislative or regulatory changes in the current definitions of what is deemed to qualify as CET 1 capital could reduce the Issuer's CET 1-ratio or otherwise reduce the (eligible) own funds on an individual or a consolidated basis. There can be no assurance that any further changes of the applicable rules as aforesaid, adequate grandfathering or transition periods will be implemented to allow the Issuer, if it were deemed to fall within the remit of the CRD IV/CRR regime, to repay or replace such derecognised CET 1 or other own funds instruments in a timely fashion or on favourable terms. In such case, the Issuer may need to obtain additional own funds or other eligible capital in the future, and such funds, whether in the form of ordinary shares or other capital, may not be available on attractive terms, or at all.

Consolidation

If the Issuer were deemed to fall within the remit of the CRD IV/CRR regime, then, in addition to potentially complying with capital requirements on an unconsolidated basis, the Issuer itself or group related entities may also be subject to capital requirements on a consolidated basis. Furthermore, any future shareholders of the Issuer which are subject to local supervision in their country of incorporation may, on an individual and on a consolidated basis, be required to comply with applicable local regulatory capital requirements. It is therefore possible that individual entities which may form part of the group of the Issuer may require more own funds, even though the own funds of the Issuer on a consolidated basis are sufficient.

Stricter and Changing Accounting Standards

Prospective changes in accounting standards as well as those imposing stricter or more extensive requirements for assets to be carried at fair value could also impact Issuer's capital needs.

Other Initiatives

Additionally, stricter and/or new regulatory requirements may be adopted in the future, and the existing regulatory environment in many markets in which the Issuer operates (or may operate in future) continues to develop and change, including, for example, the Banking Union within the EU. The substance and scope of any such (new or amended) laws and regulations as well as the manner in which they are (or will be) adopted, enforced or interpreted may increase the Issuer's financing costs and could have an adverse effect on the Issuer's business, financial condition, results of operations and prospects.

Impact

In the event that any one or more of the foregoing matters mentioned in this risk factor were to apply to the Issuer and/or to any member which may form part of its group, this could have a negative impact on the business of the Issuer, the products and services it offers as well as the value of its assets, and may require the Issuer to change the manner in which it conducts its business.

Risks in connection with certain tax related circumstances

The Issuer is subject to certain tax risks.

The development of current tax law is subject to constant change – also in its administrative application. The tax information presented here therefore reflects the current legal situation, current case law, published views of the tax authorities as well as the comments made by the tax literature on the date of the Base Prospectus. Future changes in the law, differing interpretations of the law by tax authorities and courts cannot be ruled out.

The tax burden of the Issuer could increase in particular as a result of future tax audits, new assessments by the competent authorities and possible changes to the applicable tax laws and regulations. The registered office of the Issuer is currently located in Germany. From time to time, however, it is subject to routine tax audits by tax authorities in the countries in which it operates. Future tax audits may lead to additional taxes. In addition, the tax authorities may not be able to accept the deductibility of some interest in the context of the cap or transfer pricing rules. In this case, tax arrears may be incurred during tax audits or as part of the normal taxation process (through tax assessment notices). In addition, changes to the tax regulations are possible. The interpretation of tax laws by courts or tax authorities (including courts or tax authorities in foreign jurisdictions in which the Issuer may operate in the future) may also have a material adverse effect on the business of the Issuer. Any further tax or interest payments resulting from such tax audits or other decisions of the relevant tax authorities could have a material adverse effect on the Issuer's business, financial condition, results of operations and prospects.

The future development of the Issuer's assets, financial and profit position, inter alia, depends – among other circumstances – on the tax framework applicable to it. Every future change in legislation, relevant decision of the competent fiscal courts and/or the tax authorities' administrative practice may have a negative impact on the Issuer's business.

Any of the aforementioned circumstances could have an adverse effect on the Issuer's net assets, financial position and results of operations.

Risks in connection with the United Kingdom in regard to the termination of EU-Membership

In 2016, the United Kingdom has voted in a referendum to leave the EU, commonly referred to as Brexit. The political, economic and legal consequences of Brexit (especially with respect to a so-called hard Brexit) are not yet known or foreseeable and there may be increased volatility in the financial markets. Thus, the aforementioned referendum may have a negative impact on both the economies of the countries in which the Issuer currently operates and with respect to the financial industry as a whole. Furthermore, prospective investors should note that the UK's exit from the EU could limit market access for the sale and distribution of financial products therein.

4. Internal control risks

Risks in connection with internal risk management processes

The Issuer's risk management techniques and strategies may in the future not be fully effective in mitigating the Issuer's risk exposure in all economic market environments or against all types of risks, including risks that the Issuer may fail to identify or anticipate. Furthermore, audits or other regular reviews of the risk management procedures and methods may, in the future, detect weaknesses or deficiencies in the Issuer's risk management systems. In the event that the Issuer's risk management systems fail to identify, anticipate or correctly evaluate risks to which the Issuer may be exposed, the Issuer may experience material unanticipated losses, which could have an adverse effect on its business, financial condition and operational results.

Risks in connection with operational risk

The Issuer is exposed to operational risk, which is the risk of loss resulting from inadequate or failed internal processes, human errors, malfunctioning systems or from external events, including in particular legal, regulatory and compliance risk. The Issuer is also susceptible to, among other things, operational errors, clerical or record-keeping errors and errors resulting from faulty computer or telecommunications systems.

Any inadequacy of the Issuer's internal processes or systems in detecting or containing such risks as aforesaid could have a material adverse effect on Issuer's business, financial condition, operation results and prospects.

II. SPECIAL AND MATERIAL RISK FACTORS RELATING TO THE NOTES

All recipients of this Base Prospectus and prospective investors are urged to consult an investment advisor as to the suitability or otherwise of an investment in any of the Notes before making an investment decision. An informed investment decision can only be made by investors after they have read and fully understood this Base Prospectus, and, in particular, the Terms and Conditions, the risk factors associated with an investment in the Notes, the risk factors associated with the markets generally, and the inherent risks associated with the Issuer's business. In the event that an investor in the Notes does not seek professional advice and/or does not read and fully understand the provisions of this Base Prospectus, there is a risk that such investor may acquire an investment which is not suitable for his or her risk profile.

Each potential investor in any Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained in, or incorporated by reference into, this Base Prospectus or any supplement thereto;
- have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;
- have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes where the currency for principal payments is different from the potential investor's currency;
- understand fully the respective Terms and Conditions of the Notes and be familiar with the behaviour of any relevant indices and financial markets; and

- be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

The Notes may be complex financial instruments. Investors generally do not purchase complex financial instruments as stand-alone investments. They purchase complex financial instruments as a way to reduce risk or enhance yield with an appropriate addition of risk to their overall portfolios. A potential investor should not invest in the Notes unless it has the expertise (either alone or with a financial adviser) to evaluate how the Notes will perform under changing conditions, the resulting effects on the value of the Notes and the impact this investment will have on the potential investor's overall investment portfolio.

1. Risks related to the nature of the Notes

Substitution of the Issuer and/or the Guarantor (as applicable) and the Successor Issuer (as applicable) and the Successor Guarantor (as applicable)

The Terms and Conditions may contain provisions for the substitution of another company as principal debtor (including, as applicable, a subsequent substitution of the debtor) and in case of guaranteed Notes the Guarantor (including, as applicable, a subsequent substitution of the Guarantor(s)) under the Notes in place of the Issuer. The amounts which Noteholders should receive in respect of the Notes may be affected in the event that the Issuer and/or Guarantor substitutes another company for itself as issuer of the Notes under the Terms and Conditions.

Risk due to the pre-insolvency enforcement block.

A pre-insolvency enforcement block (*vorinsolvenzlichen Durchsetzungssperre*) applies to all payment claims of the Noteholders. All claims arising from the Notes, in particular the Noteholder's claims for payment of interest and repayment of principal (including any other amounts payable under the Notes), may be asserted as long as and to the extent that the partial or complete satisfaction of such claims would lead to the issuer being overindebted within the meaning of § 17 German Insolvency Code (*Insolvenzordnung*) or threatened insolvency within the meaning of § 18 German Insolvency Code (*Insolvenzordnung*) or insolvency within the meaning of § 19 German Insolvency Code (*Insolvenzordnung*) as amended (pre-insolvency enforcement block). The pre-insolvency enforcement block therefore already applies to the period before the opening of insolvency proceedings. The Noteholder may therefore not demand fulfilment of his claims arising from the Notes if the Issuer is over-indebted or insolvent or threatens to become so at the time of the Noteholder's demand for payment. In this respect, the pre-insolvency enforcement block can lead to a permanent, unlimited non-fulfilment of the Noteholder's claims.

Risk due to the ranking of investors' claims.

Noteholders may not demand that the issuer give priority to their interest and repayment claims over other claims of third parties. This also applies insofar as these other claims have the same priority as the claims of investors. In the event of the liquidation of the Issuer, the subordinated claims shall rank behind all non-subordinated claims and all subordinated claims within the meaning of § 39 (1) Nos. 1 to 5 German Insolvency Code (*Insolvenzordnung*). This can lead to a complete loss of the invested capital on the part of the Noteholder. If insolvency proceedings are opened against the Issuer's assets, the Noteholder may assert claims (interest, repayment of the capital and all other amounts payable under the Notes) against the insolvency administrator only as a subordinated insolvency creditor. Payments to the Noteholder from the insolvency estate shall only be made when all claims of the Noteholder, in particular the non-subordinated claims and all subordinated claims within the meaning of § 39 (1) Nos. 1 to 5 German Insolvency Code (*Insolvenzordnung*), have been satisfied in full. The amount of the actual payments thus depends on the amount of the insolvency estate. If the insolvency estate is insufficient to make payments on subordinated claims in the insolvency proceedings, this would result in the Noteholder's complete loss of the capital invested.

Subordinated Notes

The contingent capital Notes constitute direct, unsecured and subordinated obligations of the Issuer, and would, if the Issuer was subject to CRR, constitute Tier 2 instruments.

In the event of insolvency or liquidation of the Issuer, if the Issuer was subject to CRR, the obligations of the Issuer under the Notes would rank (i) junior to all present or future unsubordinated instruments or obligations of the Issuer, (ii) pari passu (a) among themselves and (b) with all present or future obligations under any other Tier 2 instruments, and (iii) senior to all present or future (a) obligations under any AT 1 instruments and (b) all other subordinated instruments or obligations of the Issuer ranking or expressed to rank (x) subordinated to the obligations of the Issuer under the Notes or (y) pari passu with obligations under any AT 1 instruments.

Subordination means that the rights and claims of the Noteholders in respect of the payment of capital and interest on the Notes will, in the event of dissolution and winding-up of the Issuer, rank after the claims of all senior indebtedness and will not be repaid until all other senior indebtedness outstanding at the time has been settled. Accordingly, there is a substantial risk that investors who/which invest in subordinated notes (such as these Notes) will lose all or some of their investment in case the Issuer become insolvent, or should the Issuer have insufficient profit to write up the Notes following a write-down.

Write-down

Under the Terms and Conditions of the contingent capital Notes, if the Issuer incurs an annual balance sheet loss this would trigger a write-down under the Notes.

Noteholders may lose all or some of their investment as a result of a write-down, unless, following such write-down, the Notes are subsequently written up. Prospective investors should note that, due to the uncertainty regarding a potential write-down event under the Notes, the trading behaviour of the Notes may not necessarily follow the trading behaviour of other types of subordinated instruments. Any indication that the Issuer may incur an annual balance sheet loss may have an adverse effect on the market price and liquidity of the Notes. Under such circumstances, investors may not be able to sell their Notes easily or at prices that will provide them with a yield comparable to more conventional investments.

No limit to the amount of debt to be incurred by the Issuer in the future

There is no restriction on the amount of debt that the Issuer may borrow on an equal footing or with priority with the Notes. Any assumption of additional liabilities by the Issuer which are not subordinated to the Notes increases the debt of the Issuer and may reduce the amount that the Noteholders of the Notes will receive on their claims in the event of the liquidation or insolvency of the Issuer.

Meetings of Noteholders

In the event that the Issuer wishes to amend the Terms and Conditions of the Notes, unless it is only an editorial change, it shall call a meeting of Noteholders for approval. Defined majorities of Noteholders may bind all Noteholders including those that did not attend and vote at the relevant meeting and Noteholders who attended and voted in a manner contrary to the majority.

The majority of the bondholders represented at a creditors' meeting may pass adverse resolutions for all investors; the bondholders' rights of termination are excluded in certain cases prior to creditors' meetings.

The Terms and Conditions provide that bondholders may adopt certain measures, in particular amendments to the Terms and Conditions, by a majority vote binding on all bondholders. The resolutions are also binding on creditors who did not participate in the adoption of the resolution or voted against it. Meetings of bondholders may be quorate (if it is a second meeting) if only one bondholder is represented or, in respect of resolutions requiring a qualified majority, if at least 25% of bondholders are represented. A bondholder is therefore subject to the risk that he is bound by resolutions to which he has not consented and may thereby lose rights from the mandatory convertible bonds against his will.

The terms and conditions of the bonds provide for the exclusion of the bondholders' right to redeem the bonds due to a breach of the bond terms and/or a deterioration in the issuer's financial circumstances if a meeting of the bondholders has been convened in connection with this right to redeem the bonds. This means that in a situation in which bondholders wish to exercise their right to call their bonds particularly urgently, for example because the issuer's economic situation is negative, the right to call the bond cannot exist.

Changes in interest rates

Investment in the Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Notes. A Noteholder is exposed to the risk that the price of such Note falls as a result of changes in the market rate of interest. While the rate of interest of a fixed rate note is fixed during the life of such Note, the current rate of interest in the capital markets (so-called market rate of interest) typically changes on a daily basis. As the market rate of interest changes, the price of a fixed rate note also changes, but in the opposite direction. If the market rate of interest increases, the price of a fixed rate note typically falls, until the yield of such Note is approximately equal to the market rate of interest. If the market rate of interest falls, the price of a fixed rate note typically increases, until the yield of such Note is approximately equal to the market rate of interest. If the Noteholder of a fixed rate note holds such Note until maturity, changes in the market rate of interest are without relevance to such Noteholder as the Note will be redeemed at the principal amount of such Note.

Currency risk

A Noteholder denominated in a foreign currency is exposed to the risk of changes in currency exchange rates which may affect the yield of such Notes. Changes in currency exchange rates result from various factors such as macro-economic factors, speculative transactions and interventions by central banks. A change in the value of any currency other than euro against the euro, for example, will result in a corresponding change in the euro value of a Note denominated in a currency other than euro and the euro value of interest and principal payments, if any, made in accordance with the terms of such Note. If the underlying exchange rate falls and the value of the euro correspondingly rises, the price of the Note and the value of interest and principal payments, if any, made thereunder expressed in euro falls.

Taxation and FATCA

Distribution payments on Notes, or profits realized by a Noteholder upon the sale or repayment of Notes, may be subject to taxation in the Noteholder's home jurisdiction or in other jurisdictions in which the Noteholder is required to pay taxes. The amount of taxation so payable is therefore subject to changes in tax law and to potential changes in their practical application (both of which may change to the disadvantage of investors).

Besides the above, risks may occur in connection with the FATCA regime. Sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986 (the **Code**), an agreement entered into with the U.S. Internal Revenue Service pursuant to such sections of the Code, or an intergovernmental agreement between the United States and another jurisdiction in furtherance of such sections of the Code (including any non-US laws implementing such an intergovernmental agreement) (collectively

referred to as **FATCA**) impose a new reporting regime and, potentially, a thirty per cent withholding tax with respect to (i) certain payments from sources within the United States (ii) so-called 'foreign pass-thru payments' made to certain non-US financial institutions that do not comply with this new reporting regime, and (iii) payments to certain investors that do not provide identification information with respect to interests issued by a participating non-US financial institution.

The Issuer may be classified as a non-US financial institution for these purposes. If the Issuer becomes subject to withholding tax as a result, the monetary return of Noteholders may be affected. To the extent the Issuer suffers US withholding tax as a result of FATCA, the Issuer may take any action in relation to a Noteholder's investment to ensure that such withholding is economically borne by the relevant Noteholder whose failure to provide the necessary information or to become a participating FFI (i.e., foreign financial institution) gave rise to the withholding.

Unfavorable development of market prices

The market price of the Notes depends on various factors, such as changes in interest rate levels, the policies of central banks, overall economic developments, inflation rates, or the lack of, or excess demand for, the Notes.

Noteholders are therefore exposed to the risk that the market price of the Notes will drop as a result of unfavourable market developments, which risk would materialise in the event that Noteholders were to sell the Notes before the relevant maturity date, if applicable. Noteholders should be aware that if they acquire Notes at a price which is higher than the market price at issue and/or the redemption amount, the impact which unfavourable market developments may have on the Notes would be heightened.

The market price for bonds could fall as a result of changes in the market interest rate.

The mandatory convertible bonds bear fixed interest until redemption. If the market interest rate on the capital market changes, the market price for securities already issued with a fixed interest rate typically changes in the opposite direction. This means that if the market interest rate rises, the price of the fixed-interest security already issued usually falls. Changes in the market interest rate may thus have a negative effect on the price of the mandatory convertible bonds and lead to losses for the holders of the mandatory convertible bonds if the mandatory convertible bonds are sold before maturity.

Conflicts of Interest

The Issuer may, from time to time, act in other capacities with regard to the Notes, such as calculation agent, which allows the Issuer to make calculations in respect of the Notes (e.g. the amount of distributions to be paid) which are binding for the Noteholders. This could generate conflicts of interest, which may, if not properly managed, affect the value of the Notes.

Change of law

The respective Terms and Conditions of the Notes are based on Luxembourg law respective German law (for the Fixed Rate Bearer Notes under German law, the guaranteed Fixed Rate Bearer Notes under German law and the guaranteed Fixed Rate Bearer Notes II under German law) and, with respect to certain provisions, Maltese Law now in force. No assurance can be given as to the impact of any possible judicial decision or change in applicable laws or administrative practice after the date of this Base Prospectus.

Credit ratings and other ratings

Any rating which may, in the future, be assigned to the Notes, may not adequately reflect all risks of the investment in such Notes. Equally, ratings may be suspended, downgraded or withdrawn. Such

suspension, downgrading or withdrawal may have an adverse effect on the market value and trading price of the Notes. A (credit) rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

Early redemption

The Notes are redeemable in whole at the option of the Issuer prior to the relevant maturity date (in cases there is a maturity date) in the instances prescribed in the Terms and Conditions. Any decision by the Issuer as to whether it will redeem the Notes will be made at the absolute discretion of the Issuer. The feature allowing for optional redemption may condition the market value of the Notes and there can be no guarantee that the Noteholders may be able to re-invest the proceeds of such redemption at equivalent or higher rates of return.

In addition, the Issuer will always have the right to redeem the Notes if the relevant Issuer and/or Guarantor are required to pay additional amounts (gross-up payments) on the Notes for reasons of taxation as set out in the Terms and Conditions.

Further, prospective investors should note that, in the event that the Issuer were to be deemed to fall within the remit of the CRR, any redemption before the applicable maturity date would be subject to the prior permission of the competent authority pursuant to Article 78(1) of the CRR. Under the CRR, the competent authority may only permit institutions to redeem Tier 2 instruments such as the Notes if certain conditions prescribed by the CRR are complied with. These conditions, as well as a number of other technical rules and standards relating to regulatory capital requirements applicable to the Issuer, should be taken into account by the competent authority in its assessment of whether or not to permit any redemption or repurchase. It is uncertain how the competent authority will apply these criteria in practice and such rules and standards may change during the maturity of the Notes. It is therefore difficult to predict whether, and if so, on what terms, the competent authority will grant its prior permission for any redemption or repurchase of the Notes.

Functionality of the relevant Clearing System, Distribution Agents and/or any relevant Central Securities Depository

The transfer or registration (as applicable with respect to each type of Notes) of Notes through different clearing systems, such as Clearstream Banking AG and/or Clearstream Banking S.A. and/or Euroclear Bank S.A./N.V. and/or the Central Securities Depository of the Malta Stock Exchange and/or OeKB CSD GmbH and/or in the case of registered Notes through distribution agents and further distributors as appointed from time to time. The Issuer does not assume any responsibility as to whether the Notes are actually transferred to the securities portfolio of the relevant investor. Noteholders have to rely on the functionality of the relevant clearing system and, in the case of registered Notes, on the systems of the relevant distribution agents, other distributors appointed from time to time and, in the case of series of Notes issued in dematerialised form, any central securities depository with and through which any series of Notes may be dematerialised. In the event of operational failure of such functionality and/or systems, including the systems of any central securities depository, Noteholders can be negatively affected.

