What are the key risks that are specific to the Issuer?			
<p>The Issuer has identified a broad range of risks to which its businesses are exposed. Material risks are those to which senior management pay particular attention and which could cause the delivery of the Issuer's strategy, results of operations, financial condition and/or prospects to differ materially from expectations. Emerging risks are those which have unknown components, the impact of which could crystallise over a longer time period. The factors set out below should not be regarded as a complete and comprehensive statement of all the potential risks and uncertainties which the Issuer faces. For example, certain other factors beyond the Issuer's control, including escalation of global conflicts, acts</p>

of terrorism, natural disasters, pandemics and similar events, although not detailed below, could have a similar impact on the Issuer.

- **Material existing and emerging risks potentially impacting more than one principal risk:** In addition to material and emerging risks impacting individual principal risks (such as principal risks set out below), there are also material existing and emerging risks that potentially impact more than one of these principal risks. These risks are: (i) potentially unfavourable global and local economic and market conditions, as well as geopolitical developments; (ii) the impact of interest rate changes on the Issuer's profitability; (iii) the competitive environments of the banking and financial services industry; (iv) the regulatory change agenda and impact on business model; and (v) change delivery and execution risks.

Principal risks include:

- **Climate Risk:** Climate risk is the risk of financial losses arising from climate change through physical risks and risks associated with transitioning to a lower carbon economy.
- **Credit and Market Risks:** Credit risk is the risk of loss to the Issuer from the failure of clients, customers or counterparties, to fully honour their obligations to members of the Issuer. The Issuer is subject to risks arising from changes in credit quality and recovery rates for loans and advances due from borrowers and counterparties. Market risk is the risk of loss arising from potential adverse change in the value of the Issuer's assets and liabilities from fluctuation in market variables.
- **Treasury and Capital Risks and the risk that the Issuer is subject to substantial resolution powers:** There are three primary types of treasury and capital risk faced by the Issuer which are (1) liquidity risk – the risk that the Issuer is unable to meet its monetary contractual or contingent obligations or that it does not have the appropriate amount, tenor and composition (including currency) of funding and liquidity to support its assets, which may also be impacted by credit rating changes; (2) capital risk – the risk that the Issuer has an insufficient level or composition of capital to support its normal business activities and to meet its regulatory capital requirements under normal operating environments and stressed conditions (both actual and as defined for internal planning or regulatory stress testing purposes); and (3) interest rate risk in the banking book – the risk that the Issuer is exposed to capital or income volatility because of a mismatch between the interest rate exposures of its (non-traded) assets and liabilities. Under Directive 2014/59/EU, as amended from time to time (the "**Bank Recovery and Resolution Directive**"), substantial powers are granted to Relevant Resolution Authorities to implement various resolution measures and stabilisation options with respect to an Irish bank or investment firm (currently including the Issuer) (including, but not limited to, the bail-in tool, which gives a Relevant Resolution Authority the power to write down certain claims of unsecured creditors of a failing relevant entity (which write-down may result in the reduction of such claims to zero) and to convert certain unsecured debt claim into equity or other instruments of ownership) in circumstances in which the Relevant Resolution Authority is satisfied that the relevant resolution conditions are met. The exercise of any resolution powers or any suggestion of any such exercise could materially adversely affect the value of any Securities and could lead to holders of the Securities losing some or all of the value of their investment in the Securities.

"**Irish Bail-in Power**" means any write-down, conversion, transfer, modification and/or suspension power existing from time to time under any laws, regulations, rules or requirements relating to the resolution of banks, banking group companies, credit institutions and/or investment firms incorporated in Ireland in effect and applicable in Ireland to the Issuer, including but not limited to any such laws, regulations, rules or requirements that are implemented, adopted or enacted within the context of any European Union directive or regulation of the European Parliament and of the Council establishing a framework for the recovery and resolution of credit institutions and investment firms, as the

same has been or may be amended from time to time, pursuant to which obligations of a bank, banking group company, credit institution or investment firm or any of its affiliates can be reduced, cancelled, amended, transferred and/or converted into shares or other securities or obligations of the obligor or any other person.

"Relevant Resolution Authority" means the Central Bank of Ireland, the Single Resolution Board established pursuant to the SRM Regulation and/or any other authority entitled to exercise or participate in the exercise of the Irish Bail-in Power from time to time.

"Securities" means any securities issued by the Issuer described in any securities note and, if applicable, summary, which, when read together with this Registration Document, comprise a prospectus for the purposes of Article 6(3) of the Prospectus Regulation or in any base prospectus for the purposes of Article 8 of the Prospectus Regulation or other offering document into which this Registration Document may be incorporated by reference.

"SRM Regulation" means Regulation (EU) No 806/2014 of the European Parliament and Council of 15 July 2014, as amended from time to time, establishing uniform rules and a uniform procedure for the resolution of credit institutions and certain investment firms in the framework of a Single Resolution Mechanism and a Single Resolution Fund and amending Regulation (EU) No 1093/2010, as amended or replaced from time to time.

- **Operational and Model Risks:** Operational risk is the risk of loss to the Issuer from inadequate or failed processes or systems, human factors or due to external events where the root cause is not due to credit or market risks. Model risk is the potential for adverse consequences from decisions based on incorrect or misused model outputs and reports.
- **Compliance, Reputation, Legal Risks and Competition and Regulatory Matters and Financial Crime Risks:** Compliance risk is the risk of detriment to customers, clients, market integrity, effective competition or the Issuer from the inappropriate supply of financial services, including instances of wilful or negligent misconduct. Reputation risk is the risk that an action, transaction, investment, event, decision or business relationship will reduce trust in the Issuer's integrity and/or competence. The Issuer conducts activities in a highly regulated market which exposes it to legal risk arising from (i) the multitude of laws and regulations that apply to the activities it undertakes, which are highly dynamic, may vary between jurisdictions and/or conflict, and may be unclear in their application to particular circumstances especially in new and emerging areas; and (ii) the diversified and evolving nature of the Issuer's businesses and business practices. In each case, this exposes the Issuer to the risk of loss or the imposition of penalties, damages, fines or remedial orders from the failure of members of the Issuer to meet applicable laws, rules, regulations or contractual requirements. Legal risk may arise in relation to any of the risk factors summarised above. Financial crime risk is the risk that the Issuer and its associated persons (employees or third parties) commit or facilitate financial crime, and/or the Issuer's products and services are used to facilitate financial crime.

The Issuer accepts responsibility for the information contained in this Supplement and declares that, to the best of its knowledge, the information contained in this Supplement is in accordance with the facts and that this Supplement makes no omission likely to affect its import.

To the extent that there is any inconsistency between (a) any statement in this supplement or any statement incorporated by reference into the Registration Document by this supplement and (b) any other statement in, or incorporated by reference in, the Registration Document, the statements in (a) above will prevail.

If documents which are incorporated by reference into this Supplement themselves incorporate any information or other documents therein, either expressly or implicitly, such information or other documents will not form part of this Supplement for the purposes of the Prospectus Regulation except where such information or other documents are specifically incorporated by reference into this Supplement.