Perpetual Notes

The Notes may be set up as perpetual obligations which have no fixed maturity date and may only be redeemed at the option of the Issuer (and subject to certain regulatory requirements to be met and as set out in the relevant Terms and Conditions).

Inflation Risk

Inflation causes the rate of return on assets (such as the Notes and income deriving therefrom) to decrease in value. Inflation risk thus relates to the possibility that the value of assets (such as the Notes

and income therefrom) will decrease as inflation reduces the purchasing power of a currency. If the inflation rate exceeds the distribution paid on the Notes (if any), the yield on such Notes will become negative.

2. Risk relating to the Guarantor and the Guarantee

Risks in connection with a possible insolvency of the Guarantor (or the Successor Guarantor(s) as applicable)

The Noteholders assume not only the credit risk of the Issuer but also of the Guarantor (or the Successor Guarantor, as applicable). In the case of insolvency (or similar cases) of both the Issuer and the Guarantor, the Noteholders may lose part or all of their claims to repayment of their invested capital.

Risks in connection with a possible payment default under the relevant Guarantee

The Guarantor (or its Successor Guarantor(s), as applicable) may not have the ability to repay the Notes. The Guarantor (or its Successor Guarantor(s), as applicable) may not be able to repay the Notes in the event of a call under the relevant Guarantee. If the Noteholders were to demand payment from the Guarantor (or its Successor Guarantor(s), as applicable) under the relevant Guarantee, the Guarantor (or its Successor Guarantor(s), as applicable) cannot be certain that it will be able to pay the required amount in full. The Guarantor's (or its Successor Guarantor(s)'s, as applicable) ability to repay the Notes will depend on its financial condition at the time of the call under the relevant Guarantee, will be limited by the limitations set out in paragraph (1) of the relevant Guarantee or in clause 2 of the Terms and Conditions and may be limited by law, by the terms of its indebtedness and by the agreements that it may have entered into on or before such date, which may replace, supplement or amend its existing or future indebtedness. The Guarantors' (or its Successor Guarantor(s)'s, as applicable) failure to repay the Notes may result in an event of default under the terms of other outstanding indebtedness (if any) of the Issuer (or its Successor Issuer, as applicable) and the Guarantor (or its Successor Guarantor(s), as applicable).

Risks in connection with limitations provided for in the relevant Guarantee

The relevant Guarantee of the Notes may not cover the full amount of principal and interest of the Notes. The obligations of the Guarantor (or its Successor Guarantor(s), as applicable) under the relevant Guarantee shall be limited pursuant to the relevant guarantee limitations set out in paragraph (1) of the relevant Guarantee or in clause 2 of the Terms and Conditions, respectively. As a consequence of such guarantee limitations the aggregate amount that the Guarantor (or its Successor Guarantor(s), as applicable) may be required to pay under the relevant Guarantee may be less than the principal amount of the Notes and any interest due in respect of the Notes.

Risks in connection with a possible bankruptcy of the Guarantor

Bankruptcy laws may impact claims in respect of the Issuer (or its Successor Issuer, as applicable) and the Guarantor (or its Successor Guarantor(s), as applicable). The Issuer (or its Successor Issuer, as applicable) and the Guarantor (or its Successor Guarantor(s), as applicable) are subject to applicable bankruptcy laws. In the event of a bankruptcy of the Issuer (or its Successor Issuer, as applicable) and/or the Guarantor (or its Successor Guarantor(s), as applicable), the application of these bankruptcy laws may substantially affect the Noteholders' claims to obtain repayment in full of the Notes, e.g. through a suspension of payments, a stay on enforcement measures or an order providing for partial repayment of the Notes only.

Risks in connection with the Guarantor's principal business

The core business of the Guarantor consists of acting as (sub-) arranger in respect of the issuance of certain bonds (or other financial instruments) by, inter alia, Timberland Securities SPC, Timberland Securities II SPC, Timberland Securities plc, Timberland Securities S.A., Timberland Investment S.A. Notwithstanding the fact that the Guarantor receives a customary remuneration for the services rendered as a (sub-) arranger, it cannot be ruled that the fees and income generated are sufficient to cover all and any payment obligations as stipulated under the terms of the Guarantee or Guarantee II (as applicable).

The occurrence of the above described scenario may affect (or limit) the Guarantor's ability to perform the obligations under the terms of the Guarantee or Guarantee II (as applicable).

Risks in connection with the Guarantor's investment decisions

In addition to the business activities as set out above, the Guarantor is also a so-called frequent issuer that issues financial instruments (i.e. certain types of bonds) on a regular basis to finance its principal business and support its business activities. The proceeds received from the sale of such bonds may, in order to generate additional revenues besides the remunerations received for the services rendered as (sub-) arranger, be invested by the Guarantor in other financial instruments, including, without limitation, shares, bonds, securitised debt instruments, money market instruments and units in collective investment schemes. As such investments will be subject to normal market fluctuations and the risks inherent in all investments of this type (e.g. insolvency of the respective obligor of such debt financial instrument), it cannot be ruled out that the Guarantor may lose all or part of the moneys invested which are not only required to redeem its own capital markets liabilities stemming from bonds issued) but also may limit the financial capability to ensure full payment under the obligations under the terms of the Guarantee or Guarantee II (as applicable).

The occurrence of the above described scenario may affect (or limit) the Guarantor's ability to perform the obligations under the terms of the Guarantee or Guarantee II (as applicable).

Risks in connection with the fact that the Guarantor is an issuer of bonds issued with special regulatory features

As mentioned above, the Guarantor issues financial instruments (i.e. bonds) on a regular basis. Although the Guarantor is not a regulated company (subject to, inter alia, regulatory capital requirement provisions or other legal regimes applicable to investment firms, banks and other financial intermediaries) and consequently not obliged or mandatorily required to fulfil certain regulatory prerequisites, but due to the nature of certain bonds (e.g. contingent convertible bonds) issued in connection with, and under, officially approved prospectuses, it cannot be ruled out completely that the Guarantor may become subject to legal regimes and accompanying rules and provisions as mentioned above. This may have a negative impact on the Guarantor and future issuances of (e.g. contingent convertible) bonds and respective proceeds stemming from such issuances and which, amongst others, serve as a source to generate additional revenues and income (as describes in the risk factor directly above).

The occurrence of the above described scenario may affect (or limit) the Guarantor's ability to perform the obligations under the terms of the Guarantee or Guarantee II (as applicable).

Risks in connection with the Guarantor's limited operating history

The Guarantor, an unregulated company whose primary business is acting as (sub-) arranger for certain issuers of financial instruments (such bonds or index-linked notes), was incorporated on 30 January 2015 and therefore has a limited operating history or a limited proven track record that can be evaluated as a basis for the Guarantor's potential performance and the financial ability to act as a guarantor (especially with the obligations to pay principal and interest).

Risks in connection with security granted for certain other issuers

Besides acting as a guarantor for certain Notes issued under this Base Prospectus, the Guarantor may provide security for, or act as a guarantor with respect to, financial instruments issued by Timberland Securities SPC, Timberland Securities II SPC, Timberland Securities plc, Timberland Securities S.A., Timberland Investment S.A. and/or any other securitisation vehicle in respect of which the Issuer may act as (sub-) arranger in the future without the mandatory necessity to receive a customary remuneration. In the event that one or more of the aforementioned issuers defaults on its payment obligations under the respective financial instruments which have been guaranteed and/or secured in the instances prescribed above, and corresponding claims of secured third-parties have to be paid, this may impact (or limit) the ability of the Guarantor to fulfil its obligations provided for in the Guarantee, Guarantee II, Guarantee III or Guarantee IV (as applicable).

The occurrence of the above described scenario may affect (or limit) the Guarantor's ability to perform the obligations under the terms of the Guarantee, Guarantee II, Guarantee III or Guarantee IV (as applicable).

3. Risks related to the offer to the public and/or admission of the Notes to trading on a regulated market

Commissions to be paid by the Issuer

Distribution commissions or other similar fees charged by the Issuer's distribution agents reduce the total amount of the net issue proceeds. Therefore, the issue proceeds available to the Issuer for the purpose of investing in financial instruments or other assets may be reduced accordingly.

Costs relating to the purchase and sale of the Notes

When Notes are purchased or sold, several types of incidental costs (including transaction fees and commissions) may be incurred in addition to the purchase or sale price of the Notes.

To the extent that credit institutions are involved in the process for the purchase or sale of Notes, prospective investors should note that such credit institutions may charge commissions which are either fixed minimum commissions or pro-rata commissions, depending on the order value. In the event that additional parties are involved in the process for the purchase or sale of Notes (including, for instance, domestic dealers or brokers in foreign markets), Noteholders may also be charged brokerage fees, commissions and other fees and expenses. In addition to costs directly related to the purchase of Notes, investors may also be charged other costs, such as custody fees and the fees of any central securities depository with and through which any Notes may be dematerialised.

Investors should inform themselves about any additional costs incurred in connection with, amongst others, the purchase, custody or sale of the Notes before investing in the Notes. Prospective investors should note that these costs may significantly reduce or eliminate any profits which may be derived from investing in the Notes.

Market price risk

In case the Notes are listed or included for trading on a stock exchange or OTF, the development of market prices of the Notes depends on various factors, such as changes of the market rate interest levels, the policies of central banks, overall economic developments, inflation rates or the lack of or excess demand for the relevant type of Note. The Noteholder is therefore exposed to the risk of an unfavourable development of the market price of its Notes which materialises if the Noteholder sells the Notes prior to the maturity date of such Notes. If a Noteholder decides to hold the Notes until its

final maturity, the Notes will be redeemed at the amount set out in or determined pursuant to the provisions contained in the relevant Final Terms.

Orderly and liquid market

The existence of an orderly and liquid market for the Notes depends on a number of factors, including the presence of willing buyers and sellers of the Issuer's Notes at any given time. Such presence is dependent upon the individual decisions of investors over which the Issuer has no control. Accordingly, there can be no assurance that an active secondary market for the Notes will develop, or, if it develops, that it will continue. Furthermore, there can be no assurance that Noteholders will be able to sell the Notes at or above the relevant issue price or at all.

No full placement of the Notes guaranteed

Offerings comprises typically a maximum volume of Notes. However, it is not certain that all Notes of an issuing of Notes under Final Terms will be placed. Under certain circumstances, this may result in the Notes being issued only with a significantly lower volume. This would result in less capital being available to the Issuer. This could also have a negative impact on the price development and liquidity of the Notes.

Future public offers

No prediction can be made about the effect which future public offers of the Issuer's securities or any takeover or merger activity involving the Issuer, if any, would have on the market price of the Notes prevailing from time to time.

Legality of purchase

The Issuer has or assumes no responsibility for the lawfulness of the acquisition of the Notes by a potential investor of the Notes, whether under the laws of the jurisdiction of its incorporation or the jurisdiction in which it operates (if different) or for compliance by that potential investor with any laws, regulation or regulatory policy applicable to it. A potential investor may not rely on the Issuer, any distributor or financial intermediaries or any of their respective affiliates in connection with its determination as to the legality of its acquisition of the Notes.

Loan-financed investments

A potential investor that finances its investment in the Notes via a loan should not rely on the fact that the income generated by an investment in the Notes will suffice to repay the loan itself and the interest thereon. In the case of a loss of the investment, the investor would still have to repay the loan and the interest thereon.

Trading suspension, interruption or termination

Trading in the Notes on regulated or unregulated markets and any other markets on which the Notes may (in the future) be listed, may, depending on the rules applicable to such relevant markets, be suspended or interrupted by the relevant markets or by a competent regulatory authority (or stock exchange) upon the occurrence of a number of factors, including (but not limited to): (i) violation of price limits, (ii) breach of statutory provisions, (iii) occurrence of operational problems with respect to the relevant markets, and/or (iv) if required in order to secure a functioning market or to safeguard the interests of Noteholders. Furthermore, trading in the Notes may be terminated, either upon decision of

the relevant markets, upon the decision of a regulatory authority (or stock exchange), or upon application by the Issuer.

Noteholders should be aware that the Issuer has no influence on the suspension, interruption, or termination of trading in the Notes (other than where trading in the Notes is terminated upon the Issuer's decision), and Noteholders bear the risks connected with any trading suspension, interruption or termination. Noteholders should be aware that they may not be able to sell their Notes in such instances and should also note that during periods of suspension or interruption of trading, stock exchange quotations may not adequately reflect the price of the Notes.

DESCRIPTION OF THE NOTES

This section entitled "*Description of the Notes*" is an abstract description of the possible structures of instruments the Issuer may issue under this Base Prospectus. An overview of certain elements of the Notes is set out below.

All capitalised terms in this section entitled "*Description of the Notes*" which are not otherwise defined herein have the same meaning as in the respective Terms and Conditions.

1. GENERAL FEATURES OF THE NOTES

Form and Securitisation of bearer Notes

The Notes will be issued in bearer form only and may be represented by a Permanent Global Note or a Temporary Global Note exchangeable for a Permanent Global Note. Notes in definitive form and interest coupons will not be issued.

Form and Ownership of registered Notes

The Notes are in registered form. Ownership in respect of the Notes is established by the registration in the Issuer Register. Rights and title of the Noteholders (and its assignees in and to the Notes) shall be transferable only upon notation of such transfer in the Register.

Form and Ownership of registered Notes in dematerialized Form

The Notes are in registered and dematerialised form and will be represented in uncertificated form by the appropriate entry in the Electronic Register maintained on behalf of the Issuer at the CSD. Ownership in respect of the Notes is established by the appropriate entry in the Electronic Register. For as long as any of the securities issued by the company shall be and remain dematerialised under the Financial Markets Act (Cap 345 of the Laws of Malta) the terms and conditions relating to such securities including without prejudice to the generality of the foregoing, their issuance, transfer, exchange, redemption and or cancellation shall be governed in accordance with the applicable rules and procedures set out by the relevant central securities depository providing dematerialisation and any other provision shall apply only to the extent that it is not inconsistent with such rules and procedures.

(Qualified) Subordination clause ((qualifizierte) Rangrücktrittserklärung) and pre-insolvency enforcement block (vorinsolvenzliche Durchsetzungssperre)

The Notes may provide for a (qualified) subordination clause ((*qualifizierte*) *Rangrücktrittserklärung*) and a pre-insolvency enforcement block (*vorinsolvenzliche Durchsetzungssperre*). In such scenario, the claims arising from the Notes create subordinated creditor rights in relation to claims of other creditors of the Issuer. This means that, in order to avoid over-indebtedness of the Issuer under insolvency law within the meaning of § 19 (2) German Insolvency Code (*Insolvenzordnung*) and in the event of liquidation proceedings being conducted pursuant to § 39 (2) German Insolvency Code (*Insolvenzordnung*), the Issuer must have a right to claim subordination in relation to claims of other creditors of the Issuer with regard to all present and future claims of Noteholders arising from the Notes. These subordinated claims include claims with respect to payment of interest and repayment of the capital. The respective subordination is agreed in such a way that all claims of Noteholders will only be satisfied in case, and subject to the fact, that all claims and demands of all existing and future creditors of the Issuer described in § 39 (1) Nos. 1 to 5 German Insolvency Code (*Insolvenzordnung*) have been satisfied.

Payment of Distributions and Interest

The Notes to be issued under this Base Prospectus pay fixed amounts of distributions (or interest, as applicable) specified in the relevant Final Terms. The Notes provide for only one Rate of Distributions (or Interest Rate, as applicable) for each relevant period. Distributions (or interest) will be scheduled to be paid either annually or semi-annually (or as otherwise determined in the Final Terms) in arrears. The respective amount of distributions (or interest) falls due for payment on the relevant Distribution Payment Date (or Interest Payment Date, as applicable).

In addition (and if applicable to the relevant Final Terms), the Notes may (temporarily) pay an increased interest rate subject to the fulfilment of certain conditions stipulated in the relevant Final Terms.

The payment of distributions (or interest) may, in case applicable according to the relevant Final Terms, subject to the provisions relating to a (qualified) subordination clause (*qualifizierte Rangrücktrittserklärung*) and pre-insolvency enforcement block (*vorinsolvenzliche Durchsetzungssperre*).

Substitution of the Issuer

The Notes may provide for a mechanism to entitle the Issuer to substitute for itself as the Issuer another person. The latter mentioned legal mechanism is subject to certain mandatory requirements as stipulated in the relevant Final Terms. The aforementioned substitution may apply without the requirement of a given consent of the Noteholders.

2. SPECIAL FEATURES OF CONTINGENT CAPITAL FIXED RATE NOTES

Status

The Notes issued in connection with the Terms and Conditions for Option X and Option XI constitute direct, unsecured and subordinated obligations of the Issuer, and Tier 2 Instruments. As a consequence of the before-mentioned, the obligations of the Issuer under the Notes will rank (i) junior to all present or future unsubordinated instruments or obligations of the Issuer, (ii) pari passu among themselves, and with all present or future obligations under any other Tier 2 Instruments, and (iii) senior to all present or future obligations under any AT 1 Instruments, and all other subordinated instruments or obligations of the Issuer ranking or expressed to rank subordinated to the obligations of the Issuer under the Notes or pari passu with obligations under any AT 1 Instruments. In addition, a qualified subordination clause may apply.

Redemption

In case of Notes providing for a Maturity Date, the Notes may be redeemed at their Current Principal Amount at their stated maturity.

The redemption of principal may, in case applicable according to the relevant Final Terms, subject to the provisions relating to subordination clause (*Rangrücktrittserklärung*) and pre-insolvency enforcement block (*vorinsolvenzliche Durchsetzungssperre*).

Early Redemption

If specified in the relevant Final Terms, the Notes may be redeemed prior to maturity for regulatory reasons or reasons of taxation, in each case subject to certain conditions as set out in the Terms and Conditions.

Moreover, and subject to the fulfilment of certain regulatory requirements, the Notes may, and will with respect to perpetual Notes, include a call option of the Issuer. A call option gives the Issuer the right (but not the obligation) to redeem the Notes on specified call redemption date(s). The respective

call redemption amount payable on exercise of the call option will be set out in the applicable Final Terms.

Write-Down and Write-up

If the Issuer incurs an Annual Balance Sheet Loss as calculated in accordance with German GAAP or (EU- or full) IFRS, as applicable or chosen by the Issuer, in any fiscal year, the Noteholder shares in such loss in the proportion which their Current Principal Amount bears in relation to the aggregate book value of all going concern loss sharing components of the Issuer's regulatory liable capital, and the Current Principal Amount shall be written down accordingly. For the purpose of such calculation, the Issuer's loss sharing liable capital shall include any and all outstanding CET 1 Instruments and AT 1 Instruments and Similar Instruments. Following an Annual Balance Sheet Loss, there will be a corresponding reduction in the nominal amount of the Current Principal Amount equivalent to the amount of the Noteholder's share in such Annual Balance Sheet Loss. Following a reduction, the Current Principal Amount will be written up in subsequent fiscal years of the Issuer in which an Annual Balance Sheet Profit is recorded in accordance with German GAAP or (EU- or full) IFRS, as applicable. The Current Principal Amount will be written-up prior to the writing-up of AT 1 Instruments. A writing-up of shareholders' equity and allocation to reserves may only occur after the Current Principal Amount has been fully written-up again to its initial Principal Amount. The respective Final Terms may provide for a different write-down/write up mechanism.

Meetings of Noteholders

The Notes contain provisions pursuant to which Noteholders may agree by resolution to amend the Terms and Conditions and to decide upon certain other matters regarding the Notes. Resolutions of Noteholders properly adopted by vote taken in a meeting in accordance with the Terms and Conditions are binding upon all Noteholders.

Governing Law

The Notes shall be governed by, and shall be construed exclusively in accordance with, Luxembourg law except for the provisions regarding the provisions (i) *Status*, whereby in case the Notes contain the qualified subordination clause as set out in the Terms and Conditions such qualified subordination clause shall be applying mutatis mutandis in the meaning to the laws of Germany and (ii) *Meetings of Noteholders* as set out in the Terms and Conditions which shall be subject to the laws of Germany.

In deviation to the above, the Notes may be set up as subordinated Notes. In this scenario, the Notes constitute direct, unsecured and subordinated obligations of the Issuer. This means that the obligations of the Issuer under the Notes will rank (i) junior to all present or future unsubordinated instruments or obligations of the Issuer, (ii) pari passu among themselves, and (iii) senior to all present or future obligations under any CRR Instruments, and all other subordinated instruments or obligations of the Issuer ranking or expressed to rank subordinated to the obligations of the Issuer under the Notes. (as described in the following section).

The Notes may provide for a (qualified) subordination clause (*(qualifizierte) Rangrücktrittserklärung*) and a pre-insolvency enforcement block (*vorinsolvenzliche Durchsetzungssperre*). In such scenario, the claims arising from the Notes create subordinated creditor rights in relation to claims of other creditors of the Issuer. This means that, in order to avoid over-indebtedness of the Issuer under insolvency law within the meaning of § 19 (2) German Insolvency Code (*Insolvenzordnung*) and in the event of liquidation proceedings being conducted pursuant to § 39 (2) German Insolvency Code (*Insolvenzordnung*), the Issuer must have a right to claim subordination in relation to claims of other creditors of the Issuer with regard to all present and future claims of Noteholders arising from the Notes. These subordinated claims include claims with respect to payment of interest and repayment of the capital. The respective subordination is agreed in such a way that all claims of Noteholders will only be satisfied in case, and subject to the fact, that all claims and demands of all existing and future creditors of the Issuer described in § 39 (1) Nos. 1 to 5 German Insolvency Code (*Insolvenzordnung*) have been satisfied.

If specified in the relevant Final Terms, the Notes may be redeemed prior to maturity for reasons of taxation or upon the occurrence of an event of default.

Moreover, the Notes may, and will in case they are set up as perpetual Notes, include a call option of the Issuer. A call option gives the Issuer the right (but not the obligation) to redeem the Notes on specified call redemption date(s). The respective call redemption amount payable on exercise of the call option will be set out in the applicable Final Terms.

In addition, the relevant Final Terms may specify a put option of the Noteholders. A put option gives the Noteholder the right to require the Issuer to redeem its Notes on a specified Put Redemption Date.

Meetings of Noteholders

The Notes may (and, with respect to Notes issued under Option I, will) contain provisions pursuant to which Noteholders may agree by resolution to amend the Terms and Conditions and to decide upon certain other matters regarding the Notes. Resolutions of Noteholders properly adopted by vote taken in a meeting in accordance with the Terms and Conditions are binding upon all Noteholders.

Governing Law

The Notes shall be governed by, and shall be construed exclusively in accordance with, German law (Option I), or Luxembourg law (as regards to Option IV and Option V except for the provision of *Status* and *Meetings of Noteholders* of the respective Terms and Conditions which shall be subject to the laws of Germany), or Maltese law (as regards to Option XII except for the provision *Status* which shall be subject to the laws of Germany and *Meetings of Noteholders* of the respective Terms and Conditions which shall be subject to the laws of Germany).

5. FEATURES OF NOTES IF NAMED AS "GREEN"

Green Notes / Green Bonds

Green Notes/Green Bonds are designated bonds intended to encourage sustainability and to support climate-related or other types of special environmental projects. More specifically, green bonds aimed inter alia at energy efficiency, pollution prevention, clean transportation and the cultivation of environmentally friendly technologies.

Green Bonds are intended for capital-raising and investment for new and existing projects with environmental benefits in regard inter alia but not limited to the Green Bond Principles of ICMA. The Green Bond Principles (**GBP**) of ICMA, updated as of June 2018 by ICMA, are voluntary process guidelines that recommend transparency and disclosure and promote integrity in the development of the Green Bond market by clarifying the approach for issuance of a Green Bond. The GBP are intended for broad use by the market: they provide issuers guidance on the key components involved in launching a credible Green Bond.

In case the specific Notes are described as Green, Green Notes or Green Bonds, the Notes qualify in the view of the Issuer either as green bonds in terms of the "Green Bonds Principles (GBP)" definition of ICMA (International Capital Markets Association) or are in any other connection to a kind of green investment.

All other features of the relevant Notes are subject to the relevant section in this section entitled "*Description of the Notes*".

[and the Put Early Redemption Amount] and the payment of the interest coupon, applying in accordance with § 19 (2) sentence 2 of the German Insolvency Code (*Insolvenzordnung* ("InsO")) are subordinated to all claims of other current or future creditors in such a manner that any payments of principal and interest under the Notes may be demanded only after satisfaction of all other creditors ranking as stipulated in § 39 (1) nos. 1 to 5 InsO, i.e. at the ranking position stipulated in § 39 (2) InsO. A waiver with respect to the claims is not possible;

(ii) Payments under the Notes may only be demanded from future annual net profits, from any liquidation surplus or from other disposable assets;

(iii) the Noteholders may not demand satisfaction of their claims if this results, or threatens to result, in the Issuer becoming overindebted (*überschuldet*) or unable to pay its debts (*zahlungsunfähig*) within applying the meaning of German insolvency law;

(iv) Paragraphs (i) to (iii) apply both before and after the opening of insolvency proceedings;

(v) apart from that, the Noteholders are entitled without restriction to assert their rights under the Notes and to claim performance.

[For the avoidance of doubt, this clause constitutes an agreement for the benefit of all creditors of the Issuer as a whole (*Gläubigergesamtheit*) applying within the meaning of § 328 (2) [BGB][of the German Civil Code (*Bürgerliches Gesetzbuch* ("BGB"))]. Any cancellation of this subordination agreement without the creditors' cooperation will therefore be permitted only in the event that the criteria for insolvency (paragraph (iii)) are not met or no longer met in respect of the Issuer.][●]

1.4 Clearing System

The Global Notes will be kept in custody by or on behalf of a Clearing System as central depository for securities until [, in case of the Permanent Global Note,] all obligations of the Issuer under the Notes have been satisfied.

2. STATUS

[The obligations under the Notes constitute unsecured and unsubordinated obligations of the Issuer ranking pari passu without any preference among themselves and pari passu with all other, present and future, unsecured and unsubordinated obligations of the Issuer, unless such obligations are given priority under mandatory provisions of statutory law.][●]

[The Notes constitute direct, unsecured and subordinated obligations of the Issuer.]

[[Qualified] subordination clause:

In the insolvency or liquidation of the Issuer, the obligations of the Issuer under the Notes will rank:

(a) junior to all present or future unsubordinated instruments or obligations of the Issuer[.];]

[

(b) whereby:

(i) All claims under the Notes, including but not limited to the claims for payment of the Principal Amount[, the Call Redemption Amount] and the payment of distributions, applying mutatis mutandis in accordance with section 19 (2) sentence 2 of the German Insolvency Code (*Insolvenzordnung*, InsO) are subordinated to all claims of other current or future creditors in such a manner that any payments of principal and interest under the Notes may be demanded only after satisfaction of all other creditors ranking as stipulated in section 39 (1) nos. 1 to 5 InsO, i.e. at the ranking position stipulated in section 39 (2) InsO. A waiver with respect to the claims is not possible.]

[[ii][●]

Payments under the Notes may only be demanded from future annual net profits, from any liquidation surplus or from other disposable assets.]

[[iii][●]

The Noteholders may not demand satisfaction of their claims if this results, or threatens to result, in the Issuer becoming overindebted (*überschuldet*) or unable to pay its debts (*zahlungsunfähig*) within applying mutatis mutandis the meaning of German insolvency law.]

[[iv][●]

Paragraphs [(i)[●] [to] [(iii)[●] apply both before and after the opening of insolvency proceedings.]

[[v][●]

In all other respects, the Noteholders are entitled without restriction to assert their rights under the Notes and to claim performance.]

[[vi][●]

For the avoidance of doubt, this clause constitutes an agreement for the benefit of all creditors of the Issuer as a whole (*Gläubigersamtheit*) applying mutatis mutandis within the meaning of section 328 (2) of the German Civil Code (*Bürgerliches Gesetzbuch*). Any cancellation of this subordination agreement without the creditors' cooperation will therefore be permitted only in the event that the criteria for insolvency (paragraph (iii)) are not met or no longer met in respect of the Issuer.]

[•][•]

]

[(c)][•] pari passu among themselves; and

[(d)][•] senior to [all present or future (a) obligations under any [CRR Instruments] [and] [or] [CRR II Instruments], and (b)] all other subordinated instruments or obligations of the Issuer ranking or expressed to rank subordinated to the obligations of the Issuer under the Notes.

[(e)][•] Pre-insolvency enforcement block/non-payment

Definitions:

Reason for opening insolvency proceedings refers to the inability to pay within the meaning of § 17 German Insolvency Code (*Insolvenzordnung*), imminent inability to pay within the meaning of § 18 German Insolvency Code and overindebtedness within the meaning of § 19 German Insolvency Code. Impending overindebtedness does not constitute reasons for opening insolvency proceedings;

If and to the extent that the partial or complete satisfaction of one or more or all of the Noteholders's claims (e.g. repayment, interest and other ancillary claims) would give rise to at least one reason for opening insolvency proceedings against the Issuer, the Noteholder cannot enforce this claim or these claims in a legally binding manner outside of insolvency proceedings (payment ban for the Noteholder). The payment prohibition applies for an indefinite period until such time as the fulfillment of the claim by the Issuer no longer gives rise to a reason for opening insolvency proceedings or all other creditors of the Issuer have agreed to the lifting of the payment prohibition. This means that claims arising from the Notes can only be legally enforced outside insolvency proceedings once the payment prohibition has been lifted.

Subordination Agreement

In the event of insolvency proceedings on the assets of the Issuer or the liquidation of the Issuer, the claims arising from the Notes shall rank behind all non-subordinated claims and all subordinated claims within the meaning of § 39 para. 1 nos. 1 to 5 of the German Insolvency Code.

3.3 Default Distributions

The Notes shall cease to bear distributions from the expiry of the calendar day preceding the due date for redemption (if the Notes are redeemed). If the Issuer fails to redeem the Notes when due, distributions shall continue to accrue on the Principal Amount of the Notes from and including the due date for redemption to but excluding the date of actual redemption of the Notes at the default rate of distributions established by law. This does not affect any additional rights that might be available to the Noteholders.

- (d) The Issuer will cause to be kept at the specified office of the Registrar and Transfer Agent a register of Noteholders of Notes (the **Register**). The Registrar and Transfer Agent will immediately inform the Issuer of any changes made to the Register.
- (e) The Issuer undertakes to keep an up-to-date copy of the Register at its registered office at all times (the **Issuer Register**).
- (f) A Noteholder may request from the Registrar and Transfer Agent an extract of the Register showing the entry relevant to its holding of the Notes.

1.3 Title

- (a) Title to the Notes passes only by registration (*inscription*) in the Issuer Register.
- (b) Ownership in respect of the Notes is established by the registration in the Issuer Register.
- (c) Except as ordered by a court of competent jurisdiction or a public authority or as required by law, the Issuer may deem and treat the person registered in the Issuer Register as absolute owner of the Notes for all purposes (whether or not the Note is overdue) and no person will be liable for so treating the Noteholder.
- (d) No transfer of a Note shall be recognised by the Issuer unless entered in the Register and the Issuer Register. In the case of discrepancies between the records of the Register and the Issuer Register, the latter shall prevail.

2. TRANSFERS

- (a) A Note may be transferred by depositing at the specified office of the Registrar and Transfer Agent a document evidencing the transfer of the registered Note in the form satisfactory to the Registrar and Transfer Agent and the Issuer, together with a copy of the passport or ID card of each of the transferor and the transferee and/or such other documents as the Registrar and Transfer Agent and the Issuer may reasonably require.
- (b) Registration of transfer of the Notes will be effected without charge by or on behalf of the Issuer but upon payment (or the giving of such indemnity as the Issuer may reasonably require) in respect of any tax or other governmental charges which may be imposed in relation to such transfer.

3. CLOSED PERIODS

No Noteholder may require the transfer of a Note to be registered (i) after an event of default notice has been issued pursuant to Clause 8(b) or (ii) during the period of [15][●] calendar days ending on the due date for any payment in respect of that Note. [Furthermore, the Issuer shall not be required, in the event of an early redemption of the Notes under Clause 7.2, to register the transfer of these Notes (or parts of these Notes) during the period beginning on the [twenty-fifth (25th)] [●] calendar day before the Put Redemption Date and ending on the Put Redemption Date (both inclusive).]

4. STATUS

[The obligations under the Notes constitute unsecured and unsubordinated obligations of the Issuer ranking *pari passu* without any preference among themselves and *pari passu* with all other, present and future, unsecured and unsubordinated obligations of the Issuer, unless such obligations are given priority under mandatory provisions of statutory law.][●]

[The Notes constitute direct, unsecured and subordinated obligations of the Issuer.]

[[Qualified] subordination clause:

In the insolvency or liquidation of the Issuer, the obligations of the Issuer under the Notes will rank:

- (a) junior to all present or future unsubordinated instruments or obligations of the Issuer[.][;]

[

- (b) whereby:

- [(i) All claims under the Notes, including but not limited to the claims for payment of the Principal Amount[, the Call Redemption Amount] and the payment of distributions, applying *mutatis mutandis* in accordance with section 19 (2) sentence 2 of the German Insolvency Code (*Insolvenzordnung*, InsO) are subordinated to all claims of other current or future creditors in such a manner that any payments of principal and interest under the Notes may be demanded only after satisfaction of all other creditors ranking as stipulated in section 39 (1) nos. 1 to 5 InsO, i.e. at the ranking position stipulated in section 39 (2) InsO. A waiver with respect to the claims is not possible.]

[[(ii)] [●]

Payments under the Notes may only be demanded from future annual net profits, from any liquidation surplus or from other disposable assets.]

[(iii)][●]

The Noteholders may not demand satisfaction of their claims if this results, or threatens to result, in the Issuer becoming overindebted (*überschuldet*) or unable to pay its debts (*zahlungsunfähig*) within applying mutatis mutandis the meaning of German insolvency law.]

[(iv)][●]

Paragraphs [(i)][●] [to] [(iii)][●] apply both before and after the opening of insolvency proceedings.]

[(v)][●]

In all other respects, the Noteholders are entitled without restriction to assert their rights under the Notes and to claim performance.]

[(vi)][●]

For the avoidance of doubt, this clause constitutes an agreement for the benefit of all creditors of the Issuer as a whole (*Gläubigersamtheit*) applying mutatis mutandis within the meaning of section 328 (2) of the German Civil Code (*Bürgerliches Gesetzbuch*). Any cancellation of this subordination agreement without the creditors' cooperation will therefore be permitted only in the event that the criteria for insolvency (paragraph (iii)) are not met or no longer met in respect of the Issuer.]

[●][●]

]

[(c)][●] pari passu among themselves; and

[(d)][●] senior to [all present or future (a) obligations under any [CRR Instruments] [and] [or] [CRR II Instruments], and (b)] all other subordinated instruments or obligations of the Issuer ranking or expressed to rank subordinated to the obligations of the Issuer under the Notes.

[(e)][●] Pre-insolvency enforcement block/non-payment

Definitions:

Reason for opening insolvency proceedings refers to the inability to pay within the meaning of § 17 German Insolvency Code (*Insolvenzordnung*), imminent inability to pay within the meaning of § 18 German Insolvency Code and overindebtedness within the meaning of § 19 German Insolvency Code. Impending overindebtedness does not constitute reasons for opening insolvency proceedings;

If and to the extent that the partial or complete satisfaction of one or more or all of the Noteholders's claims (e.g. repayment, interest and other ancillary claims) would give rise to at least one reason for opening insolvency proceedings against the Issuer, the Noteholder cannot enforce this claim or these claims in a legally binding manner outside of insolvency proceedings (payment ban for the Noteholder). The payment prohibition applies for an indefinite period until such time as the fulfillment of the claim by the Issuer no longer gives rise to a reason for opening insolvency proceedings or all other creditors of the Issuer have agreed to the lifting of the payment prohibition. This means that claims arising from the Notes

can only be legally enforced outside insolvency proceedings once the payment prohibition has been lifted.

Subordination Agreement

In the event of insolvency proceedings on the assets of the Issuer or the liquidation of the Issuer, the claims arising from the Notes shall rank behind all non-subordinated claims and all subordinated claims within the meaning of § 39 para. 1 nos. 1 to 5 of the German Insolvency Code.

1.4 Clearing System

The Global Notes will be kept in custody by or on behalf of a Clearing System as central depository for securities until [, in case of the Permanent Global Note,] all obligations of the Issuer under the Notes have been satisfied.

2. STATUS AND GUARANTEE

2.1 Ranking

[The obligations under the Notes constitute unsecured and [un]subordinated obligations of the Issuer ranking pari passu without any preference among themselves and pari passu with all other, present and future, unsecured and [un]subordinated obligations of the Issuer, unless such obligations are given priority under mandatory provisions of statutory law.][●]

[The Notes constitute direct, unsecured and subordinated obligations of the Issuer.]

[[Qualified] subordination clause:

In the insolvency or liquidation of the Issuer, the obligations of the Issuer under the Notes will rank:

(a) junior to all present or future unsubordinated instruments or obligations of the Issuer[.];[;]

[

(b) whereby:

(i) All claims under the Notes, including but not limited to the claims for payment of the Principal Amount[, the Call Redemption Amount] and the payment of distributions, applying mutatis mutandis in accordance with section 19 (2) sentence 2 of the German Insolvency Code (*Insolvenzordnung*, InsO) are subordinated to all claims of other current or future creditors in such a manner that any payments of principal and interest under the Notes may be demanded only after satisfaction of all other creditors ranking as stipulated in section 39 (1) nos. 1 to 5 InsO, i.e. at the ranking position stipulated in section 39 (2) InsO. A waiver with respect to the claims is not possible.]

[[ii)][●]

Paragraphs [(i)][●] [to] [(iii)][●] apply both before and after the opening of insolvency proceedings.]

[[v)][●]

In all other respects, the Noteholders are entitled without restriction to assert their rights under the Notes and to claim performance.]

[[vi]]

For the avoidance of doubt, this clause constitutes an agreement for the benefit of all creditors of the Issuer as a whole (*Gläubigersamtheit*) applying mutatis mutandis within the meaning of section 328 (2) of the German Civil Code (*Bürgerliches Gesetzbuch*). Any cancellation of this subordination agreement without the creditors' cooperation will therefore be permitted only in the event that the criteria for insolvency (paragraph (iii)) are not met or no longer met in respect of the Issuer.]

[(c)] pari passu among themselves; and

[(d)] senior to [all present or future (a) obligations under any [CRR Instruments] [and] [or] [CRR II Instruments], and (b) all other subordinated instruments or obligations of the Issuer ranking or expressed to rank subordinated to the obligations of the Issuer under the Notes.

[(e)] Pre-insolvency enforcement block/non-payment

Definitions:

Reason for opening insolvency proceedings refers to the inability to pay within the meaning of § 17 German Insolvency Code (*Insolvenzordnung*), imminent inability to pay within the meaning of § 18 German Insolvency Code and overindebtedness within the meaning of § 19 German Insolvency Code. Impending overindebtedness does not constitute reasons for opening insolvency proceedings;

If and to the extent that the partial or complete satisfaction of one or more or all of the Noteholders's claims (e.g. repayment, interest and other ancillary claims) would give rise to at least one reason for opening insolvency proceedings against the Issuer, the Noteholder cannot enforce this claim or these claims in a legally binding manner outside of insolvency proceedings (payment ban for the Noteholder). The payment prohibition applies for an indefinite period until such time as the fulfillment of the claim by the Issuer no longer gives rise to a reason for opening insolvency proceedings or all other creditors of the Issuer have agreed to the lifting of the payment prohibition. This means that claims arising from the Notes can only be legally enforced outside insolvency proceedings once the payment prohibition has been lifted.

Subordination Agreement

In the event of insolvency proceedings on the assets of the Issuer or the liquidation of the Issuer, the claims arising from the Notes shall rank behind all non-subordinated claims and all subordinated claims within the meaning of § 39 para. 1 nos. 1 to 5 of the German Insolvency Code.

Noteholders shall not be entitled to further interest or any additional amounts as a result of such payment.

4.4 Discharge

The Issuer and the Guarantor shall be discharged by payment to, or to the order of, the Clearing System.

]

[●]

1.4 Clearing System

The Global Notes will be kept in custody by or on behalf of a Clearing System as central depository for securities until [, in case of the Permanent Global Note,] all obligations of the Issuer under the Notes have been satisfied.

2. STATUS AND GUARANTEE

2.1 Ranking

[The obligations under the Notes constitute unsecured and [un]subordinated obligations of the Issuer ranking pari passu without any preference among themselves and pari passu with all other, present and future, unsecured and [un]subordinated obligations of the Issuer, unless such obligations are given priority under mandatory provisions of statutory law.][●]

[The Notes constitute direct, unsecured and subordinated obligations of the Issuer.]

[[Qualified] subordination clause:

In the insolvency or liquidation of the Issuer, the obligations of the Issuer under the Notes will rank:

(a) junior to all present or future unsubordinated instruments or obligations of the Issuer[.];]

[

(b) whereby:

(i) All claims under the Notes, including but not limited to the claims for payment of the Principal Amount[, the Call Redemption Amount] and the payment of distributions, applying mutatis mutandis in accordance with section 19 (2) sentence 2 of the German Insolvency Code (*Insolvenzordnung*, InsO) are subordinated to all claims of other current or future creditors in such a manner that any payments of principal and interest under the Notes may be demanded only after satisfaction of all other creditors ranking as stipulated in section 39 (1) nos. 1 to 5 InsO, i.e. at the ranking position stipulated in section 39 (2) InsO. A waiver with respect to the claims is not possible.]

[[ii)][●]

Payments under the Notes may only be demanded from future annual net profits, from any liquidation surplus or from other disposable assets.]

[[iii)][●]

The Noteholders may not demand satisfaction of their claims if this results, or threatens to result, in the Issuer becoming overindebted (*überschuldet*) or unable to pay its debts (*zahlungsunfähig*) within applying mutatis mutandis the meaning of German insolvency law.]

[[iv)][●]

Paragraphs [(i)][●] [to] [(iii)][●] apply both before and after the opening of insolvency proceedings.]

[[v)][●]

In all other respects, the Noteholders are entitled without restriction to assert their rights under the Notes and to claim performance.]

[[vi]] [•]

For the avoidance of doubt, this clause constitutes an agreement for the benefit of all creditors of the Issuer as a whole (*Gläubigersamtheit*) applying mutatis mutandis within the meaning of section 328 (2) of the German Civil Code (*Bürgerliches Gesetzbuch*). Any cancellation of this subordination agreement without the creditors' cooperation will therefore be permitted only in the event that the criteria for insolvency (paragraph (iii)) are not met or no longer met in respect of the Issuer.]

[•][•]

]

[(c)] [•] pari passu among themselves; and

[(d)] [•] senior to [all present or future (a) obligations under any [CRR Instruments] [and] [or] [CRR II Instruments], and (b)] all other subordinated instruments or obligations of the Issuer ranking or expressed to rank subordinated to the obligations of the Issuer under the Notes.

[(e)] [•] Pre-insolvency enforcement block/non-payment

Definitions:

Reason for opening insolvency proceedings refers to the inability to pay within the meaning of § 17 German Insolvency Code (*Insolvenzordnung*), imminent inability to pay within the meaning of § 18 German Insolvency Code and overindebtedness within the meaning of § 19 German Insolvency Code. Impending overindebtedness does not constitute reasons for opening insolvency proceedings;

If and to the extent that the partial or complete satisfaction of one or more or all of the Noteholders's claims (e.g. repayment, interest and other ancillary claims) would give rise to at least one reason for opening insolvency proceedings against the Issuer, the Noteholder cannot enforce this claim or these claims in a legally binding manner outside of insolvency proceedings (payment ban for the Noteholder). The payment prohibition applies for an indefinite period until such time as the fulfillment of the claim by the Issuer no longer gives rise to a reason for opening insolvency proceedings or all other creditors of the Issuer have agreed to the lifting of the payment prohibition. This means that claims arising from the Notes can only be legally enforced outside insolvency proceedings once the payment prohibition has been lifted.

Subordination Agreement

In the event of insolvency proceedings on the assets of the Issuer or the liquidation of the Issuer, the claims arising from the Notes shall rank behind all non-subordinated claims and all subordinated claims within the meaning of § 39 para. 1 nos. 1 to 5 of the German Insolvency Code.

The Guarantee II constitutes a contract for the benefit of the Noteholders from time to time as third party beneficiaries in accordance with section 328 subparagraph 1 German Civil Code (*Bürgerliches Gesetzbuch*), giving rise to the right of each Noteholder to require performance of the Guarantee II directly from the Guarantor and to enforce the Guarantee II directly against the Guarantor.

Noteholders shall not be entitled to further interest or any additional amounts as a result of such payment.

4.4 Discharge

The Issuer and the Guarantor shall be discharged by payment to, or to the order of, the Clearing System.

For the avoidance of doubt, this clause constitutes an agreement for the benefit of all creditors of the Issuer as a whole (*Gläubigergesamtheit*) applying mutatis mutandis within the meaning of section 328 (2) of the German Civil Code (*Bürgerliches Gesetzbuch*). Any cancellation of this subordination agreement without the creditors' cooperation will therefore be permitted only in the event that the criteria for insolvency (paragraph (iii)) are not met or no longer met in respect of the Issuer.]

[(d)][•] senior to [all present or future (a) obligations under any [CRR Instruments] [and] [or] [CRR II Instruments], and (b)] all other subordinated instruments or obligations of the Issuer ranking or expressed to rank subordinated to the obligations of the Issuer under the Notes.

[(e)][•] Pre-insolvency enforcement block/non-payment

Definitions:

Reason for opening insolvency proceedings refers to the inability to pay within the meaning of § 17 German Insolvency Code (*Insolvenzordnung*), imminent inability to pay within the meaning of § 18 German Insolvency Code and overindebtedness within the meaning of § 19 German Insolvency Code. Impending overindebtedness does not constitute reasons for opening insolvency proceedings;

If and to the extent that the partial or complete satisfaction of one or more or all of the Noteholders's claims (e.g. repayment, interest and other ancillary claims) would give rise to at least one reason for opening insolvency proceedings against the Issuer, the Noteholder cannot enforce this claim or these claims in a legally binding manner outside of insolvency proceedings (payment ban for the Noteholder). The payment prohibition applies for an indefinite period until such time as the fulfillment of the claim by the Issuer no longer gives

rise to a reason for opening insolvency proceedings or all other creditors of the Issuer have agreed to the lifting of the payment prohibition. This means that claims arising from the Notes can only be legally enforced outside insolvency proceedings once the payment prohibition has been lifted.

Subordination Agreement

In the event of insolvency proceedings on the assets of the Issuer or the liquidation of the Issuer, the claims arising from the Notes shall rank behind all non-subordinated claims and all subordinated claims within the meaning of § 39 para. 1 nos. 1 to 5 of the German Insolvency Code.

All determinations made under these Terms and Conditions will reflect the fact that such Notes issued and directly held by the Issuer have been issued for no consideration (the issue price for those Notes will be deemed to be 0). 4. STATUS AND GUARANTEE

4.1 Ranking

[The obligations under the Notes constitute unsecured and [un]subordinated obligations of the Issuer ranking pari passu without any preference among themselves and pari passu with all other, present and future, unsecured and [un]subordinated obligations of the Issuer, unless such obligations are given priority under mandatory provisions of statutory law.][●]

[The Notes constitute direct, unsecured and subordinated obligations of the Issuer.]

[[Qualified] subordination clause:

In the insolvency or liquidation of the Issuer, the obligations of the Issuer under the Notes will rank:

- (a) junior to all present or future unsubordinated instruments or obligations of the Issuer[.][;]

[

- (b) whereby:

- [(i) All claims under the Notes, including but not limited to the claims for payment of the Principal Amount[, the Call Redemption Amount] and the payment of distributions, applying mutatis mutandis in accordance with section 19 (2) sentence 2 of the German Insolvency Code (*Insolvenzordnung*, InsO) are subordinated to all claims of other current or future creditors in such a manner that any payments of principal and interest under the Notes may be demanded only after satisfaction of all other creditors ranking as stipulated in section 39 (1) nos. 1 to 5 InsO, i.e. at the ranking position stipulated in section 39 (2) InsO. A waiver with respect to the claims is not possible.]

[[(ii)][●]

Payments under the Notes may only be demanded from future annual net profits, from any liquidation surplus or from other disposable assets.]

[(iv)][•]

Paragraphs [(i)][•] [to] [(iii)][•] apply both before and after the opening of insolvency proceedings.]

[(v)][•]

In all other respects, the Noteholders are entitled without restriction to assert their rights under the Notes and to claim performance.]

[(vi)][•]

For the avoidance of doubt, this clause constitutes an agreement for the benefit of all creditors of the Issuer as a whole (*Gläubigergesamtheit*) applying mutatis mutandis within the meaning of section 328 (2) of the German Civil Code (*Bürgerliches Gesetzbuch*). Any cancellation of this subordination agreement without the creditors' cooperation will therefore be permitted only in the event that the criteria for insolvency (paragraph (iii)) are not met or no longer met in respect of the Issuer.]

[•][•]

]

[(c)][•] pari passu among themselves; and

[(d)][•] senior to [all present or future (a) obligations under any [CRR Instruments] [and] [or] [CRR II Instruments], and (b)] all other subordinated instruments or obligations of the Issuer ranking or expressed to rank subordinated to the obligations of the Issuer under the Notes.

[(e)][•] Pre-insolvency enforcement block/non-payment

Definitions:

Reason for opening insolvency proceedings refers to the inability to pay within the meaning of § 17 German Insolvency Code (*Insolvenzordnung*), imminent inability to pay within the meaning of § 18 German Insolvency Code and overindebtedness within the meaning of § 19 German Insolvency Code. Impending overindebtedness does not constitute reasons for opening insolvency proceedings;

If and to the extent that the partial or complete satisfaction of one or more or all of the Noteholders's claims (e.g. repayment, interest and other ancillary claims) would give rise to at least one reason for opening insolvency proceedings against the Issuer, the Noteholder cannot enforce this claim or these claims in a legally binding manner outside of insolvency proceedings (payment ban for the Noteholder). The payment prohibition applies for an indefinite period until such time as the fulfillment of the claim by the Issuer no longer gives

rise to a reason for opening insolvency proceedings or all other creditors of the Issuer have agreed to the lifting of the payment prohibition. This means that claims arising from the Notes can only be legally enforced outside insolvency proceedings once the payment prohibition has been lifted.

Subordination Agreement

In the event of insolvency proceedings on the assets of the Issuer or the liquidation of the Issuer, the claims arising from the Notes shall rank behind all non-subordinated claims and all subordinated claims within the meaning of § 39 para. 1 nos. 1 to 5 of the German Insolvency Code.

The Guarantee II constitutes a contract for the benefit of the Noteholders from time to time as third party beneficiaries in accordance with section 328 subparagraph 1 German Civil Code (*Bürgerliches Gesetzbuch*), giving rise to the right of each Noteholder to require performance of the Guarantee II directly from the Guarantor and to enforce the Guarantee II directly against the Guarantor.

1.4 Clearing System

The Global Notes will be kept in custody by or on behalf of a Clearing System as central depository for securities until[, in case of the Permanent Global Note,] all obligations of the Issuer under the Notes have been satisfied.

2. STATUS

2.1 Ranking

The Notes constitute direct, unsecured and subordinated obligations of the Issuer, and Tier 2 Instruments.

[[Qualified] subordination clause:

In the insolvency or liquidation of the Issuer, the obligations of the Issuer under the Notes will rank:

(a) junior to all present or future unsubordinated instruments or obligations of the Issuer[.];]

[

(b) whereby:

(i) All claims under the Notes, including but not limited to the claims for payment of the Principal Amount[, the Call Redemption Amount] and the payment of distributions, applying mutatis mutandis in accordance with section 19 (2) sentence 2 of the German Insolvency Code (*Insolvenzordnung*, InsO) are subordinated to all claims of other current or future creditors in such a manner that any payments of principal and interest under the Notes may be demanded only after satisfaction of all other creditors ranking as stipulated in section 39 (1) nos. 1 to 5 InsO, i.e. at the ranking position stipulated in section 39 (2) InsO. A waiver with respect to the claims is not possible.]

[[ii)]]

Payments under the Notes may only be demanded from future annual net profits, from any liquidation surplus or from other disposable assets.]

[[iii)]]

The Noteholders may not demand satisfaction of their claims if this results, or threatens to result, in the Issuer becoming overindebted (*überschuldet*) or unable to pay its debts (*zahlungsunfähig*) within applying mutatis mutandis the meaning of German insolvency law.]

[[iv)]]

Paragraphs [(i)] [to] [(iii)] apply both before and after the opening of insolvency proceedings.]

[[v)]]

In all other respects, the Noteholders are entitled without restriction to assert their rights under the Notes and to claim performance.]

[[vi)]]

For the avoidance of doubt, this clause constitutes an agreement for the benefit of all creditors of the Issuer as a whole (*Gläubigersamtheit*) applying mutatis mutandis within the meaning of section 328 (2) of the German Civil Code (*Bürgerliches Gesetzbuch*). Any cancellation of this subordination agreement without the creditors' cooperation will therefore be permitted only in the event that the criteria for insolvency (paragraph (iii)) are not met or no longer met in respect of the Issuer.]

[•][•]

]

[(c)][•] pari passu among themselves; and

[(d)][•] senior to [all present or future (a) obligations under any [CRR Instruments] [and] [or] [CRR II Instruments], and (b)] all other subordinated instruments or obligations of the Issuer ranking or expressed to rank subordinated to the obligations of the Issuer under the Notes.

[(e)][•] Pre-insolvency enforcement block/non-payment

Definitions:

Reason for opening insolvency proceedings refers to the inability to pay within the meaning of § 17 German Insolvency Code (*Insolvenzordnung*), imminent inability to pay within the meaning of § 18 German Insolvency Code and overindebtedness within the meaning of § 19 German Insolvency Code. Impending overindebtedness does not constitute reasons for opening insolvency proceedings;

If and to the extent that the partial or complete satisfaction of one or more or all of the Noteholders's claims (e.g. repayment, interest and other ancillary claims) would give rise to at least one reason for opening insolvency proceedings against the Issuer, the Noteholder cannot enforce this claim or these claims in a legally binding manner outside of insolvency proceedings (payment ban for the Noteholder). The payment prohibition applies for an indefinite period until such time as the fulfillment of the claim by the Issuer no longer gives rise to a reason for opening insolvency proceedings or all other creditors of the Issuer have agreed to the lifting of the payment prohibition. This means that claims arising from the Notes can only be legally enforced outside insolvency proceedings once the payment prohibition has been lifted.

Subordination Agreement

In the event of insolvency proceedings on the assets of the Issuer or the liquidation of the Issuer, the claims arising from the Notes shall rank behind all non-subordinated claims and all subordinated claims within the meaning of § 39 para. 1 nos. 1 to 5 of the German Insolvency Code.

[•]

[•]

2.2 No Set-off or Security

Claims of the Issuer are not permitted to be set-off against repayment obligations of the Issuer under these Notes, and no contractual collateral may be provided by the Issuer or any third person for the liabilities constituted by the Notes. The Notes are neither secured nor subject to a guarantee that enhances the seniority of the claims under the Notes. The Notes are not subject to any arrangement,

contractual or otherwise, that enhances the seniority of the claims under the Notes. No subsequent agreement may limit the subordination pursuant to this Clause 2.2.

3. DISTRIBUTIONS

3.1 [Relevant] Distribution Rate and Distribution Payment Dates

[In case the Notes are issued with a constant coupon insert: The Notes shall bear distributions on their Current Principal Amount at the rate of [●] per cent. per annum (the **Rate of Distributions**) (and with respect to each Calculation Period) from and including [●] (the **Distribution Commencement Date**) [to and excluding the Maturity Date]. [specified dates]	[specified dates]	[specified dates]	[specified rates]

Distributions for each Distribution Period will fall due in accordance with the provisions as set out in Clause 4.5.]

3.2 Calculation of Amount of Distributions

The amount of distributions shall be calculated by applying the [Relevant] Rate of Distributions to the Current Principal Amount multiplying such sum by the applicable Day Count Fraction, and rounding the resultant figure to the nearest sub-unit of the Specified Currency, half of such sub-unit being rounded upwards or otherwise in accordance with the applicable market convention.

3.3 Default Distributions

The Notes shall cease to bear distributions from the expiry of the calendar day preceding the due date for redemption (if the Notes are redeemed). If the Issuer fails to redeem the Notes when due, distributions shall continue to accrue on the Current Principal Amount of the Notes from and including the due date for redemption to but excluding the date of actual redemption of the Notes at the default rate of distributions established by law. This does not affect any additional rights that might be available to the Noteholders.

4. PAYMENTS

4.3 Manner of Payment

Subject to applicable fiscal and other laws and regulations, payments of amounts due in respect of the Notes shall be made in the Specified Currency.

4.4 If the Issuer determines that it is impossible to make payments of amounts due on the Notes in freely negotiable and convertible funds on the relevant due date for reasons beyond its control or that the Specified Currency or any successor currency provided for by law (the Successor Currency) is no longer used for the settlement of international financial transactions, the Issuer may fulfil its payment obligations by making such payments in Euro on the relevant due date on the basis of the Applicable Exchange Rate. Noteholders shall not be entitled to further interest or any additional amounts as a result of such payment. Discharge

The Issuer shall be discharged by payment to, or to the order of, the Clearing System.

4.5 Payment Business Day

If the due date for any payment in respect of the Notes would otherwise fall on a calendar day which is not a Payment Business Day, the Noteholders shall not be entitled to payment until the next following Payment Business Day in the relevant place and shall not be entitled to further distributions or other payment in respect of such delay.

[The Issuer does not have a right to redeem the Notes early for reasons of taxation.]

[The Notes may be redeemed at the option of the Issuer in whole, but not in part, [at any time][on the next Distribution Payment Date] by giving not less than [*insert number of days*] Payment Business Days and nor more than [*insert number of days*] Payment Business Days prior notice of redemption to the Fiscal Agent and, in accordance with Clause 10, to the Noteholders (which notice shall be irrevocable), if there is a change in the applicable tax treatment of the Notes, including without limitation, a Tax Deductibility Event, or a Gross-up Event, which is material and was not reasonably foreseeable at the time of the issuance of the Notes, and which the Issuer, in accordance with and subject to Article 78 para. 4 of the CRR[II], if so required, demonstrates to the satisfaction of the Competent Authority, provided that the redemption conditions laid down in Clause 5.6 are met.]

5.5 Early Redemption for Regulatory Reasons

The Notes may be redeemed at the option of the Issuer in whole, but not in part, [at any time][on the next Distribution Payment Date] by giving not less than [*insert number of days*] Payment Business Days and nor more than [*insert number of days*] Payment Business Days prior notice of redemption to the Fiscal Agent and, in accordance with Clause 10, to the Noteholders (which notice shall be irrevocable), if there is a change in the regulatory classification of the Notes that would be likely to result in their full or partial exclusion from own funds or reclassification as a lower quality form of own funds, if applicable, and provided that the following conditions are met: (i) the Competent Authority considers such a change to be sufficiently certain; (ii) the Issuer demonstrates to the satisfaction of the Competent Authority that the regulatory reclassification of the Notes was not reasonably foreseeable at the time of their issuance; and (iii) the redemption conditions laid down in Clause 5.6 are met.

5.6 Redemption Conditions

[Any redemption pursuant to this Clause 5 requires that the Competent Authority has granted the Issuer the prior permission in accordance with Article 78 para 1 of the CRR for the redemption, if applicable, whereas such permission may, inter alia, require that:

For the purpose of such calculation, the Issuer's loss sharing liable capital shall include any and all outstanding CET 1 Instruments and AT 1 Instruments and Similar Instruments. Following an Annual Balance Sheet Loss, there will be a corresponding reduction in the nominal amount of the Current Principal Amount equivalent to the amount of the Noteholder's share in such Annual Balance Sheet Loss. The Noteholder's aggregate share in an Annual Balance Sheet Loss cannot exceed the Current Principal Amount (as reduced and/or written up in previous fiscal years).][●]

[[Qualified] subordination clause:

In the insolvency or liquidation of the Issuer, the obligations of the Issuer under the Notes will rank:

- (a) junior to all present or future unsubordinated instruments or obligations of the Issuer[.];]

[

- (b) whereby:

- [(i) All claims under the Notes, including but not limited to the claims for payment of the Principal Amount[, the Call Redemption Amount] and the payment of distributions, applying mutatis mutandis in accordance with section 19 (2) sentence 2 of the German Insolvency Code (*Insolvenzordnung*, InsO) are subordinated to all claims of other current or future creditors in such a manner that any payments of principal and interest under the Notes may be demanded only after satisfaction of all other creditors ranking as stipulated in section 39 (1) nos. 1 to 5 InsO, i.e. at the ranking position stipulated in section 39 (2) InsO. A waiver with respect to the claims is not possible.]

[[(ii)] [●]

Payments under the Notes may only be demanded from future annual net profits, from any liquidation surplus or from other disposable assets.]

[[(iii)] [●]

The Noteholders may not demand satisfaction of their claims if this results, or threatens to result, in the Issuer becoming overindebted (*überschuldet*) or unable to pay its debts (*zahlungsunfähig*) within applying mutatis mutandis the meaning of German insolvency law.]

[[iv]]

Paragraphs [(i)] [to] [(iii)] apply both before and after the opening of insolvency proceedings.]

[[v]]

In all other respects, the Noteholders are entitled without restriction to assert their rights under the Notes and to claim performance.]

[[vi]]

Any cancellation of this subordination agreement without the creditors' cooperation will therefore be permitted only in the event that the criteria for insolvency (paragraph (iii)) are not met or no longer met in respect of the Issuer.]

[]

]

[(c)] pari passu among themselves; and

[(d)] senior to [all present or future (a) obligations under any [CRR Instruments] [and] [or] [CRR II Instruments], and (b)] all other subordinated instruments or obligations of the Issuer ranking or expressed to rank subordinated to the obligations of the Issuer under the Notes.

[(e)] Pre-insolvency enforcement block/non-payment

Definitions:

Reason for opening insolvency proceedings refers to the inability to pay within the meaning of § 17 German Insolvency Code (*Insolvenzordnung*), imminent inability to pay within the meaning of § 18 German Insolvency Code and overindebtedness within the meaning of § 19 German Insolvency Code. Impending overindebtedness does not constitute reasons for opening insolvency proceedings;

If and to the extent that the partial or complete satisfaction of one or more or all of the Noteholders's claims (e.g. repayment, interest and other ancillary claims) would give rise to at least one reason for opening insolvency proceedings against the Issuer, the Noteholder cannot enforce this claim or these claims in a legally binding manner outside of insolvency proceedings (payment ban for the Noteholder). The payment prohibition applies for an indefinite period until such time as the fulfillment of the claim by the Issuer no longer gives rise to a reason for opening insolvency proceedings or all other creditors of the Issuer have agreed to the lifting of the payment prohibition. This means that claims arising from the Notes can only be legally enforced outside insolvency proceedings once the payment prohibition has been lifted.

Subordination Agreement

4. STATUS

[The obligations under the [Notes][Bonds] constitute unsecured and unsubordinated obligations of the Issuer ranking pari passu without any preference among themselves and pari passu with all other, present and future, unsecured and unsubordinated obligations of the Issuer, unless such obligations are given priority under mandatory provisions of statutory law.][●]

[The [Notes][Bonds] constitute direct, unsecured and subordinated obligations of the Issuer.]

[[Qualified] subordination clause:

In the insolvency or liquidation of the Issuer, the obligations of the Issuer under the [Notes][Bonds] will rank:

- (a) junior to all present or future unsubordinated instruments or obligations of the Issuer[.][;]

[

- (b) whereby:

- [(i) All claims under the [Notes][Bonds], including but not limited to the claims for payment of the Principal Amount[, the Call Redemption Amount] and the payment of distributions, applying mutatis mutandis in accordance with section 19 (2) sentence 2 of the German Insolvency Code (Insolvenzordnung, InsO) are subordinated to all claims of other current or future creditors in such a manner that any payments of principal and interest under the [Notes][Bonds] may be demanded only after satisfaction of all other creditors ranking as stipulated in section 39 (1) nos. 1 to 5 InsO, i.e. at the ranking position stipulated in section 39 (2) InsO. A waiver with respect to the claims is not possible.]

[[ii]] [•] Payments under the [Notes][Bonds] may only be demanded from future annual net profits, from any liquidation surplus or from other disposable assets.]

[[iii]] [•] The [Noteholders][Bondholders] may not demand satisfaction of their claims if this results, or threatens to result, in the Issuer becoming overindebted (überschuldet) or unable to pay its debts (zahlungsunfähig) within applying mutatis mutandis the meaning of German insolvency law.]

[[iv]] [•] Paragraphs [(i)] [•] [to] [(iii)] [•] apply both before and after the opening of insolvency proceedings.]

[[vi]] [•] For the avoidance of doubt, this clause constitutes an agreement for the benefit of all creditors of the Issuer as a whole (Gläubigergesamtheit) applying mutatis mutandis within the meaning of section 328 (2) of the German Civil Code (Bürgerliches Gesetzbuch). Any cancellation of this subordination agreement without the creditors' cooperation will therefore be permitted only in the event that the criteria for insolvency (paragraph (iii)) are not met or no longer met in respect of the Issuer.]

[•][•]

]

[(c)] [•] pari passu among themselves; and

[(d)] [•] senior to [all present or future (a) obligations under any [CRR Instruments] [and] [or] [CRR II Instruments], and (b) all other subordinated instruments or obligations of the Issuer ranking or expressed to rank subordinated to the obligations of the Issuer under the [Notes][Bonds].

[(e)] [•] Pre-insolvency enforcement block/non-payment

Definitions:

Reason for opening insolvency proceedings refers to the inability to pay within the meaning of § 17 German Insolvency Code (*Insolvenzordnung*), imminent inability to pay within the meaning of § 18 German Insolvency Code and overindebtedness within the meaning of § 19 German Insolvency Code. Impending overindebtedness does not constitute reasons for opening insolvency proceedings;

If and to the extent that the partial or complete satisfaction of one or more or all of the [Noteholders][Bondholders]'s claims (e.g. repayment, interest and other ancillary claims) would give rise to at least one reason for opening insolvency proceedings against the Issuer, the [Noteholder][Bondholder] cannot enforce this claim or these claims in a legally binding manner outside of insolvency proceedings (payment ban for the [Noteholder][Bondholder]). The payment prohibition applies for an indefinite period until such time as the fulfillment of the claim by the Issuer no longer gives rise to a reason for opening insolvency proceedings or all other creditors of the Issuer have agreed to the lifting of the payment prohibition. This means that claims arising from the [Notes][Bonds] can only be legally enforced outside insolvency proceedings once the payment prohibition has been lifted.

Subordination Agreement

In the event of insolvency proceedings on the assets of the Issuer or the liquidation of the Issuer, the claims arising from the [Notes][Bonds] shall rank behind all non-subordinated

claims and all subordinated claims within the meaning of § 39 para. 1 nos. 1 to 5 of the German Insolvency Code.

4. STATUS AND GUARANTEE

4.1 Ranking

[The obligations under the [Notes][Bonds] constitute unsecured and [un]subordinated obligations of the Issuer ranking pari passu without any preference among themselves and pari passu with all other, present and future, unsecured and [un]subordinated obligations of the Issuer, unless such obligations are given priority under mandatory provisions of statutory law.][●]

[[Qualified] subordination clause:

A waiver with respect to the claims is not possible.]

[(ii)] [•]

[(iv)] [•]

Any cancellation of this subordination agreement without the creditors' cooperation will therefore be permitted only in the event that the criteria for insolvency (paragraph (iii)) are not met or no longer met in respect of the Issuer.]

[•][•]

]

[(c)] [•] pari passu among themselves; and

[(d)] [•] senior to [all present or future (a) obligations under any [CRR Instruments] [and] [or] [CRR II Instruments], and (b)] all other subordinated instruments or obligations of the Issuer ranking or expressed to rank subordinated to the obligations of the Issuer under the [Notes][Bonds].

Impending overindebtedness does not constitute reasons for opening insolvency proceedings;

If and to the extent that the partial or complete satisfaction of one or more or all of the [Noteholders][Bondholders]'s claims (e.g. repayment, interest and other ancillary claims) would give rise to at least one reason for opening insolvency proceedings against the Issuer, the [Noteholder][Bondholder] cannot enforce this claim or these claims in a legally binding manner outside of insolvency proceedings (payment ban for the [Noteholder][Bondholder]). The payment prohibition applies for an indefinite period until such time as the fulfillment of

the claim by the Issuer no longer gives rise to a reason for opening insolvency proceedings or all other creditors of the Issuer have agreed to the lifting of the payment prohibition. This means that claims arising from the [Notes][Bonds] can only be legally enforced outside insolvency proceedings once the payment prohibition has been lifted.

Subordination Agreement

In the event of insolvency proceedings on the assets of the Issuer or the liquidation of the Issuer, the claims arising from the [Notes][Bonds] shall rank behind all non-subordinated claims and all subordinated claims within the meaning of § 39 para. 1 nos. 1 to 5 of the German Insolvency Code.

13. MEETINGS OF [NOTEHOLDERS][BONDHOLDERS]

[Articles 470-3 - 470-19 of the Companies Act 1915 are not applicable to the [Notes][Bonds].]

[The Issuer may, through the Security Trustee, from time to time call meetings of [Noteholders][Bondholders] for the purpose of consultation with [Noteholders][Bondholders] or for the purpose of obtaining the consent of [Noteholders][Bondholders] on matters which in terms of the Final Terms [and] [or] require the approval of a [Noteholders'] [Bondholders'] meeting and to effect any change to the applicable Terms and Conditions of the [Notes][Bonds].

A meeting of [Noteholders][Bondholders] shall be called by the Directors of the Issuer by giving the Security Trustee not less than twenty-one (21) days' notice in writing. A meeting of [Noteholders][Bondholders] shall only validly and properly proceed to business if there is a quorum present at the commencement of the meeting. For this purpose, at least two [Noteholders][Bondholders] present, in person or by proxy, representing not less than [fifty per cent (50%)] [●] in nominal value of the [Notes][Bonds] then outstanding, shall constitute a quorum. If a quorum is not present within 30 minutes from the time scheduled for the commencement of the meeting as indicated on the notice convening same, the meeting shall stand adjourned to a place, date and time as shall be communicated by the Directors of the Issuer to the [Noteholders][Bondholders] present at that meeting. In the event of decisions which are required to be taken at the meeting, the Directors of the Issuer or their representative shall present to the [Noteholders][Bondholders] the reasons why it is deemed necessary or desirable and appropriate that a particular decision is taken. The meeting shall allow reasonable and

adequate time to [Noteholders][Bondholders] to present their views to the Issuer and the other [Noteholders][Bondholders] present at the meeting. The meeting shall then put the matter as proposed by the Issuer to a vote of the [Noteholders][Bondholders] present at the time at which the vote is being taken, and any [Noteholders][Bondholders] taken into account for the purpose of constituting a quorum who are no longer present for the taking of the vote shall not be taken into account for the purpose of such vote.

The voting process shall be managed by the person or company in charge as of the Issuer under the supervision and scrutiny of [the auditors of the Issuer] [and] [the Security Trustee] [and] [●].

The proposal placed before a meeting of [Noteholders][Bondholders] shall only be considered approved if at least [seventy-five per cent (75%)] [●] in nominal value of the [Noteholders][Bondholders] present at the meeting at the time when the vote is being taken, in person or by proxy, shall have voted in favour of the proposal.

Save for the above, the rules generally applicable to proceedings at general meetings of shareholders of the Issuer shall mutatis mutandis apply to meetings of [Noteholders][Bondholders].]

4. STATUS AND GUARANTEE

4.1 Ranking

[The obligations under the [Notes][Bonds] constitute unsecured and [un]subordinated obligations of the Issuer ranking pari passu without any preference among themselves and pari passu with all other, present and future, unsecured and [un]subordinated obligations of the Issuer, unless such obligations are given priority under mandatory provisions of statutory law.][●]

[[Qualified] subordination clause:

In the insolvency or liquidation of the Issuer, the obligations of the Issuer under the [Notes][Bonds] will rank:

- (a) junior to all present or future unsubordinated instruments or obligations of the Issuer[.][;]

[

- (b) whereby:

- (i) All claims under the [Notes][Bonds], including but not limited to the claims for payment of the Principal Amount[, the Call Redemption Amount] and the payment of distributions, applying mutatis mutandis in accordance with section 19 (2) sentence 2 of the German Insolvency Code (*Insolvenzordnung*, InsO) are subordinated to all claims of other current or future creditors in such a manner that any payments of principal and interest under the [Notes][Bonds] may be demanded only after satisfaction of all other creditors ranking as stipulated in section 39 (1) nos. 1 to 5 InsO, i.e. at the ranking position stipulated in section 39 (2) InsO. A waiver with respect to the claims is not possible.]

[(ii)] [•]

Payments under the [Notes][Bonds] may only be demanded from future annual net profits, from any liquidation surplus or from other disposable assets.]

[(iii)] [•]

The [Noteholders][Bondholders] may not demand satisfaction of their claims if this results, or threatens to result, in the Issuer becoming overindebted (*überschuldet*) or unable to pay its debts (*zahlungsunfähig*) within applying mutatis mutandis the meaning of German insolvency law.]

[(iv)] [•]

Paragraphs [(i)] [•] [to] [(iii)] [•] apply both before and after the opening of insolvency proceedings.]

[(v)] [•]

In all other respects, the [Noteholders][Bondholders] are entitled without restriction to assert their rights under the [Notes][Notes] and to claim performance.]

[(vi)] [•]

For the avoidance of doubt, this clause constitutes an agreement for the benefit of all creditors of the Issuer as a whole (*Gläubigergesamtheit*) applying mutatis mutandis within the meaning of section 328 (2) of the German Civil Code (*Bürgerliches Gesetzbuch*). Any cancellation of this subordination agreement without the creditors' cooperation will therefore be permitted only in the event that the criteria for insolvency (paragraph (iii)) are not met or no longer met in respect of the Issuer.]

[•][•]

]

[(c)] [•] pari passu among themselves; and

[(d)] [•] senior to [all present or future (a) obligations under any [CRR Instruments] [and] [or] [CRR II Instruments], and (b)] all other subordinated instruments or obligations of the Issuer ranking or expressed to rank subordinated to the obligations of the Issuer under the [Notes][Bonds].

[(e)] [•] Pre-insolvency enforcement block/non-payment

Definitions:

Reason for opening insolvency proceedings refers to the inability to pay within the meaning of § 17 German Insolvency Code (*Insolvenzordnung*), imminent inability to pay within the meaning of § 18 German Insolvency Code and overindebtedness within the meaning of § 19 German Insolvency Code. Impending overindebtedness does not constitute reasons for opening insolvency proceedings;

If and to the extent that the partial or complete satisfaction of one or more or all of the [Noteholders][Bondholders]'s claims (e.g. repayment, interest and other ancillary claims) would give rise to at least one reason for opening insolvency proceedings against the Issuer, the [Noteholder][Bondholder] cannot enforce this claim or these claims in a legally binding manner outside of insolvency proceedings (payment ban for the [Noteholder][Bondholder]). The payment prohibition applies for an indefinite period until such time as the fulfillment of

the claim by the Issuer no longer gives rise to a reason for opening insolvency proceedings or all other creditors of the Issuer have agreed to the lifting of the payment prohibition. This means that claims arising from the [Notes][Bonds] can only be legally enforced outside insolvency proceedings once the payment prohibition has been lifted.

Subordination Agreement

In the event of insolvency proceedings on the assets of the Issuer or the liquidation of the Issuer, the claims arising from the [Notes][Bonds] shall rank behind all non-subordinated claims and all subordinated claims within the meaning of § 39 para. 1 nos. 1 to 5 of the German Insolvency Code.

The Guarantee II constitutes a contract for the benefit of the [Noteholders][Bondholders] from time to time as third party beneficiaries in accordance with section 328 subparagraph 1 German Civil Code (*Bürgerliches Gesetzbuch*), giving rise to the right of each [Noteholder][Bondholder] to require performance of the Guarantee II directly from the Guarantor and to enforce the Guarantee II directly against the Guarantor.

Following a meeting of [Noteholders][Bondholders] held in accordance with the provisions contained hereunder, the Issuer shall, acting in accordance with the resolution(s) taken at the meeting, communicate to the [Noteholders][Bondholders] whether the necessary consent to the proposal made by the Issuer has been granted or withheld. A meeting of [Noteholders][Bondholders] shall only validly and properly proceed to business if there is a quorum present at the commencement of the meeting. For this purpose, at least two [Noteholders][Bondholders] present, in person or by proxy, representing not less than [fifty per cent (50%)] [●] in nominal value of the [Notes][Bonds] then outstanding, shall constitute a quorum. If a quorum is not present within 30 minutes from the time scheduled for the commencement of the meeting as indicated on the notice convening same, the meeting shall stand adjourned to a place, date and time as shall be communicated by the Directors of the Issuer to the [Noteholders][Bondholders] present at that meeting. An adjourned meeting shall be held not earlier than [seven] [days] [●], and not later than [fifteen (15)] [days] [●], following the original meeting. In the event of decisions which are required to be taken at the meeting, the Directors of the Issuer or their representative shall present to the [Noteholders][Bondholders] the reasons why it is deemed necessary or desirable and appropriate that a particular decision is taken. The meeting shall allow reasonable and

adequate time to [Noteholders][Bondholders] to present their views to the Issuer and the other [Noteholders][Bondholders] present at the meeting. The meeting shall then put the matter as proposed by the Issuer to a vote of the [Noteholders][Bondholders] present at the time at which the vote is being taken, and any [Noteholders][Bondholders] taken into account for the purpose of constituting a quorum who are no longer present for the taking of the vote shall not be taken into account for the purpose of such vote.

The voting process shall be managed by the person or company in charge as of the Issuer under the supervision and scrutiny of [the auditors of the Issuer] [and] [the Security Trustee] [and] [●].

The proposal placed before a meeting of [Noteholders][Bondholders] shall only be considered approved if at least [seventy-five per cent (75%)] [●] in nominal value of the [Noteholders][Bondholders] present at the meeting at the time when the vote is being taken, in person or by proxy, shall have voted in favour of the proposal.

4.1 Ranking

[The obligations under the [Notes][Bonds] constitute unsecured and [un]subordinated obligations of the Issuer ranking pari passu without any preference among themselves and pari passu with all other, present and future, unsecured and [un]subordinated obligations of the Issuer, unless such obligations are given priority under mandatory provisions of statutory law.][●]

[[Qualified] subordination clause:

In the insolvency or liquidation of the Issuer, the obligations of the Issuer under the [Notes][Bonds] will rank:

A waiver with respect to the claims is not possible.]

[(ii)] [•]

Any cancellation of this subordination agreement without the creditors' cooperation will therefore be permitted only in the event that the criteria for insolvency (paragraph (iii)) are not met or no longer met in respect of the Issuer.]

[•][•]

]

[(c)] [•] pari passu among themselves; and

[(d)] [•] senior to [all present or future (a) obligations under any [CRR Instruments] [and] [or] [CRR II Instruments], and (b)] all other subordinated instruments or obligations of the Issuer ranking or expressed to rank subordinated to the obligations of the Issuer under the [Notes][Bonds].

Impending overindebtedness does not constitute reasons for opening insolvency proceedings;

If and to the extent that the partial or complete satisfaction of one or more or all of the [Noteholders][Bondholders]'s claims (e.g. repayment, interest and other ancillary claims) would give rise to at least one reason for opening insolvency proceedings against the Issuer, the [Noteholder][Bondholder] cannot enforce this claim or these claims in a legally binding manner outside of insolvency proceedings (payment ban for the [Noteholder][Bondholder]). The payment prohibition applies for an indefinite period until such time as the fulfillment of

the claim by the Issuer no longer gives rise to a reason for opening insolvency proceedings or all other creditors of the Issuer have agreed to the lifting of the payment prohibition. This means that claims arising from the [Notes][Bonds] can only be legally enforced outside insolvency proceedings once the payment prohibition has been lifted.

Subordination Agreement

In the event of insolvency proceedings on the assets of the Issuer or the liquidation of the Issuer, the claims arising from the [Notes][Bonds] shall rank behind all non-subordinated claims and all subordinated claims within the meaning of § 39 para. 1 nos. 1 to 5 of the German Insolvency Code.

13. MEETINGS OF [NOTEHOLDERS][BONDHOLDERS]

[Articles 470-3 - 470-19 of the Companies Act 1915 are not applicable to the [Notes][Bonds].]

[The Issuer may, through the Security Trustee, from time to time call meetings of [Noteholders][Bondholders] for the purpose of consultation with [Noteholders][Bondholders] or for the purpose of obtaining the consent of [Noteholders][Bondholders] on matters which in terms of the Final Terms [and] [or] require the approval of a [Noteholders'] [Bondholders'] meeting and to effect any change to the applicable Terms and Conditions of the [Notes][Bonds].

A meeting of [Noteholders][Bondholders] shall be called by the Directors of the Issuer by giving the Security Trustee not less than twenty-one (21) days' notice in writing. Upon receiving due notice from the Directors of the Issuer, the Security Trustee shall call such meeting by giving all [Noteholders][Bondholders] listed on the register of [Noteholders][Bondholders] as at a date being not more than thirty (30) days preceding the date scheduled for the meeting, not less than fourteen (14) days' notice in writing. Such notice shall set out the time, place and date set for the meeting and the matters to be discussed or decided thereat, including, if applicable, sufficient information on any amendment to [the Terms and Conditions] [and] [or] [the Base Prospectus] that is proposed to be voted upon at the meeting and seeking the approval of the [Noteholders][Bondholders]. Following a meeting of [Noteholders][Bondholders] held in accordance with the provisions contained hereunder, the Issuer shall, acting in accordance with the resolution(s) taken at the meeting, communicate to the [Noteholders][Bondholders] whether the necessary consent to the proposal made by the Issuer has been granted or withheld. Subject to having obtained the necessary approval by the [Noteholders][Bondholders] in accordance with the provisions of this Clause 13 at a meeting called for that purpose as aforesaid, any such decision shall subsequently be given effect to by the Issuer. The amendment or waiver of any of the Terms and Conditions contained in this Securities Note may only be made with the approval of [Noteholders][Bondholders] at a meeting called and held for that purpose in accordance with the terms hereof. A meeting of [Noteholders][Bondholders] shall only validly and properly proceed to business if there is a quorum present at the commencement of the meeting. For this purpose, at least two [Noteholders][Bondholders] present, in person or by proxy, representing not less than [fifty per cent (50%)] [●] in nominal value of the [Notes][Bonds] then outstanding, shall constitute a quorum. If a quorum is not present within 30 minutes from the time scheduled for the commencement of the meeting as indicated on the notice convening same, the meeting shall stand adjourned to a place, date and time as shall be communicated by the Directors of the Issuer to the [Noteholders][Bondholders] present at that meeting. The Issuer shall within two days from the date of the original meeting publish by way of a company announcement the date, time and place where the adjourned meeting is to be held. An adjourned meeting shall be held not earlier than [seven] [days] [●], and not later than [fifteen (15)] [days] [●], following the original meeting. [Any person who in accordance with the Memorandum and Articles of Association of the Issuer is to chair the annual general meetings of shareholders shall also chair meetings of [Noteholders][Bondholders].][●]

Once a quorum is declared present by [the chairman of the meeting][●], the meeting may then proceed to business and address the matters set out in the notice convening the meeting. In the event of decisions which are required to be taken at the meeting, the Directors of the Issuer or their representative shall present to the [Noteholders][Bondholders] the reasons why it is deemed necessary or desirable and appropriate that a particular decision is taken. The meeting shall allow reasonable and

adequate time to [Noteholders][Bondholders] to present their views to the Issuer and the other [Noteholders][Bondholders] present at the meeting. The meeting shall then put the matter as proposed by the Issuer to a vote of the [Noteholders][Bondholders] present at the time at which the vote is being taken, and any [Noteholders][Bondholders] taken into account for the purpose of constituting a quorum who are no longer present for the taking of the vote shall not be taken into account for the purpose of such vote.

The voting process shall be managed by the person or company in charge as of the Issuer under the supervision and scrutiny of [the auditors of the Issuer] [and] [the Security Trustee] [and] [●].

The proposal placed before a meeting of [Noteholders][Bondholders] shall only be considered approved if at least [seventy-five per cent (75%)] [●] in nominal value of the [Noteholders][Bondholders] present at the meeting at the time when the vote is being taken, in person or by proxy, shall have voted in favour of the proposal.

Save for the above, the rules generally applicable to proceedings at general meetings of shareholders of the Issuer shall mutatis mutandis apply to meetings of [Noteholders][Bondholders].]

4. STATUS AND GUARANTEE

4.1 Ranking

[The obligations under the [Notes][Bonds] constitute unsecured and [un]subordinated obligations of the Issuer ranking pari passu without any preference among themselves and pari passu with all other, present and future, unsecured and [un]subordinated obligations of the Issuer, unless such obligations are given priority under mandatory provisions of statutory law.][●]

[[Qualified] subordination clause:

In the insolvency or liquidation of the Issuer, the obligations of the Issuer under the [Notes][Bonds] will rank:

- (a) junior to all present or future unsubordinated instruments or obligations of the Issuer[.][;]

[

- (b) whereby:

- (i) All claims under the [Notes][Bonds], including but not limited to the claims for payment of the Principal Amount[, the Call Redemption Amount] and the payment of distributions, applying mutatis mutandis in accordance with section 19 (2) sentence 2 of the German Insolvency Code (*Insolvenzordnung*, InsO) are subordinated to all claims of other current or future creditors in such a manner that any payments of principal and interest under the [Notes][Bonds] may be demanded only after satisfaction of all other creditors ranking as stipulated in section 39 (1) nos. 1 to 5 InsO, i.e. at the ranking position stipulated in section 39 (2) InsO. A waiver with respect to the claims is not possible.]

[(ii)] [•]

Payments under the [Notes][Bonds] may only be demanded from future annual net profits, from any liquidation surplus or from other disposable assets.]

[(iii)] [•]

[(iv)] [•]

Paragraphs [(i)] [•] [to] [(iii)] [•] apply both before and after the opening of insolvency proceedings.]

[(v)] [•]

In all other respects, the [Noteholders][Bondholders] are entitled without restriction to assert their rights under the [Notes][Notes] and to claim performance.]

[(vi)] [•]

For the avoidance of doubt, this clause constitutes an agreement for the benefit of all creditors of the Issuer as a whole (*Gläubigergesamtheit*) applying mutatis mutandis within the meaning of section 328 (2) of the German Civil Code (*Bürgerliches Gesetzbuch*). Any cancellation of this subordination agreement without the creditors' cooperation will therefore be permitted only in the event that the criteria for insolvency (paragraph (iii)) are not met or no longer met in respect of the Issuer.]

[•][•]

]

[(c)] [•] pari passu among themselves; and

[(d)] [•] senior to [all present or future (a) obligations under any [CRR Instruments] [and] [or] [CRR II Instruments], and (b)] all other subordinated instruments or obligations of the Issuer ranking or expressed to rank subordinated to the obligations of the Issuer under the [Notes][Bonds].

[(e)] [•] Pre-insolvency enforcement block/non-payment

Definitions:

Reason for opening insolvency proceedings refers to the inability to pay within the meaning of § 17 German Insolvency Code (*Insolvenzordnung*), imminent inability to pay within the meaning of § 18 German Insolvency Code and overindebtedness within the meaning of § 19 German Insolvency Code. Impending overindebtedness does not constitute reasons for opening insolvency proceedings;

If and to the extent that the partial or complete satisfaction of one or more or all of the [Noteholders][Bondholders]'s claims (e.g. repayment, interest and other ancillary claims) would give rise to at least one reason for opening insolvency proceedings against the Issuer, the [Noteholder][Bondholder] cannot enforce this claim or these claims in a legally binding manner outside of insolvency proceedings (payment ban for the [Noteholder][Bondholder]). The payment prohibition applies for an indefinite period until such time as the fulfillment of

the claim by the Issuer no longer gives rise to a reason for opening insolvency proceedings or all other creditors of the Issuer have agreed to the lifting of the payment prohibition. This means that claims arising from the [Notes][Bonds] can only be legally enforced outside insolvency proceedings once the payment prohibition has been lifted.

Subordination Agreement

In the event of insolvency proceedings on the assets of the Issuer or the liquidation of the Issuer, the claims arising from the [Notes][Bonds] shall rank behind all non-subordinated claims and all subordinated claims within the meaning of § 39 para. 1 nos. 1 to 5 of the German Insolvency Code.

[Articles 470-3 - 470-19 of the Companies Act 1915 are not applicable to the [Notes][Bonds].]

[The Issuer may, through the Security Trustee, from time to time call meetings of [Noteholders][Bondholders] for the purpose of consultation with [Noteholders][Bondholders] or for the purpose of obtaining the consent of [Noteholders][Bondholders] on matters which in terms of the Final Terms [and] [or] require the approval of a [Noteholders'] [Bondholders'] meeting and to effect any change to the applicable Terms and Conditions of the [Notes][Bonds].

NOW, THEREFORE, THE GUARANTOR IS HEREBY COVENANTING IN FAVOUR OF THE SECURITY TRUSTEE AS FOLLOWS:

1. INTEPRETATION

In this Guarantee III, unless the context otherwise requires:

- a. terms and expressions defined in or construed for the purposes of the Prospectus and/or the relevant Final Terms shall have the same meanings or be construed in the same manner when used in this Guarantee III, unless defined otherwise in this Guarantee III;

2. COVENANT TO PAY

In satisfaction of the conditions precedent for the issuance of the Secured Notes, and in consideration of the Noteholders acquiring the Secured Notes, the Guarantor, as duly authorised, without proof of liability or evidence and as primary obligor, hereby jointly and severally with the Issuer, unconditionally and irrevocably guarantees to the Security Trustee, for the benefit of Noteholders, the payment of, and undertakes on first duly demand in writing made by the Security Trustee on the Guarantor, to pay the Indebtedness to the Security Trustee or any balance thereof at any time due or owing under the Secured Notes in the event that the Issuer fails to pay any sum payable by it to the Noteholders pursuant to the terms of the Secured Notes as and when same shall become due.

3. CONTINUING AND UNCONDITIONAL LIABILITY

The liability of the Guarantor under this Guarantee III shall be continuing until such time as the Indebtedness is fully repaid or in the event of substitution of the Guarantor as set out in the Documentation (a "**Substitution Event**") and shall in no way be prejudiced or effected, nor shall it in any way be discharged or reduced by reason of:

- a. the bankruptcy, insolvency or winding up of the Issuer; or
- b. the incapacity or disability of the Issuer or any other person liable for any reason whatsoever; or
- c. any change in the name, style, constitution, any amalgamation or reconstruction of either the Issuer, or any Guarantor.

4. REDUCTION OF LIABILITY

The liability of the Guarantor under this Guarantee III shall be decreased from time to time to the extent, if any, that the Issuer or the Guarantor shall have made any irrevocable payment of the Indebtedness.

5. ADDITIONAL GUARANTEE

This Guarantee III is to be construed as being in addition to and in no way prejudicing any other securities or guarantees which the Security Trustee may now or hereafter hold from or on account of the Issuer and is to be binding on the Guarantor as a continuing Guarantee III until full and final settlement of all the Issuer's Indebtedness towards the Security Trustee. Moreover, the remedies provided in this Guarantee III are cumulative and are not exclusive of any remedies provided by law.

6. REPRESENTATIONS AND WARRANTIES

The Guarantor represents and warrants as at the date hereof:

- i. that it is duly incorporated and validly existing under the laws of Malta and has the power to carry on its business;
- ii. that it has power to grant this Guarantee III and that this Guarantee III is duly authorised and all corporate action has been taken by the Guarantor in accordance with its deeds of constitution and the laws of its incorporation and regulation;

- iii. that this Guarantee III constitutes and contains valid and legally binding obligations of the Guarantor enforceable in accordance with its terms;
- iv. that this Guarantee III does not and will not constitute default with respect to or run counter to any law, by-law, articles of incorporation, statute, rule, regulation, judgment, decree or permit to which the Guarantor is or may be subject; or any agreement or other instrument to which the Guarantor is a party or is subject or by which it or any of its property is bound;
- v. that this Guarantee III shall not result in or cause the creation or imposition of or oblige the Guarantor to create any encumbrance on any of that Guarantor's undertakings, assets, rights or revenues;
- vi. that it is in no way engaged in any litigation, arbitration or administrative proceeding of a material nature and nor is it threatened with any such procedures;
- vii. that the obligations binding it under this Guarantee III rank at least pari passu with all other present and future unsecured indebtedness of the Guarantor with the exception of any obligations which are mandatorily preferred by law;

All demands shall be sent to the address or facsimile or other numbers as are stated below in Article 8 as the same may be changed by notice in writing by one party to the other.

The demand shall be accompanied by a statement by the Security Trustee confirming that to the best of its knowledge, at the time of the demand, the Issuer is unable to pay any sum payable to the Noteholders pursuant to the terms of the Secured Notes as and when same shall become due.

- 7.2 All payments shall be made to the Security Trustee without any withholding or deduction for or on account of any present or future taxes or duties of whatever nature imposed or levied by way of withholding or deduction by or on behalf of Malta or any political subdivision or any authority thereof or therein having power to tax unless such withholding or deduction is required by law. In such event, the Guarantor will pay such additional amounts (and in so far as this obligation exists under any law the payment shall be grossed up by the amount of withholding or deduction), hereinafter referred to as the "**Additional Amounts**", as shall be necessary in order that the net amounts received by the Noteholders, after such withholding or deduction shall equal the respective amounts which would otherwise have been receivable in the absence of such withholding or deduction; except that no such Additional Amounts shall be payable on account of any taxes or duties which:
- (a) are payable by any person acting as custodian bank, broker or collecting agent on behalf of a Noteholder, or otherwise in any manner which does not constitute a deduction or withholding by the Issuer from payments of principal or interest made by it; or
 - (b) are payable by reason of the Noteholder having, or having had, some personal or business connection with Malta and not merely by reason of the fact that payments in respect of the Notes are, or for purposes of taxation are deemed to be, derived from sources in, or are secured in, Malta; or
 - (c) are deducted or withheld pursuant to (i) any European Union Directive or Regulation concerning the taxation of interest income, or (ii) any international treaty or understanding relating to such taxation and to which Malta or the European Union is a party, or (iii) any provision of law implementing, or complying with, or introduced to conform with, such Directive, Regulation, treaty or understanding; or
 - (d) are presented for payment more than 30 calendar days after the Relevant Date except to the extent that a Noteholder would have been entitled to additional amounts on presenting the same for payment on the last calendar day of the period of 30 calendar days assuming that day to have been a Payment Business Day; or

- (e) are withheld or deducted in relation to a Note presented for payment by or on behalf of a Noteholder who would have been able to avoid such withholding or deduction by presenting the relevant Note to another Paying Agent in a member state of the European Union; or
- (f) are deducted or withheld by a Paying Agent, Broker or Trustee from a payment if the payment could have been made by another Paying Agent, Broker or Trustee without such deduction or withholding; or
- (g) would not be payable if the Notes had been kept in safe custody with, and the payments had been collected by, a banking institution, broker or the CSD; or
- (h) are payable by reason of a change in law or practice that becomes effective more than 30 calendar days after the relevant payment of principal or interest becomes due, or is duly provided for and notice thereof is published in accordance with applicable provisions of the Conditions, whichever occurs later.

The Guarantor authorises the Security Trustee to apply any credit balance the Guarantor may have with the Security Trustee towards the satisfaction of the Indebtedness. The Security Trustee shall notify the Guarantor forthwith of the exercise of this right giving full details relating thereto.

7.3 The obligations of the Guarantor under this Guarantee III shall, without any further act or thing being required to be done or to occur, extend to the obligations of any substitute issuer which is appointed in accordance with the Documentation.

Shareholder's Equity	1,675,086
Total Liabilities	1,279,488
Total Equity and Liabilities	2,954,574

The Financial Statements of the Issuer for the financial period from 1 January 2019 to 31 December 2019 have been independently audited and have been drawn up in accordance with Directive 2014/56/EU and Regulation (EU) 537/2014.

1.6 Significant or Material Changes and recent Events and Trends

1.6.1 Significant or material change in the financial or trading position of the Issuer

There has been no significant change in the financial or trading position of the Issuer and no material adverse change in the financial position or prospects of the Issuer since 31 December 2019 the date of its last published audited financial statements.

1.6.2 Material changes in the Issuer's borrowing and funding structure since the last financial year and the expected financing of the Issuer's activities

There are no material changes in the Issuer's borrowing and funding structure since the last financial year. Financing is still based on (i) own funds (the Issuers current and potentially future own funds in regard to the Issuers intended increase of its share capital), (ii) operating income, (iii) loans granted to the Issuer by third-party financiers and (iv) future refinancing by issuing bonds.

1.6.3 Details of any recent events particular to the Issuer and which are to a material extent relevant to an evaluation of the Issuer's solvency

In connection with the so-called widespread COVID-19 pandemic, the Issuer has received the German governmental de-minimis support in a standardised small size of EUR 25,000 ("*Corona-Soforthilfe 2020*"). The extent of the impacts resulting from the COVID-19 pandemic and other events beyond the Issuers' control will depend on future developments, which are highly uncertain at this time, including new information that may emerge concerning the spread of the pandemic and actions taken to contain the coronavirus or its impact, among others.

1.6.4 Information on any known trends, uncertainties, demands, commitments or events that are reasonably likely to have a material effect on the Issuer's prospects for at least the current financial year

The following uncertainties may impact the Issuer and are potentially relevant to the Issuer's prospects at least for the current financial year: (i) successful increase of own funds (the Issuer's potentially future own funds in regard to the Issuer's intended increase of its share capital), (ii) establishment and increase of operating income and cash-flow, (iii) loans to be granted to the Issuer by third-party financiers and (iv) creation of an issuance platform for the issuance of bonds of the Issuer.

Safe for this, due to the uncertain duration and consequences of the coronavirus pandemic, the material effect on the Issuer's prospects for at least the current financial year and potentially beyond cannot be quantified at present. However, in view of the current development in connection with the coronavirus (COVID-19), the situation in many of the Issuer's core markets is challenging. The Issuer expects the coronavirus pandemic to have a reasonably likely material effect on the Issuer's prospects for at least the current financial year and potentially beyond. The extent of the impacts resulting from the COVID-19 pandemic and other events beyond the Issuer's control will depend on future developments, which are highly uncertain at this time, including new information that may emerge concerning the spread of the pandemic and actions taken to contain the coronavirus or its impact, among others.

1.7 Litigation and Arbitration

The Issuer was not engaged in any governmental, legal, arbitration, administrative or other proceedings (including any such proceedings which are pending or threatened of which the Issuer is aware) in the 12 months preceding the date of this document which are likely to have a material adverse effect upon the Issuer's financial position or profitability.

The word/figurative marks "ESTREAMER" and "E-Stream Energy" are used by the Issuer. The trademark word/figurative marks "ESTREAMER" has been registered since 4 March 2020 and has a priority date of 20 November 2019. The protection extends to the countries belonging to the European Union. The word/figurative mark "E-Stream Energy" was applied for by E-Stream Energy GmbH & Co KG for registration at the Office of the European Union for Intellectual Property (EUIPO). The trademark application was published on 26 November 2019. Opposition to this application was filed by a two-wheeler purchasing cooperative on 14 February 2020. The bicycle shopping cooperative claims protection of the word marks "E-STREAM" and "ESTREAM", which were registered on it earlier. The opposition proceedings are pending before the Office of the European Union for Intellectual Property. Until 19 August 2020, the proceedings were in the so-called cooling-off period. On 19 August 2020, the two parties agreed to extend the cooling-off period by two more years and have applied for this to the EUIPO accordingly. The two parties intend to conclude a so-called delimitation agreement under competition law. There is nevertheless a risk that the word/figurative mark "E-Stream Energy" will not be registered to the Issuer with the consequence that the Issuer would not have the right to use the mark.

3. Business Overview

3.1 Principal Activities and Markets

3.1.1 *Description of the main categories of products sold and/or services performed and Indication of any significant new products or activities*

We believe we have established ourselves as an innovator and producer of high-quality, reliable and technologically-advanced battery systems based on lithium-ion technology (“Li-Ion”) for certain sub-markets, including electromobility (“E-Mobility”). We are focused on Li-Ion battery technology, we provide battery systems for a wide range of applications. We are focused on Li-Ion technologies, which actively disrupt the battery market. Our core business is the development, manufacturing and distribution of high-performance rechargeable battery systems.

The main categories of products sold are battery packs and battery storage systems for applications on these, which include E-Mobility, home- and industrial energy storage systems. Main categories of services are consulting in regard to battery energy storage systems.

Significant new products and activities are in the field of Li-Ion battery cell production and distribution and extending our portfolio of battery storage systems including but not limited to E-Mobility applications.

3.1.2 *Most important markets and market factors*

The Issuer is active in the field of battery cells, battery packages and battery systems and develops technologies for a variety of storage solutions. The main area of activity of the Issuer is research and development (and as applicable well as the intended licensing of its technologies, processes and systems) as well and also the production of storage solutions for batteries, production and distribution on the basis of lithium-ion round cells (**'battery packaging'**). On the basis of this technologies, energy storage systems (battery systems) are designed and developed as modules and as finished applications both for the mobile sector and for the stationary sector (home and industrial storage).

The Issuer's core business is to become the production and distributiongranting of battery cells, battery packageslicences for the use of the technologies, processes, systems (**'battery packages'**) and applications (**'products'**) developed, produced and/ by it or licensed by it, as well as their production and distribution. The Issuer plans to grant non-exclusive, long-term licenses to interested manufacturers of battery storage systems to use the technologies, processes and systems and to use battery packages in own products, including in the field of E-Mobility.

3.1.3 *Development and drivers of the battery market*

The battery market, in particular the submarket for rechargeable batteries (also called secondary cells - in contrast to primary cells that cannot be recharged or can only be recharged to a very limited extent (source: <https://de.wikipedia.org/wiki/Akkumulator>)), is currently experiencing strong global growth (source: <https://www.pv-magazine.de/2018/05/24/studie-batteriemarkt-waechst-bis-2025-auf-90-milliarden-us-dollar/>). Because fossil/primary energy reserves will not be sufficient in the long term and because aspects of environmental protection are also playing an increasingly important role, new concepts are currently being developed worldwide for the intermediate storage of energy in the mobile and stationary sectors.

According to the Issuer, a key driver for the growth of the battery market is increasing electrification: more and more devices that were not previously powered by electricity or not at all are being equipped with electric drives. According to society's assessment, the development towards so-called "Industry 4.0", i.e. the intelligent networking of machines and processes in industry with the aid of information and communication technology, also plays a significant role.

Another important driver for the development of the battery market, in the Issuer's view, is increased environmental awareness and the resulting government measures to reduce CO2 emissions. In October 2014, the European Council adopted a framework for climate and energy policy by 2030 to meet the long-term objective of reducing EU greenhouse gas emissions by 80% to 95% by 2050 in the most cost-effective way possible. Within this framework, the following objectives are anchored: a binding reduction of greenhouse gas emissions within the EU by at least 40% by 2030 compared with 1990

emissions, a binding increase in the share of renewable energies in total final energy consumption to at least 27% and an increase in energy efficiency by at least 27% compared with a development without further efficiency efforts (source: https://ec.europa.eu/clima/policies/strategies/2030_en).

In the passenger car sector, an EU Regulation to reduce CO2 emissions from new passenger cars entered into force in 2009, providing for a phased reduction of CO2 emissions up to 95 g/km from 2020 (source: Article 1 of Regulation (EC) No 443/2009 of the European Parliament and of the Council of 23 April 2009 setting emission performance standards for new passenger cars as part of the Community's integrated approach to reduce CO2 emissions from passenger cars and light commercial vehicles). In March 2019, the EU Parliament approved new targets for average CO2 emissions from new cars and trucks in the EU to accelerate the transition to low-emission and zero-emission vehicles. The aim is to reduce average CO2 emissions by 37.5% for new passenger cars and 31% for light commercial vehicles by 2030 compared with the figures for 2021 (source: Legislative Resolution of the European Parliament of 27 June 2002). European Parliament legislative resolution of 16 March 2019 on the proposal for a regulation of the European Parliament and of the Council setting emission performance standards for new passenger cars and light commercial vehicles as part of the Community's integrated approach to reduce CO2 emissions from passenger cars and light commercial vehicles amending Regulation (EC) 715/2007 (recast) (COM(2017)0676 - C8-0395/2017 - 2017/0293(COD)) (COM(2017)0676 - C8-0395/2017 - 2017/0293(COD)).

3.1.4 *Breakthrough of renewable energies in the German energy mix*

According to the results of the Energy Balances Working Group, renewable energies accounted for 25.9% of total German energy production in 2014, of which 5.8% was attributable to photovoltaics. Renewable energies have meanwhile replaced lignite as the main source of energy in the energy mix. (Source: https://ag-energiebilanzen.de/#20181214_brd_stromerzeugung1990-2018, Stromerzeugung nach Energieträgern 1990 - 2018 (Status March 2019) as well as "Share of renewable energy in gross final energy consumption is rising strongly: https://www.umweltbundesamt.de/sites/default/files/medien/1410/publikationen/uba_hgp_einzahlen_2019_bf.pdf).

In the last five years, the share of renewable energies in photovoltaics in Germany has been as follows according to the Energy Balances Working Group:

year	Billion kWh	Share of gross electricity generation production in Germany (in %)
2014:	36,1	5,8
2015:	38,7	6,0
2016:	38,1	5,9
2017:	39,4	6,0
2018:	46,2	7,1

(Source: https://www.umweltbundesamt.de/sites/default/files/medien/1410/publikationen/uba_hgp_einzahlen_2019_bf.pdf)

As a result of the successive reduction or elimination of feed-in tariffs for self-produced electricity from renewable energies, the Issuer believes that lithium-ion-based battery storage is a technical solution that will lead to a further sharp increase in the number of new systems in a large number of countries (although these are at different stages of promoting energy system transformation).

3.2 **Overview of Battery Products**

3.2.1 *Technical overview*

A battery consists of several interconnected battery modules. Depending on the requirements of the specific application, in particular with regard to voltage level and necessary storage capacity, a corresponding number of battery modules are electrically connected in parallel and in series. The

modules in turn consist of an interconnection of several cells. This structure of a battery consisting of individual cells is called "packaging". Packaging is regarded as one of the most important key technologies for the everyday implementation of the storage of electrical energy. The most important objectives of research in this area are therefore to increase storage capacity, performance, safety and service life.

Lithium ion cells are usually used as the basic component of most commercially available batteries. These cells are the most powerful currently available on the market; they are characterized by high energy density, long service life and guarantee a wide range of charging cycles⁹. The Fraunhofer Institute for Systems and Innovation Research (ISI) estimates that lithium-ion batteries will dominate demand within battery technologies by 2025 at the latest.¹⁰

There are three main types of lithium ion cells: cylindrical cells, prismatic cells and pouch cells - the latter are also known as coffee bag cells. The cylindrical cell, also known as the round cell, is currently the most widely used cell format because it is relatively inexpensive, easy to manufacture and mechanically very stable. In addition, the cylindrical design achieves one of the highest energy densities compared to other forms. According to a publicly accessible study by the Fraunhofer Institute, the particularly high potential of cylindrical formats (18650 and 21700) is pointed out. Disadvantages are a lower heat dissipation and, compared to other designs, the more difficult packaging and handling of a larger number of individual cells. The technologies intend to eliminate these disadvantages as far as possible.

The manufacturers' agreement on uniform geometric dimensions of the round cells enables the Issuer to choose from different suppliers and thus, in the opinion of the Issuer, creates security of supply. The increased supply and the resulting competition among manufacturers have led to a significant reduction in costs. The use of these battery cells is thus becoming increasingly economical overall.

3.2.2 *E-Mobility*

E-mobility includes all vehicles that obtain most of their energy from the power grid, i.e. are externally rechargeable. This includes exclusively battery-electric vehicles (BEV), electric vehicles with a small combustion engine to extend the range (Range Extender, REEV) and hybrid vehicles (PHEV) that can be recharged on the power grid and in which both an electric motor and a combustion engine provide the drive (source: definition by the Federal Government. <https://www.bmu.de/themen/luft-laerm-verkehr/verkehr/elektromobilitaet/>). In addition to private motor vehicles and commercial vehicles (e.g. electric railways, city buses, delivery vehicles, etc.), this term also includes industrial trucks (e.g. forklifts, lift trucks or cleaning machines), Segways, e-bikes, electric motorcycles and other electrically powered vehicles.

The Issuer believes that both hybrid and purely electric drives will increasingly be used in the mobile sector in the future. The pressure on vehicle manufacturers to develop solutions in this area is constantly increasing, both from the government and from consumers. In society's opinion, the reasons for this are the increasing scarcity of fossil fuels and the associated price increases, worldwide efforts to reduce CO₂ emissions from vehicles and the specifications for reducing nitrogen oxides and particulate matter, which are increasingly leading to driving bans in urban areas.

This development is primarily driven by government measures. In the EU countries, these are mainly legal requirements for the CO₂ emissions of vehicles. In 2009, an EU Regulation to reduce CO₂ emissions from new passenger cars entered into force, providing for a phased reduction of CO₂ emissions up to 95 g/km from 2020 (Article 1 of Regulation (EC) No 443/2009 of the European Parliament and of the Council of 23 April 2009 setting emission performance standards for new passenger cars as part of the Community's integrated approach to reduce CO₂ emissions from

passenger cars and light commercial vehicles). In March 2019, the EU Parliament approved new targets for average CO₂ emissions from new cars and trucks in the EU to accelerate the transition to low-emission and zero-emission vehicles. The aim is to reduce average CO₂ emissions by 37.5% for new passenger cars and 31% for light commercial vehicles by 2030 compared with the figures for 2021 (see European Parliament Legislative Resolution of 27 June 2002 on the reduction of CO₂ emissions from road vehicles). European Parliament legislative resolution of 16 March 2019 on the proposal for a regulation of the European Parliament and of the Council setting emission performance standards for new passenger cars and light commercial vehicles as part of the Community's integrated approach to reduce CO₂ emissions from passenger cars and light commercial vehicles amending Regulation (EC) 715/2007 (recast) (COM(2017)0676 - C8-0395/2017 - 2017/0293(COD)) (COM(2017)0676 - C8-0395/2017 - 2017/0293(COD)).

Other countries regulate CO₂ emissions, among other things, by means of registration quotas for vehicles with internal combustion engines, such as those that apply in some conurbations in China (source: example Shanghai - high registration costs and allocation of registrations for vehicles with internal combustion engines via a lottery system, whereas free and immediate registration of "New Energy Vehicles": <http://www.chinadaily.com.cn/a/201904/03/WS5ca40d7da3104842260b41df.html>), or on tax concessions and privileges in road transport for electric vehicles such as in Norway (including concessions on road and parking charges, use of lanes reserved for buses and taxis (source: <https://elbil.no/english/norwegian-ev-policy/>)).

Events such as the so-called exhaust gas scandal, which became known in September 2015 and caused a number of manipulations by various car manufacturers to circumvent statutory limits for car exhaust gases, are also driving the growing market interest in e-mobility.

The manufacturers of automobiles and motorcycles are therefore increasingly investing in research into the further development of electric mobility (source: <https://graphics.reuters.com/AUTOS-INVESTMENT-ELECTRIC/010081ZB3HD/index.html>). This research is extensively funded by the Federal Government (source: <https://www.foerderinfo.bund.de/de/elektromobilitaet-190.php>). According to the Issuer's assessment, the most important goals of the industry are currently the reduction of manufacturing costs for traction batteries on the one hand and the increase of ranges and charging speeds on the other. A traction battery is the battery of an electric vehicle that serves as an energy source for the drive. A traction battery is composed of interconnected battery modules, which in turn consist of cells. Since these traction batteries are exposed to cyclic charging and discharging processes during their use, they use only rechargeable batteries (source: <https://www.elektromobilitaet.nrw/infos/e-auto/funktion-batterie/>).

Traction batteries lose capacity in the course of their use and can therefore not permanently meet the high requirements for power and energy density in battery-operated vehicles. However, they can still be used (so-called "**Second Life**"), e.g. in stationary storage applications. In society's estimation, volume and weight play a much smaller role here than in the vehicle, so that a larger number of battery cells can be used to achieve the same capacity. This allows the service life of used lithium-ion traction batteries to be extended and additional revenue to be generated. It also improves the ecobalance of electric mobility (source: <https://www.ffe.de/publikationen/projektberichte/620-second-life-konzept-fuer-lithium-ionen-batterien-aus-elektrofahrzeugen>).

However, the Issuer believes that high acquisition costs, a lack of range and long charging times mean that the demand for vehicles with purely electric propulsion is still manageable at present. Above all, the range is an essential aspect for achieving the greatest possible user acceptance (source: ADAC brochure: "Elektromobilität - Informationen der ADAC Fahrzeugtechnik", https://www.adac.de/_mmm/pdf/Broschüre%20Elektromobilität_308873.pdf). One key to the acceptance of electromobility, in society's view, therefore, lies in high-performance, low-cost and safe batteries, since only with them can the necessary range of purely electric vehicles be achieved.

Electric mobility also includes the shipping sector. This sector is also increasingly subject to market restrictions aimed at reducing noise and exhaust emissions (source: <https://www.bmu.de/themen/luft-laerm-verkehr/verkehr/seeverkehr/>). For this reason, the Issuer believes that the market for maritime electromobility is also growing.

3.2.3 *Portable Applications*

Under the term portable applications, the Issuer has summarized the use of battery packs in wireless power tools as well as in wireless household and garden appliances. Batteries for electric wheelchairs or other mobility solutions for people with reduced mobility also fall into this category.

3.2.4 *Portable battery storage*

The Issuer refers to portable battery storage systems as storage systems that are designed for a regular change of installation location. These include, for example, mobile battery storage units for use on construction sites, at outdoor events, at camping sites or anywhere else where electricity is needed and no mains connection is available. Another conceivable area of application is the use as a mobile emergency power storage unit, which ensures the energy supply in the event of a power failure instead of conventional emergency power generators. In society's opinion, transportable applications therefore represent low-emission and energy-saving alternatives to the gasoline or diesel generators mainly used for these applications up to now.

In addition, there are a large number of potential mobile compact storage solutions (portable energy storage systems) that the Issuer believes can be used in the construction, caravanning and other sectors. According to the Issuer, this is an undeveloped market with only a few products based on lithium-ion battery storage and high energy content.

In the Issuer's opinion, the Issuer's technologies are also ideally suited for use in such and other portable applications. This market, along with other markets, is the focus of development work.

3.2.5 *Stationary storage systems (e.g. for regenerative energies)*

In the stationary sector, energy storage systems based on battery systems will also become increasingly important according to the Issuer's assessment, above all due to the continued government promotion of renewable energies. The market for stationary storage (ESS) is expected to grow by 18% to 36% in the coming years (depending on market forecast) (source: <https://www.isi.fraunhofer.de/content/dam/isi/dokumente/cct/lib/Energiespeicher-Roadmap-Dezember-2017.pdf>). The Issuer believes that lithium-ion batteries will increasingly prevail over other electrochemical storage solutions, so that the Issuer expects the rapid further development of such systems. In the opinion of society as a whole, decentralised storage technologies are gaining in importance compared to large-scale centralised storage facilities such as pumped storage facilities.

The Renewable Energy Sources Act (*Gesetz über den Ausbau erneuerbarer Energien (EEG)*), which came into force in 2000, provides for state-guaranteed feed-in tariffs for decentralised energy generation plants when electricity from renewable energy sources is fed into the grid of energy suppliers. However, these guaranteed remunerations will cease to apply after the respective plant has been in operation for 20 years, which will be the case for the first plants installed under the EEG from 1 January 2021. Accordingly, the grid operator is not obliged to purchase the electricity generated, nor is the system operator entitled to remuneration. In addition, the feed-in tariff per kilowatt hour (kWh) is significantly lower than the consumption price for electricity purchased from the electricity supplier. The Issuer therefore believes that it makes sense for the operators of decentralised plants to use the electricity generated as far as possible to cover their own needs. The Issuer believes that stationary storage systems will play an important role in this context in the future. They are also necessary to ensure a continuous energy supply in line with demand, as energy production from renewable sources is often subject to fluctuations.

With the help of stationary battery storage systems, the unavoidable daytime and seasonal fluctuations in power generation that occur when generating energy from fluctuating energy sources (e.g. wind, sun) can be compensated for just as much as load fluctuations due to variable use of the supraregional power supply (source: <https://www.bmbf.de/foerderungen/bekanntmachung-639.html>). Stationary battery storage systems thus also serve to stabilise the grid and provide uninterruptible power supply (UPS), e.g. for data centres (source: EnergyAgency NRW, "Energiespeicher - Innovative Technologien aus Nordrhein-Westfalen", p. 12, <https://broschueren.nordrheinwestfalendirekt.de/herunterladen/der/datei/cef-broschuere-energiespeicher-pdf/von/energiespeicher-innovative-technologien-aus-nrw/vom/energieagentur/1603+&cd=4&hl=de&ct=clnk&gl=de>). The Issuer also believes that stationary battery storage systems will enable the intermediate storage of electrical energy to enable electricity trading on exchanges.

In the Issuer's view, another important area of application for stationary battery storage could be the power supply of charging stations for electric vehicles in the future. The inadequately developed infrastructure to date, in particular the still incomplete network of charging stations, has a negative effect on demand. The charging infrastructure is a key factor for the rapid spread of electric mobility (source: <http://www.eu-info.de/dpa-europaticker/286868.html>). In society's view, the use of decentralised energy storage systems (stationary or transportable) can significantly increase the efficiency and availability of the charging infrastructure without overloading the power grids, e.g. during peak periods. The Issuer also believes that the use of decentralized energy storage systems at charging stations can significantly reduce investment costs compared with the expansion of grid-side supply.

The Issuer also believes that telephone masts in remote areas could in future be supplied with electricity via stationary battery storage systems.

3.3. Issuer's Activities, the Issuer's Technology and Competitors

3.3.1 *Main areas of activity*

The Issuer is active in the field of research and development and – planned – the production of battery cells, battery systems and products/applications based on battery systems and the distribution of such systems, products and applications. Its focus is on the research and development of solutions for batteries and battery systems/applications based on lithium-ion cells and their integration into systems, applications and products. On the basis of these technologies, energy storage systems (battery systems), applications, products and product solutions are designed and developed with or without in cooperation with third parties are designed and developed both for the mobile sector including E-mobility and for the stationary sector (home and industrial storage) and are intended to be produced and distributed by the Issuer and/or in cooperation with third parties. For this purpose, the Issuer maintains its own research and development department. There are nine employees working in the Issuer. The research and development department is divided into (i) research and pre-series development and (ii) series development. The tasks of the research and pre-series development department are to research advanced battery package technologies using state-of-the-art technologies (e.g. climate chamber, highly sensitive thermal imaging camera, measurement and test methods, materials technologies, connection technologies, etc.) and to manufacture pre-series products (battery systems and battery system applications). Series development is responsible for series development from pre-series products, certification, planning of the production process and selection of suitable contractors (and sub-contractors) in connection with production.

In addition, the Issuer holds participations in public limited partnerships ("KG funds") in its own name and for its own account as part of the management of its own assets as long term investments.

In addition to the ongoing further development of the technologies, the Issuer plans to produce systems, products and applications at its existing site in Mönchengladbach and through contractors and to sell these products in various national and international markets.

The Issuer's activities may also include the licensing of its systems, products, applications and technologies. Licensees and thus customers of the Issuer are expected to be manufacturers of battery systems for stationary and mobile applications and suppliers of manufacturers of e-mobility applications (vehicle manufacturers, etc.). The licensing of the various systems, products, applications and technologies, will be part of this.

The Issuer is currently establishing technical sales activities with a view to series maturity and series production. In addition to sales via distributors (electrical, wholesale and specialist dealers, DIY chains, application manufacturers and distributors, e.g. in the caravaning sector, other wholesalers and retailers as well as in direct sales), the Issuer intends to build up sales activities.

3.3.2 *The technologies*

The Know-How and technologies of the Issuer are specially in battery cells, battery systems, applications, products and product solutions using especially round cells. The Issuer's battery systems, applications, products and product solutions are based merely on a modular design. It allows free scalability of the battery systems with regard to electrical and geometric parameters and has the option of variable shaping. The resulting flexibility at the system levels enables the Issuer to create optimized battery solutions tailored to the product specifications of each application, product and product solution. The systems, applications, products and product solutions developed on the basis of the Issuer's technologies and Know-How can thus be used in a wide range of applications, from small batteries for portable applications to a wide variety of battery systems for mobile use and stationary large storage systems.

Another advantage of the Know-How and technologies developed by the Issuer, according to the Issuer, is that the batteries are relatively easy to assemble and that inter alia manual connection techniques are used. In addition, the Issuer believes that the development-related risk of industrial systems, applications, products and product solutions is significantly reduced by the use of round cells and the associated flexibility in the selection of cell types, cell formats and cell manufacturers.

For the Issuer, the investment costs associated with the industrial production of systems, applications, products and/or product solutions are, in the opinion of the Issuer, significantly lower than those of other systems.

The Issuer's battery storage systems, applications, products and/or product solutions have typically comprehensive security systems adapted to the respective application. Among other things, they are based on a combination of sensor technologies and intelligent measurement, analysis and control algorithms as well as switch-off mechanisms. These ensure the determination of system states, the monitoring and control of safety-relevant parameters and system protection in the event of a fault. The features of the safety concept include the electrical protection as an integral component of the battery modules technologies, algorithms for early detection of faults and monitoring of safety-critical parameters. Due to the implemented security mechanisms, the system failure rate is reduced and thus, according to the Issuer's assessment, a high level of reliability and resulting cost-effectiveness is achieved, making the Issuer's systems, applications, products and/or product solutions particularly suitable for the sector of mobile and stationary industrial storage systems.

The Issuer's systems, applications, products and/or product solutions allows fast and cost-effective production for a wide variety of usage. The production of the Issuer's battery accumulators is characterized by simple scalability, which enables the continuous adjustment of the production quantities from individual prototypes to small (approx. 1,000 battery packs), medium (approx. 10,000 battery packs) or large series quantities (larger than 100,000 systems, applications, products and/or

product solutions). This is an important factor, especially for the start-up phase of industrial production.

Due to non-destructive processes, the technologies also offers the possibility of time- and cost-efficient maintenance and, if necessary, repair of systems, applications, products and/or product solutions. In addition, this makes it possible to use the abtteries as "second life" applications in other applications. The Issuer's technologies thus offer the possibility of continuing to use batteries from high-performance products in applications with lower requirements, while at the same time achieving the maximum service life for the application in question. At the same time, the systems, applications, products and/or product solutions can be upgraded to the latest technological standard by using new cells and/or batteries. In summary, the Issuer believes that the Issuer's Know-How and technologies will increase system reliability, product service life and thus profitability. By reusing the installed components, the Issuer's technologies also promotes the ecological aspect of sustainability by saving energy and conserving natural resources.

In principle, the Issuer's technologies allow the use of round cells of any cell format, any application (high energy or high capacity) as well as different cell chemistry in the battery storage systems. In the opinion of the Issuer, this offers the User a high degree of future security. A large number of manufacturers are available for these round cells, so that the Issuer, and thus also its customers, are not dependent on one or a few cell manufacturers.

3.3.3 *Applications of E-Stream Energy's Know-How and technologies*

As application areas for the Issuer's technologies and products, the Issuer has primarily identified the areas of e-mobility and portable and stationary battery storage (including charging infrastructure for electric vehicles) as business areas.

E-Mobility in general

E-mobility refers to the use of electric vehicles, i.e. vehicles of all types that use an electric drive and carry an energy storage device. In addition to private motor vehicles and commercial vehicles (e.g. electric railways, city buses, delivery vehicles, etc.), this term also includes industrial trucks (e.g. forklifts, lift trucks or cleaning machines), Segways, e-bikes, electric motorcycles and other electrically powered vehicles.

The degree of electrification can vary, so a distinction is made between hybrid drives, i.e. vehicles powered by at least two forms of energy, e.g. petrol and electricity, on the one hand and purely electric drives on the other. According to the Issuer, both hybrid and purely electric drives will increasingly be used in the mobile sector in the future in view of global efforts to reduce CO2 emissions from vehicles and the requirements for reducing nitrogen oxides and particulate matter.

Electric mobility also includes the shipping sector. This sector is also increasingly subject to market restrictions aimed at reducing noise and exhaust emissions. For this reason, the market for maritime electromobility is also growing.

Portable Applications

The Issuer's Know-How and technologies and products are also suitable for use in portable applications. Portable applications are primarily the use of batteries and battery cells in wireless power tools as well as in wireless household and garden appliances. Batteries for electric wheelchairs or other mobility solutions for people with reduced mobility also fall into this category. However, the market for portable applications is not currently the focus of the Issuer's development work.

Portable Battery Storage

Transportable battery storage systems are storage systems that are designed for a regular change of location. These include, for example, mobile battery storage units for use on construction sites, at outdoor events, at camping sites or anywhere else where electricity is needed and no mains connection is available. Another conceivable area of application is the use as a mobile emergency power storage unit, which ensures the energy supply in the event of a power failure instead of conventional emergency power generators.

Stationary storage systems, e.g. for renewable energies

With the help of stationary battery storage systems, the unavoidable daytime and seasonal fluctuations in power generation that occur when generating energy from fluctuating energy sources (e.g. wind, sun) can be compensated for just as much as load fluctuations due to variable use of the supraregional power supply. Stationary battery storage systems are also used for grid standardized and uninterruptible power supply (UPS), e.g. for data centres. The intermediate storage of electrical energy to enable electricity trading on exchanges is also made possible by stationary battery storage.

Another important field of application for stationary battery storage systems could be the power supply of charging stations for electric vehicles in the future. The Issuer believes that the inadequately developed infrastructure to date, in particular the still incomplete network of charging stations, has a negative effect on demand. The charging infrastructure is a key factor for the rapid spread of electric mobility. The use of standardized energy storage systems (stationary or transportable) can significantly increase the efficiency and availability of the charging infrastructure without overloading the power grids, e.g. during peak traffic periods.

The Issuer's business plan provides for strategic objectives:

The Issuer intends to create modular products of increasing complexity and successively launch them on the market. This means that systems, applications, products and/or product solutions for mobile applications standardized by the Issuer for stationary applications standardized by the Issuer are manufactured in an industrial form factor (19-inch rack format) and used in various applications. The product portfolio is to be successively built up and expanded, whereby a high degree of standardization is to be achieved. The aim is to create a particularly high quality and practical functionality of the end product in order to achieve a good customer response ("user experience"). In this context, "Made in Germany" is to be placed in the foreground as a quality feature, especially in the US market.

Main applications planned in this field are mobile energy storage devices and 19-inch rack energy storage devices in modularly expandable form, which are to be certified and launched on the market. In addition, the battery storage systems, applications, products and/or product solutions in the e-mobility sector shall be presented to industrial customers and its performance will be demonstrated in joint tests.

The Issuer assumes that the mobile energy storage units and 19-inch rack energy storage units will be launched on the market after development and certification. As the Issuer has identified the USA and Europe as one of the important sales markets, the sensitivity analysis of the business plan to deviations from the most important assumptions involves risks due to a protectionist market access policy (customs duties, etc.) in the USA and energy policy dependencies (duration and speed of the energy turnaround, expiry of feed-in tariffs and expiry of purchase commitments by grid operators for locally generated electricity) in Europe in general and individual countries in particular.

3.3.4 *Current and expected competitors*

3.4 Corporate Strategy

3.4.1 *Achieving strong growth*

The Issuer intends to benefit from the strong dynamics in (i) the electrification of drive technologies in the automotive industry (emobility), (ii) in the area of stationary energy storage systems based on modular systems for use in the home and industrial sector, including in the area of uninterruptible power supply (UPS) for inter alia data centres, and (iii) in the area of mobile and hybrid systems on the basis of the product portfolio it is aiming for, and to win new customers in the process.

Based on the degree of complexity of the different sub-areas as well as the requirements for certification in the automotive sector, cooperation with other suppliers is intended, so that offering solutions (know-how and IP, if applicable) as well as sub-components on the basis of own solutions can be considered.

A further objective of the Issuer is to build up product manufacturing capacity and cooperations in Germany and, depending on various factors, internationally as well as to enter the market, particularly in Europe, the United States of America and Canada, and possibly Japan, which should increase demand for products. The Issuer will endeavour to continuously increase the attractiveness of the Issuer for highly qualified research and development personnel (Human Resources Strategy) in order to accompany the targeted growth process with personnel.

The Issuer assumes that increasingly high-margin industrial applications can be realised through substitution effects (replacement of lead-acid battery systems by its own Li-ion battery systems). According to the Issuer, application examples for this include stationary applications inter alia in data centres and other business-critical applications. According to the Issuer, initially higher customer investments in future Li-ion battery systems should pay off in favour of the customers within the scope of the Total Cost of Ownership (TCO) consideration through longer product life and reduced maintenance costs.

3.4.2 *Development of the US and European markets, evaluation of further markets*

The Issuer is currently taking preparatory steps to enter the US and European markets. Part of the proceeds from this Offer will be used to establish the Issuer's presence in the Distribution markets, inter alia in North America. The Issuer expects similarly favourable electrification trends and market developments in the USA as in Europe. The Issuer is also evaluating other markets.

3.4.3 *Research and development and intended expansion of the market through acquisition of new components and products*

The Issuer intends to further advance research and development, divided into (i) battery packs and (ii) specific applications (applications) based thereon.

This includes in particular current efforts to build up and expand its product portfolio in the field standardised modular batteries (24 Volt and 48 Volt systems) which, among other things, are to be used in standardised dimensions (19 inch rack) for stationary energy storage systems with applications in the home and industrial sector including in the field of uninterruptible power supply (UPS) (each capable of high voltages up to approx. 800 Volt) as well as in the field of mobile and hybrid systems (portable and transportable solutions which can also be used as stationary modules by means of extension modules) as well as in the field of applications with

- modular directly usable energy storage units as 19 inch rack with up to approx. 800 V (high-voltage capable) as well as 110-380 V on application side; and
- mobile and hybrid systems (portable or transportable solutions, which can also be used as stationary modules by means of extension modules), e.g. in the caravanning and home sectors.

The standardization of systems, applications, products and/or product solutions is intended to increase vertical integration, i.e. the use in a wide variety of applications and in areas with value creation potential.

In the various end markets in which the Issuer plans to operate, it also intends to achieve market shares by acquiring new products and components. The aim is to enter the market as quickly as possible with high-quality systems, applications, products and/or product solutions, whereby individual components are purchased for applications in line with industry practice (e.g. in the area of inverters, etc., including white labeling if necessary).

3.4.4 *Pursuing growth opportunities through targeted acquisitions*

The Issuer endeavours to achieve its planned growth also through acquisitions, provided these are strategically sensible. The Issuer intends to continuously improve its project management and its competencies, while at the same time expanding its market potential. Targeted acquisitions, particularly in Germany, Western Europe, the USA and Asia, are also expected to play a part in this. According to the Issuer, this could improve the future market position through increased economies of scale in sales, marketing, procurement and production. The Issuer aims to establish a solid market position in the "Battery systems, applications, products and/or product solutions" segment both in Europe and in the USA with the aim to increase its market position. In particular, the Issuer sees a good opportunity to achieve a strong and attractive market position in the currently still highly fragmented markets in Europe and the USA.

In addition, the Issuer intends to expand its business through selective acquisitions of companies focusing on related businesses. Areas or possibly companies operating in business areas which are complementary to those of the Issuer, such as metalworking or manufacturers of compatible electronic components, may become potential targets of strategic partnerships and investments, including the acquisition of majority interests.

3.4.5 *Licensing of technologies, Know-How and processes in the field of e-mobility*

The Issuer intends to achieve certifications in the automobile sector and to enter into cooperations (including contract production) in order to achieve the fastest possible and broadest possible market penetration in mass markets.

3.4.6 *Development of safety components for lithium-ion battery storage for e-mobility*

In the field of e-mobility, vehicle manufacturers and OEMs are faced with completely new requirements with regard to product safety in comparison to classic powertrain systems through the use of high-voltage systems. Against this background, the Issuer intends to improve product safety through special solutions to avoid and, where not otherwise possible, through the controlled destruction of battery systems and to develop and offer further solutions in addition to the existing solutions.

3.5 Competitive strengths

In the opinion of the Issuer, its competitive strengths lie in the following areas:

3.5.1 *Efficient management with many years of experience*

At its location in Mönchengladbach, the Issuer has a management team with many years of experience in the field of energy storage systems, portable and transportable battery storage as well as e-mobility with a good network in the market. At the same time, the Issuer believes that a lean and efficient team enables it to react quickly to new market opportunities and trends and to position itself on the market in the long term.

3.5.2 *Diversified business model*

In its assessment, the Issuer will have a diversified business model with three intended pillars in the planned business segments "Stationary Energy Storage Systems", "Portable and Transportable Battery Storage Systems" and "E-Mobility" – and thus three different sub-segments of the energy storage market, some of which are subject to other influencing factors. The area of e-mobility, which has special barriers to market entry, can thus profit successively from the other two sub-areas. There will be considerable synergy potential between the three business segments, for example in the areas of purchasing, financing, development and sales, e.g. through the modular design on the basis of standardized battery packs defined by the Issuer, in which the essential components lithium-ion round cells and contacting technologies are identical or very similar. In the opinion of the Issuer, this sets the Issuer apart from other companies that are exclusively focused on individual sub-areas.

3.5.3 *Fast charging times of the battery packs*

The market acceptance of battery storage systems in e-mobility depends not only on the range, which is achieved depending on the mobile application (e.g. vehicle) and the installed capacity, but also on the charging time. Very long charging times in some cases are detrimental to sales, especially of purely electric but also hybrid vehicles/applications. The Issuer was able to realize leading loading times in the market through test institutes.

3.5.4 *Innovative and powerful products*

Until now, it has been difficult for industry to manufacture high-power and high-capacity battery packs on the basis of lithium ion round cells, since high packing densities of the battery cells always generate heat during high charging or discharging for physical reasons, which is detrimental to the battery cells' service life (charging cycles) and which is one of the causes, particularly in the field of e-mobility, for the important factors of charging duration, range and constant availability. According to its own assessment, the Issuer has realised technically sophisticated energy packs with very high energy (both volumetric and gravimetric) using the latest technologies. The temperature management, which was difficult with high packing densities, was successfully implemented by the technologies according to the Issuer's own assessment. In the view of the Issuer, the battery packs are very energy efficient and high performance battery packs compared to competitors in terms of energy density and compactness measured by the volumetric and gravimetric energy of the battery packs. Even under very high requirements (high charging and discharging rates), good technical properties could be achieved, i.e. a high homogeneous temperature distribution without significant hotspots (small temperature

differences over the entire battery pack) with simultaneous temperature in the permissible operating range and constant availability (i.e. usability without reduction of charging and discharging rates) of the battery packs, which were confirmed by external test institutes during development. The result is a high system availability and reliability, which is also low-maintenance. As a result, it can be summarised that high charging rates, i.e. short charging times, high range due to very high energy density (use of available installation space) and constant availability even under high loads are achieved by means of the battery packs of the emitter transferred to an e-mobility application (e.g. vehicle). In its opinion, the Issuer's solution for e-mobility applications is better and simpler than competitor solutions.

3.5.5 Recycling und 2nd Life

Adequate recycling is not only an important aspect within the framework of the ecological balance of the product over its entire service life, but is also decisive for the cost-effective reuse or recycling of the battery cells. In its opinion, the Issuer has technologies that are particularly geared to this and represents a significantly better and simpler solutions than available systems on the market.

4. Material Contracts

Material contracts of the Issuer within the normal course of business that exist today include these contracts:

Agreements in respect of Timberland Securities Investment plc's group

The Issuer may be provided loans by Timberland Securities Investment plc. In connection with the latter, E-Stream Energy GmbH & Co KG has entered into loan agreements with the respective related parties which stipulate repayment and interest terms.

II. DESCRIPTION OF THE AGENTS

1. Paying Agents

This also applies to statements in the "Risk Factors" and "Business Review and Prospects" sections and wherever the Base Prospectus contains information about the Issuer's future financial performance, plans and expectations regarding the Issuer's business, growth and profitability and the economic environment to which the Issuer is exposed. The forward-looking statements are based on the current assessment made by the Issuer to the best of its knowledge. Such forward-looking statements are based on assumptions and factors and are therefore subject to risks and uncertainties. Therefore, it is important to read in particular the sections "Risk Factors", "Business Review" and "Business Review and Prospects" which contain a detailed description of factors that may affect the business development of the Issuer and the industry in which the Issuer operates.

The forward-looking statements are based on the Issuer's current plans, estimates, forecasts and expectations and on certain assumptions which, although the Issuer believes that they are reasonable at this time, may subsequently prove to be incorrect. Many factors may cause the actual performance or earnings or performance of the Issuer to be materially different from any future performance or performance expressed or implied by such forward-looking statements.

These factors include, among others:

- changes in general economic, business or legal conditions,
- political or regulatory changes,
- changes in the Issuer's competitive environment,
- other factors discussed in more detail in the section "Risk Factors", and
- factors that are not known to the Issuer at the present time.

If, as a result of these factors, risks or uncertainties arise in individual or several cases, or if assumptions made by the Issuer prove to be incorrect, it cannot be excluded that actual results may differ materially from those described in this Base Prospectus as assumed, believed, estimated or expected. For this reason, the Issuer may be prevented from achieving its financial and strategic objectives.

The Issuer does not intend to go beyond its legal obligation to update such forward-looking statements or to conform them to future events or developments.

Pursuant to applicable laws, the Issuer is obliged to prepare and publish a supplement to this Base Prospectus if important new circumstances arise or material inaccuracies in the information contained in this Base Prospectus become known which could influence the assessment of the Issuer's shares and which occur or are determined after the approval of this Base Prospectus and before the final closing of the public offering.

VIII. REFERENCE TO SOURCES OF MARKET INFORMATION AND TECHNICAL TERMS

The Issuer has not verified information contained in this Base Prospectus from third-party studies on the market environment, market developments, growth rates, market trends and the competitive situation. The Issuer has accurately reproduced this information from third parties and, to the Issuer's knowledge and as far as it could infer from the published information, no facts have been misappropriated which would render the reproduced information incorrect or misleading.

Furthermore, information on the market environment, market developments, growth rates, market trends and the competitive situation in the areas in which the Issuer is active is based on estimates made by the Issuer.

Information derived therefrom which has not been obtained from independent sources may therefore differ from the estimates of the Issuer's competitors or from future surveys by independent sources.

IX. NOTE ON FINANCIAL AND NUMERICAL DATA

The financial data contained in this Base Prospectus (including such incorporated by reference), which are the subject of the Issuer's financial statements, are primarily derived from the Issuer's HGB annual financial statements as of December 31, 2019.

This Base Prospectus contains currency information in Euro. Currency information in euros was indicated with "EUR", and currency information in thousand euros was indicated with "TEUR" before the amount and abbreviated. Individual figures (including percentages) in this Base Prospectus have been rounded according to commercial practice. In tables, such commercially rounded figures may not add up exactly to the totals contained in the table.

XII. SUPPLEMENTS TO THE BASE PROSPECTUS AND SUCCESSOR BASE PROSPECTUSES

This Base Prospectus will be effective for 12 months from its approval. If this Base Prospectus is updated at a later pursuant to the provisions of the Prospectus Regulation, this Base Prospectus will from the date of publication of the relevant supplement be deemed to apply as amended. The supplements will become parts of this Base Prospectus. The supplements will be published and made available in the same manner as this Base Prospectus.

When the Base Prospectus ceases to be effective, the offer may be continued in accordance with the relevant Final Terms and on the basis of a Successor Base Prospectus. Publication of a Successor Prospectus shall be made in accordance with the details set out in the relevant Final Terms.

In the case of a public offering of Notes under this base prospectus (at the same time the **Original Base Prospectus**) the relevant Final Terms may provide for a succession of the public offering of the Notes after the validity of this Base Prospectus, if a successor prospectus is published.

In the event of a public offering being continued under a Successor Base Prospectus, the relevant Final Terms, including the relevant summary, if any, shall be read in conjunction with the Successor Base Prospectus, which means that, in such case, each reference to the Base Prospectus made in the relevant Final Terms shall be deemed to constitute a reference to the relevant Successor Base Prospectus, with the exception of the security-specific terms and conditions of the relevant issue which will continue to be governed by the Original Base Prospectus. **Successor Base Prospectus** means the most current applicable base prospectus, specifying the Notes to be included in the continued public offering and incorporating by reference those parts of the Original Base Prospectus which are required for the relevant issue of Notes.
